

About Me

Versatile QA Engineer with 2 years and 6 months of experience in manual and automation testing, proficient in modern web technologies, programming and scripting. Skilled in testing mobile and web applications and APIs. Adept at working with applications, developing test frameworks, and ensuring seamless integration in Agile environments.

Key Skills

- **Performance Testing Tool :** JMeter, Learning LoadRunner
- **API Testing & Performance:** REST, SOAP, Postman
- **Database Testing:** Basic SQL.
- **Scripting & Programming:** JMeter Beanshell Scripting.
- **Recording JMeter Tests:** Manualy, Blazemeter
- **Test Management Tools :** Jira,

Additional Skills

- **Programming Language:** Basic Java
- **Data Visualization Tools:** Power BI (Desktop, Power Query, DAX, Service)
- **Other Tools:** Microsoft Excel (Pivot Tables, Advanced Functions)
- **Soft Skills:** Effective Communication, Team Collaboration, Problem-Solving

PROFESSIONAL EXPERIENCE

QA Engineer |Gavs Technologies (APR 2022 - Sept2024)

- Conducted end-to-end testing of ecommerce websites and mobile applications to ensure their functionality, usability, and compatibility across different browsers and devices.
- Developed and executed manual and automated test scripts, including functional, regression, performance, and security tests, using tools such as Selenium.
- Performed data validation and verification of various e-commerce transactions, including order placement, payment processing, shipping, and returns.
- Conducted usability testing to evaluate the user experience, interface design, and navigation flow of e-commerce platforms, providing actionable feedback for improvements.
- Identified performance bottlenecks by analyzing response time, throughput, and error rates.
- Worked closely with the quality assurance team to continuously improve testing methodologies, tools, and processes, ensuring efficient and effective testing practices.
- Led API testing using Postman and RESTful API validation using RestAssured.
- Configured CI/CD pipeline using Jenkins.
- Validating the Marketplace Application to ensure the custodian is receiving their email notifications.
- Performance testing using JMeter.
- Collaborated with developers and DevOps teams to ensure seamless and defect-free releases.

Education

Bachelor of Electronics and Communication Engineering

Anna University, 2017-2021

CGPA: 8.1
