Tools , Languages

- Core Java
- Selenium
- BDD Cucumber
- TestNG
- Postman
- Rest Assured
- Maven
- SQL
- JIRA
- Jenkins

Education Background

- Jeppiar Engineering College
BE ECE

Completed in 2019

Professional Experience

Aspire Systems Ltd | Software Test
Engineer
June 2019

Infogain | QA Automation Tester
March 2024

Achievements

Contribution in the development of the
BDD Cucumber framework.

Career Objective

Looking for a challenging software tester position where I can use my skills and knowledge for software program testing and design. Creative thinker and content expert with in-depth knowledge of development tools and languages. Looking for a position where I am utilizing my 4.10 years of experience at a higher level.

Professional Summary

- Supplying 4.10 years of enterprise level in in guide and automatic trying out.
- Having enjoy and understanding in Ecommerce and ELearning.
- Information in growing scripts in Selenium web driving force with the aid of the use of java for automating the internet – primarily based application.
- Having top level in in distinct automation frameworks like Cucumber BDD, JUnit, TestNG, POM and information pushed framework.
- Information in growing BDD scripts with Cucumber and Step Definition for behavior.
- Enjoy in construct Automation tools like Maven and CI/CD equipment like Jenkins.
- Massive level in in designing take a look at scenarios, take a look at Scripts and check reports
- Palms on enjoy in monitoring and Reporting of defects using disorder tracking tool – JIRA. preserving
- The checkout and check inside the sourcecode from GIT.
- Exact enjoy in writing X-paths and CSS selectors to become aware of web factors.
- Proficient in the usage of simple square queries to perform again end checking out for data integrity.
- Concerned in ceremonies like daily Scrum call, sprint planning, Spring evaluation and Retrospective.
- Have knowledge in relaxation assured.
Have right enjoy in developing framework from starting level.
- Good understanding in checking out Restful HTTP methods GET, submit, positioned and DELETE in POSTMAN and the usage of relaxation confident for automation at the side of JSON parser validation and Assertions.

Project I

TESCO - ECOMMERCE

Tesco is a UK supermarket chain with 3,400 stores nationwide and a thriving e-commerce arm ranking number one in the UK for the food and drink/groceries category. In addition to groceries, Tesco has expanded to clothing, banking, telecommunications, and more, making them a competitor across a wide variety of categories, attracting customers from across most demographics.

Key Roles

- Involved in Automation framework imposing page objects, data driven, Maven using Selenium net driving force the use of core Java.
- Put together reusable techniques to improve productiveness and maintainability.
- Prepare characteristic files and Step definition in Cucumber with BDD.
- Put together single Unit classes to reduce memory wastage.
- Involved in computer virus solving for the defects raised at some point of UAT.
- Concerned in Push, Pull, Merge the supply code from GIT.
- Suitable enjoy in resolving conflicts whilst using GIT.
- Carry out pass browser testing and parallel execution to check the compatibility and stability of the application.
- Considerably computerized Regression check using Jenkins.
- Suitable in Java language programming and finding X-route locators.
- Actively participate in ceremonies which include each day standup calls, dash evaluation meeting and dash retrospective meeting.
- Prepare weekly fame reviews. Understanding existing test cases and test data, and executing the test cases and validating Results in line with the project schedule and productivity metrics.
- Experience of testing within an Agile environment, adapting quickly to changing situations.

Project II

WEBANYWHERE - ELEARNING

This project is a Webanywhere are specialist providers of web-based learning platforms, school websites, phone apps and online resources. We are at the forefront of learning technology development that enables people to achieve more and collaborate through shared learning.

Key Roles

- Involvement In creating of the test cases, check scenarios and take a look at information.
- Instruction Of take a look at method. Involvement In Database checking out chargeable for GUI and purposeful checking out, the usage of Black container trying out strategies.
- Involvement in check Execution, end result reading and illness Reporting.
- Involved in studying The necessities and speaking With BA group For better know-how of the necessities.
- Worried in Implementation of task precise capabilities in Libraries
- Learned app commercial enterprise necessities, technical specification, installation hints
- Wrote and carried out check instances for fundamental software modules
- Concerned in test case execution and computer virus reporting.
- Worried in education of take a look at strategies, check situations, instances and check statistics.
- Liable for GUI and functional trying out, the use of Black field trying out techniques.
- Concerned in test Execution, consequences Comparing and defect Reporting.
- Involvement in RTM education. Involved in Automation Infrastructure improvement the use of Selenium. Created take a look at instances using detail locators and Selenium web driving force strategies.
