Certifications

BlazeMeter Test Data for
Performance Testing
BlazeMeter Master Performance
Testing
LoadRunner
Apache JMeter™ Pro
Apache JMeter™ Intro

Abubakkar Sithick

Performance Tester | JMeter | LoadRunner | Blazemeter | Dynatrace
| Grafana | Distributed Load Testing |
Coimbatore, Tamil Nadu, India

Summary

- Passionate Performance Testing and Analysis Specialist with over 3+ years of experience in the Software industry. Skilled in navigating complex testing scenarios to enhance application performance and user experience.
- Broad expertise across Banking, Insurance and Retail providing a deep understanding of various domain-specific challenges and solutions.
- Hands-on experience with leading performance testing tools, including Apache JMeter, Microfocus LoadRunner, and Blazemeter to validate and optimize system performance under varied conditions.
- Advanced proficiency in Workload Modelling, Test Planning, Test Design, Execution, and Reporting, ensuring comprehensive coverage and insightful analysis.
- Expert in analyzing and testing various protocols (Web HTTP/HTML, Web Services(SOAP & REST API), WebSockets, JDBC and SMTP), enhancing application responsiveness and reliability.
- Demonstrated ability to utilize distributed load testing to simulate more users of load generators, ensuring scalability and performance.
- Proficient in Application Performance Monitoring (APM) tools like Dynatrace offering actionable insights into server and application health.
- Expert in JMeter for efficient test execution, including Non-GUI mode, BeanShell, and Groovy scripting, maximizing test automation and efficiency.
- Integrated Grafana with InfluxDB to monitor client-side metrics, providing a real-time view into application performance during testing.
- Specialized in bottleneck analysis identifying and resolving performance impediments to ensure optimal operation.

Experience

KGiSL

Associate

May 2023 - Present (1 year 6 months)

Coimbatore, Tamil Nadu, India

Projects Worked:

CholaMS, ACDNIC, KClaims, NSURE, WPP

Responsibilities:

- Prepared JMeter scripts based on business requirements for web and web services testing.
 - Enhanced scripts through correlation, transaction checkpoints, parameterization, and integration of Java code for logic implementation in BeanShell processors.
 - Conducted a range of tests, including baseline, load, stress, and endurance, to rigorously evaluate application performance under various conditions.
 - Performed distributed load testing using JMeter to simulate real-world usage and assess application performance.
 - Identified performance bottlenecks during load testing to pinpoint and resolve scalability issues.
 - Conducted API load testing for machine learning models to ensure performance under heavy traffic.
 - Executed end-to-end load tests with machine learning models deployed in the pipeline, evaluating the entire system's performance.
 - Monitored server performance issues using Dynatrace, and collaborated with relevant teams for timely resolution.
 - Compiled the final test report, incorporating both client-side and server-side metrics to provide a comprehensive performance overview.
-
- Preparing Vugen Scripts based on Business requirement using web HTTP/HTML protocol for Front End Testing.
 - Enhancing Vugen scripts Like Correlating the Scripts, applying Transaction Check Points, and Parameterization.
 - Conducting the different types of tests against application such as baseline, load, stress, and endurance testing based on the requirements.
 - Executing the Scenarios in Controller.
 - Finding the performance bottlenecks while during the execution of load tests.
 - Have a look into the Performance Metrics such as CPU and memory Utilization for analyzing.
 - Preparing the final test report which includes client-side and server-side metrics.

Accubits Technologies Inc
Performance Engineer
August 2022 - April 2023 (9 months)
Thiruvananthapuram, Kerala, India

Projects Worked:

Turbocclaim, CGG, VOWCHERS, Sondr-Socha, AceNage

Responsibilities:

- Prepared JMeter scripts based on business requirements for web and web services testing.
- Enhanced scripts through correlation, transaction checkpoints, parameterization, and integration of Java code for logic implementation in BeanShell processors.
- Conducted a range of tests, including baseline, load, stress, and endurance, to rigorously evaluate application performance under various conditions.
- Performed distributed load testing using JMeter to simulate real-world usage and assess application performance.
- Identified performance bottlenecks during load testing to pinpoint and resolve scalability issues.
- Conducted API load testing for machine learning models to ensure performance under heavy traffic.
- Executed end-to-end load tests with machine learning models deployed in the pipeline, evaluating the entire system's performance.
- Monitored server performance issues using Dynatrace, and collaborated with relevant teams for timely resolution.
- Compiled the final test report, incorporating both client-side and server-side metrics to provide a comprehensive performance overview.

kCube Consultancy Services (P) Ltd
Junior Test Analyst
March 2021 - August 2022 (1 year 6 months)
Chennai, Tamil Nadu, India

Projects Worked:

TBG, CHS

Responsibilities:

- Preparing JMeter Scripts based on Business Requirements for Web and Web services scripts.
- Enhancing the prepared scripts by Correlating the Scripts, applying Transaction Check Points, doing

Parameterization and with java code (implementing some logics in Beanshell processor).

- Integrated Grafana with influx DB data source to monitor the client side metrics while running the test in non-GUI mode.
- Conducting the different types of tests against application like baseline, benchmark load, stress, and endurance testing based on the requirements.
- Executing Performance Testing by distributed load testing using JMeter.
- Finding the performance bottlenecks while during the execution of load tests.
- Preparing the final test report which includes client-side metrics.

S Square solution

System Admin

September 2018 - January 2020 (1 year 5 months)

Chennai

Education

Acharya Institutes

Bachelor of Computer Application , BCA · (June 2015 - June 2018)

St. Antonys Matriculation Higher Secondary School

HSLC, Mathematical Biology · (2014 - 2015)
