

AKHIL PORWAL

Performance Engineer

+919462312262 @aporwal1997@gmail.com
https://www.linkedin.com/in/akhil-porwal/ Indore, Madhya Pradesh

SUMMARY

Passionate and results-driven Test Engineer with 3 years of experience specializing in Performance Testing. Skilled in understanding user requirements, developing test cases, creating automation scripts, performing load, stress, regression testing, debugging automation code, and delivering comprehensive reports. Experienced with JMeter, LoadRunner, Selenium, Java, Postman, and Rest Assured. Possesses a strong understanding of Software Testing methodologies, including test management, defect management, test analysis, and reporting. Hands-on experience with CI/CD tools and Microservices-based applications in Cloud Platforms and thriving in Agile development environments.

PROFESSIONAL EXPERIENCE

Performance Test Engineer 06/2021 - Present
Infosys Indore, Madhya Pradesh

- Spearheaded performance testing initiatives across multiple projects using tools such as LoadRunner, JMeter, and Gatling to evaluate application scalability and stability under varying load conditions.
- Designed and executed load, spike, stress, regression tests benchmarking system performance resulting in the identification and resolution of performance bottlenecks.
- Leveraged Rest Assured and Postman for comprehensive API testing, ensuring seamless integration and functionality across diverse systems and platforms.
- Conducted thorough analysis of performance test results using tools like Splunk and AppDynamics, pinpointing performance issues, root causes, and optimization opportunities.
- Collaborated closely with development teams to implement performance enhancements including code refactoring, database optimization, and caching strategies resulting in substantial improvements in application responsiveness and throughput.
- Actively participated in Agile ceremonies including sprint planning and daily stand-ups to synchronize performance testing activities with project timelines and priorities ensuring prompt delivery of high-quality software.
- Orchestrated the integration of performance testing into the CI/CD pipeline alongside cross-functional teams, utilizing tools such as Jenkins and Git, enabling continuous performance validation and early detection of regressions.

EDUCATION

Bachelor of Technology, Computer Science 2016 - 2020
Rajasthan Technical University Kota, Rajasthan

INTERNSHIP

Web Developer Intern 06/2020 - 03/2021

Delhi Digital Company

- Utilized HTML, CSS, and JavaScript to create interactive and visually appealing responsive front-end interfaces to enhance user engagement and experience.
- Implemented dynamic website features using server-side scripting languages such as PHP and Java to ensure efficient data processing.
- Improved website performance through optimization techniques, resulting in faster loading times for users.
- Supported the implementation of SEO best practices, optimizing web content and structure to improve search engine rankings and visibility.

SKILLS

Tools/Technologies

LoadRunner · JMeter · Selenium · Java ·
Gatling · Postman · Rest Assured · SQL ·
Fiddler · Performance Center · JProfiler ·
ALM · Splunk · AppDynamics · Git ·
Jenkins · Kafka · Jira · Agile · CI/CD

CERTIFICATIONS

- ★ **Software Development Engineer in Test**
Infosys Limited
- ★ **Cloud Digital Leader**
Google Cloud
- ★ **Java Basics & Advanced**
Hacker Rank

ACHIEVEMENTS

Performance Bottleneck Identification

Identified and resolved performance bottlenecks using JMeter and LoadRunner

Improved Test Coverage

Improved and efficient automation test case coverage

Reduced Time

Enhanced regression test suites, resulting in reduced time and cost

Established Metrics

Established quality assurance metrics and reporting mechanisms leading to improved project status insights.
