

AMAR MISHRA

Test Architect

📍 Mumbai, MAHARASHTRA, IN

☎ +91 9833283415

✉ amar.mishra06@gmail.com

🌐 linkedin.com/in/amar-mishra-25132520a

Skills

Programming Skills and SCM

Java, Git, GitHub and GitLab, Linux

UI Automation Testing

Selenium, Cucumber and TestNG

API Automation Testing

Soap UI, Rest Assured, TestNG, Postman and Newman

DevOps Tools

Jenkins, Docker, SONAR and AWS-EC2, RDS, IAM, Code Commit, Code Pipeline, Linux Azure DevOps

Test Management

JIRA, Zephyr, HP-ALM

Performance Testing

JMeter, Blazemeter

Software Development

Agile – Scrum Methodologies, and Testing

Achievements

- ISTQB Certified Engineer
- Reduce the testing effort by 40% and help developers and testers get quick feedback for the regression suite.
- Involved in Setting up the CI-CT-CD Jenkins pipeline
- Advanced Software Engineering Certification in Cloud IOT and Blockchain from IIT Madras
- ISTQB Advanced Level (CTAL-TA)
- ISTQB Foundation

Summary

- 15 years of rich experience in Product Testing, Web Application Testing, Agile methodologies, Test Automation, Performance Testing framework development, and delivering results.
- Experience in diversified domains like Treasury management, Banking, Human Capital Management (HCM), Payroll, Investment Banking, Transportation, Publications and media, Manufacturing, E-learning, Marketing Resources Management (Aprimo) and Insurance.
- Passion for quality in engineering processes, ability to quickly understand and adopt new technologies.
- Aggressive and Ability to work in a **fast-paced environment that includes an aggressive release schedule.**
- Extensive experience in designing and developing test automation frameworks for Web Applications and RESTful API Automation.
- Expertise in web application automation using **Selenium (WebDriver, Core Java, TestNG, Page Factory, Maven) and RESTful API Automation using Rest Assured and Postman.**
- Adept in defining work load models for Performance Testing of Web and Mobile applications.
- Expertise in Performance Testing of Web Applications, Mobile Applications and APIs using Apache JMeter as a performance testing tool.
- Adept in End-to-End software testing from **Requirement analysis, Strategy and planning, Effort estimation, Test Design and Execution, and Defect management.**
- Strong knowledge of Unix platform, RDBMS(MySQL/SQL Server/Oracle)
- Experience with Test/defect Management tools like Jira, QC (QC 10 and ALM both), and Zephyr.
- Professional expertise in Smoke Testing, backed-end Testing, Black-Box Testing, User Acceptance Testing (UAT), Functional Testing, Cross Browser/ Cross Platform Testing
- Proven record of working successfully as a team lead, team player and individual contributor.
- Conducted interviews for recruitment as per team and organizational needs.
- Mentored **Junior QA**

Currently: Actively Exploring System Architecture, Micro Services and Cloud Services on AWS

Work experience

2022-10 -

Test Architect

2023-09

Citi Corp Services (I) Pvt Ltd Pune

Project: GDP (Web API UI, Mobile)

Roles and Responsibilities :

- Reviewed the Product backlog, Functional Specifications Document, and Technical documentation.
- Conducted Database testing using SQL queries to validate data.
- Act as an interface between Business Stakeholders and IT Implementation teams
- Ensured that all the **automation processes were done in accordance with the standards and best practices**
- Performed various testing strategies like Regression testing, Integration testing, System testing, Compatibility testing
- Planning **Git Strategy for the CI/CD and for Automation Testing team.**
- Created Test Automation Framework from Scratch which performs **UI, API Testing, and DB verification.**
- Create EOD status reports for the team and keep stakeholders apprised of the latest status/risks
- Created a Jenkins CI/CD pipeline for faster release of the application.
- Defects are tracked and reviewed by JIRA.
- Provide go-live, post-go-live, and business support.
- Mentored Junior QA

Achievements:

- Zero Defect Rollout for major projects

Other Projects

- Created Open Source Automation Framework for performing API and UI Tests
- Continuous Testing Plan using Postman and Jenkins

Education

BE (Computer Science) from Burdwan University in 2004

2014-07 -
2022-10

Associate Test Lead

NEC Software Solutions, Mumbai, IN

Project: MoorePay-Zellis (Web API UI), Metrolinx, Hargreaves Lansdown, PSA

Roles and Responsibilities :

- Reviewed the Product backlog, Functional Specifications Document, and Technical documentation.
- Conducted Database testing using SQL queries to validate data.
- Act as an interface between Business Stakeholders and IT Implementation teams
- Ensured that all the automation processes were done is in accordance with the standards and best practices
- Performed various testing strategies like Regression testing, Integration testing, System testing, Compatibility testing
- Planning Git Strategy for the CI/CD and for Automation Testing team.
- Created Test Automation Framework from Scratch which performs UI, API Testing, and DB verification.
- Create EOD status reports for the team and keep stakeholders apprised of the latest status/risks
- Created a Jenkins CI/CD pipeline for faster release of the application.
- Defects are tracked and reviewed in JIRA.
- Provide go-live, post-go-live, and business support.
- Mentored Junior QA

Achievements:

- Reduce the testing effort by 40% and help developers and testers get quick feedback for the regression suite.

Technologies Used :

- Gitlab, Java, Maven, Selenium WebDriver, Rest Assured, TestNG, Hamcrest Postman, Newman, JMeter, Jenkins, Azure Devops, JIRA, CI/CD Pipeline, Manual Exploratory Testing.

2008-11 -
2014-06

Senior Consultant

Capgemini India Pvt Ltd Mumbai, Mumbai, IN

Project: BMW Motors, Aprimo, AMIG

Roles and Responsibilities:

- Created Test Automation Framework from Scratch which performs API Testing.
- Involved in Mobile Automation testing.
- Act as an interface between Business Stakeholders and IT Implementation teams.
- Automation of Regression and Smoke Suite and verification of API requests with Rest Assured, cucumber and Java.
- Involved in SIT plan with hype and Omni teams Create EOD status reports for the team and keep stakeholders apprised of latest status/risks.
- Created a Jenkins pipeline for running the automated tests.
- Involved in Jenkins Master Slave Architecture Creation on AWS

Technologies Used:

Rest Assured, Postman, Java, Jenkins, Docker, AWS, JIRA, Cucumber

2007-04 -
2008-11

Test Engineer

LionBridge Technologies, Mumbai, IN

Roles and Responsibilities:

- Performing Functional Testing on different Browser and Mobile OS
- Performing Cross Browser functional testing
- Involved in writing Test scenarios and Test Cases.
- Involved in testing the functionality based on test cases and coordinated with the development team in fixing the issues.
- Defects are tracked and reviewed by Jira.
- Publishing Test Completion report.

Technologies Used:

HP-ALM, Manual Testing, Mobile testing, Installation Testing, Device Testing.

2004-12 -
2006-06

Associate Engineer

3i-InfoTech Mumbai, Mumbai, IN

Roles and Responsibilities:

- Review Business Requirement
- Involved in writing Test scenarios and Test Cases.
- Involved in testing the functionality based on test cases and coordinated with the development team in fixing the issues.
- Defects are tracked and reviewed by Jira.
- Publishing Test Completion report.
- Create EOD status reports for the team and keep stakeholders apprised of the latest status/risks.

Technology Used:

HP-QC, Manual Testing
