Projects

- **Hostel management**

Hostel management system is design to manage all hostel activities like hostel admission,fees,room,mess allotment,hostel stores & generates related reports for smooth transactions.MasterSoft's Hotel Management Software is a one-step- solution that streamlines & automates all the day to day hostel activities.

- **Detection Of Facial Expression Real Time And Drowsiness Detection**

It become very dangerous to drive when feeling sleepy who travel day and night for many hours.the majority of accidents happen due to drowsiness of the driver.So,to prevent these accident we will build a system using Python ,which will alert the driver when he feels sleepy.
