Present Address:
1045 Napa Illam, TH Road,
Old Washermenpet,
Chennai-600021

Languages known:
English, Tamil

Experience:
Mar-2024 – Till date
working as Senior
Performance Test
Engineer at Aspire
Systems, Chennai.

Oct-2021 – Feb-2024
worked as Performance
Test Engineer at Aspire
Systems, Chennai.

Personal Data:
Father's Name:
Navaneetha
Krishnan
Date of Birth: 20 January
2000
Nationality: Indian
PAN:
CURPA9669Q

CURRICULAM VITAE

Objective:

Results-driven Performance Test Engineer with 3.5 expertise in JMeter, load testing, mobile application performance testing, and front-end performance testing using Sitespeed. Passionate about optimizing system performance, identifying bottlenecks, and ensuring seamless user experiences. Seeking an opportunity to leverage my skills in performance testing and engineering to contribute to a high-performing team and drive application scalability and reliability

Summary:

- Around 3.5 years of experience in performance testing
- Rich experience in performance testing of web applications, web services API & databases
- Expertise in mobile application performance inclusive of IOS and Android
- Profound expertise in **JMeter tool and Sitespeed.io (UI performance)**
- Expertise working in collaboration with engineering team in identifying, analyzing and resolving performance bottlenecks
- Expertise in conducting different types of performance tests like Load, Stress and Endurance tests
- Profound in preparing custom performance reports based on project needs & performance objective
- Possess good experience identifying performance scenarios, load / ramp up pattern, rendezvous point strategy
- Good knowledge and experience on testing techniques, methodologies, analyzing requirements and defect reports
- A self-starter with clear understanding of the business needs, having technical problem-solving approaches, possess excellent Communication, having leadership skills.

Strengths:

- Excellent Communication skill to present points precisely and clearly
- Good problem-solving ability and analytic skill to solve the problem efficiently
- Good team player and have excellent interaction skill to coordinate and work within a team
- Always open for new challenges and seeking learning experience from every opportunity

Education:

- 2017-2021: **B.E CSC(8.02CGPA)** at S.A Engineering College
- 2016-2017 : **HSC(77%)** at KCS Higher Secondary School
- 2014-2015 : **SSLC(89%)** at KCS Higher Secondary School

Technical Skills:

Testing tool	:	JMeter, Sitespeed, Neoload (Beginner)
Monitoring Tools	:	Grafana
Databases	:	MySQL
Scripting Languages	:	Java
IDEs	:	Visual studio code

Roles and responsibilities:

- Responsible for developing and modifying test scripts using JMeter
- Involved in designing a workload model based on the defined SLA
- Preparation and Execution of Test scripts & Test data
- Documenting the Test Results and generating Test Reports
- Client communication - Discuss with client on the reports
- Coordinating with the development team during the execution window or after performance tuning / optimization

Project Undertaken:

1. Insurance Company:

Duration	: 2 months
Role	: Performance Test Engineer
Tools Used	: JMeter

Project Description

The customer offers a software platform for managing the different insurance policy. Our performance engagement is to ensure the scalability of application for future needs and figure out any performance bottlenecks in the existing systems.

2. Warehouse Management Application:

Duration	: 5 months
Role	: Performance Test Engineer
Tools Used	: JMeter, LoadRunner

Project Description

Client is one of the leading offline retailers in the USA and they own more than 100+ shops throughout the USA. Our performance engagement is to check the scalability of the warehouse management application for future needs.

3. E-Commerce Application :

Duration	: 4 months
Role	: Performance Test Engineer
Tools Used	: JMeter

Project Description

Client is one of the leading Jewelry makers in India and they have an E-Commerce website and Mobile application to sell their products and their gold schemes to the customers. They opt for performance testing to identify performance bottlenecks they faced previously during the peak sale period.

4. Banking Application:

Duration : 2 Years
Role : Performance Test Engineer
Tools Used : JMeter, Grafana, Jenkins

Project Description

Client is the one the leading Bank based on Malaysia, they have both IOS and Android application for the mobile banking and website for internet banking. The performance engagement is to ensure the scalability of their mobile application for future needs and figure out any performance bottlenecks in the application

5. Banking Application:

Duration : 2 months
Role : Performance Test Engineer
Tools Used : JMeter, Jenkins, Grafana

Project Description

Client is the one of the industry-leading banking institution, delivering banking solutions to the asset management industry on a global scale, The performance engagement is to figure out any performance bottlenecks in the application.

6. Banking Application:

Duration : 2 months
Role : Senior Performance Test Engineer
Tools Used : JMeter, Sitespeed

Project Description

Client is the one of the industry-leading banking institution, delivering banking solutions to citizens in their country, The performance engagement is to figure out any performance bottlenecks in the application and Application front end performance .

Declaration:

I hereby declare that all the details furnished above are true to the best of my knowledge and belief.
