

Amutha Selvaraj

QA Test Manager

Mobile: +91 9444061625 | E-Mail: sramutha@gmail.com

PROFILE SUMMARY

Accomplished QA Test Manager with over 15 years of experience leading automation strategies and overseeing high-revenue, mission-critical projects. Proven track record of designing and managing robust automation frameworks, handling large-scale testing teams, and optimizing CI/CD pipelines for continuous testing using Azure DevOps. Expertise spans across industries such as Banking & Financial Services (BFSI), Healthcare, and Automotive.

Skilled in driving end-to-end testing processes, framework development, and team leadership. Adept at aligning testing strategies with business goals, managing stakeholders, and enhancing software quality, resulting in reduced testing costs and accelerated delivery timelines.

Led manual testing efforts alongside automation projects, ensuring comprehensive test coverage and thorough validation of functional and non-functional requirements. Integrated manual testing processes within CI/CD pipelines for continuous testing, enhancing collaboration between manual and automated testing teams. Oversaw defect tracking and resolution processes in manual testing,

CORE COMPETENCIES

- **Automation Testing Strategy & Framework Design**
- **Test Automation Management**
- **CI/CD Pipeline Integration (Azure DevOps)**
- **Project Planning & Execution**
- **Stakeholder & Vendor Management**
- **Cloud Infrastructure (Azure)**
- **Team Leadership & Development**
- **API Automation (Postman, Rest API)**
- **Defect Management & Quality Assurance**
- **Agile & Scrum Methodologies**
- **AI Engineering Integration**

CERTIFICATIONS

- **Tosca Certified Automation Specialist Level 1 (AS1)**
- **Tosca Certified Automation Specialist Level 2 (AS2)**
- **HP UFT & QC Certified Tester**

- **Oracle & D2K Certified (Anna University, India)**
- **Workshop on AI Engineering**

TECHNICAL SKILLS

- **Automation Tools:** TOSCA, UFT, TestComplete
- **CI/CD & DevOps:** Azure DevOps, Jenkins, Bitbucket, XRAY
- **Platforms:** Web Applications, Salesforce, Desktop Applications
- **API Automation:** Postman, Rest API
- **Languages:** JavaScript, VB Script
- **Defect Tracking Tools:** JIRA, ALM, Octane, Quality Center

PROFESSIONAL EXPERIENCE

QA Test Automation Manager

LTIMindtree, Chennai, India (Dec 2023 – Present)

(Payroll Company: Primus Global Technologies)

QA Automation Associate Manager

Accenture Solutions Pvt Ltd, Chennai, India (Nov 2013 – Jun 2023)

Test Automation Consultant

HCL Technologies, Chennai, India (Jan 2010 – Jun 2011)

Test Automation Engineer

Standard Chartered Bank, Chennai, India (Dec 2006 – Dec 2009)

EDUCATION

Master of Computer Applications (M.C.A.) in Computer Science

PROFESSIONAL PROJECTS

Halliburton Energy Services (LTIMindtree)

- Established and managed offshore automation and manual testing teams, ensuring smooth delivery and quality control.
- Led test automation initiatives using TOSCA, UFT, and Azure DevOps Pipelines, achieving improved test efficiency and quicker project cycles.
- Spearheaded designing and implementing a scalable Test Automation Framework using TOSCA and UFT, integrated with Azure DevOps Pipelines.

- Enhanced test coverage by 50% and reduced release cycle times by automating testing processes, leading to faster and more reliable software deployments.
- Streamlined CI/CD pipeline integration, enabling continuous testing and effective collaboration between development and operations teams.

SFDC Bon Secours Mercy Health (Accenture)

- Developed automation strategies for a Salesforce-based application using UFT and Azure DevOps, enhancing test effectiveness and reducing release times.
- Managed collaboration between onshore and offshore teams, integrating CI/CD pipelines for continuous integration and delivery.
- Led the development and management of automation testing frameworks across BFSI and Healthcare domains, significantly improving release efficiency.
- Automated regression and system testing using UFT and TestComplete, integrated with Azure DevOps, reducing manual efforts by 40%.
- Directed large onshore and offshore teams, ensuring seamless collaboration and timely project delivery.
- Managed defect tracking, reporting processes, and stakeholder communication via JIRA/XRAY and Azure DevOps, ensuring real-time project status visibility.

Wealth Outlook Management, Bank of America (Accenture)

- Directed a 40-member testing team and led automation efforts using UFT and Azure DevOps pipelines, significantly optimizing test execution.
- Ensured successful coordination between testing teams and stakeholders to meet critical project deadlines.

CBA First Net, Commonwealth Bank of Australia (HCL Technologies)

- Established and managed an independent testing team, automating testing with UFT and integrating it with ALM for efficient test execution and reporting.
- Designed and implemented test automation frameworks to enhance application testing efficiency and reduce manual intervention.
- Collaborated with development teams to integrate automated tests into CI/CD pipelines, improving continuous testing processes.

EBBS (Core banking Application), Standard Chartered Bank

- Developed and executed a detailed automation test plan using UFT, ensuring maximum test coverage and process efficiency.
- Developed and executed automated test plans for key banking applications using UFT, ensuring comprehensive test coverage and improved application stability.
- Worked closely with QA and development teams to troubleshoot and resolve issues, leading to successful project deliveries. Documented test procedures and results, providing key insights to stakeholders and supporting data-driven decision-making.
