SUMMARY

Highly motivated and results-oriented IT professional with over 15 years of progressive experience in Software Testing, encompassing 7 years of successful Project/Program Management leadership.

Proven ability to lead and manage all aspects of the Software Development Lifecycle (SDLC), with a strong focus on quality assurance and process improvement.

Strong understanding of business requirements and ability to translate them into effective testing strategies and data-driven insights.

Seeking to leverage my analytical and problem-solving skills to transition into a Data Analysis role.

Possesses a strong foundation in data analysis techniques and a desire to contribute to data-driven decision making.

SKILLS

Software Testing: Manual testing, Test Plans, Agile, Test automation, Selenium, Postman, REST API

Leadership & Project management: Planning, Scheduling, Team management.

Technical Skills: Database Testing (SQL Server), Selenium, CI/CD, Jira, ALM, Git, API Testing (Postman), Data Analytics, Excel Macro, Tableau, R programming, Python.

EXPERIENCE

CITICORP SERVICES INDIA PRIVATE LIMITED (CSIPL)

CHENNAI

Intermediate Risk Analyst

Jul 2022 to Jun 2024

- Performed QA and UAT for the CCAR 14A system, overseeing quarterly loss forecasting and stress testing for regulatory compliance, ensuring high- quality project outcomes
- Streamlined validation processes by 25% to 30%, slashing manual effort by automating tasks with Excel VBA Macros
- Spearheaded User Acceptance Testing (UAT), proactively managing and resolving testing issues.
- Delivered training to global users on new applications, enhancing user proficiency.
- Facilitated effective communication between DevOps and business teams to ensure project alignment.

COGNIZANT TECHNOLOGY SOLUTIONS

CHENNAI

Project Manager

Oct 2010 to Jun 2022

- Executed and prioritized test cases effectively. identified, reported, and tracked defects to ensure high-quality software delivery.
- Designed test reports to present to the leadership. Supervised team's training and development.

- Acquired domain business knowledge on investment banking, Credit Risk, Liquidity Risk and Payments systems
- Developed robust automation frameworks and test scripts using Robot Framework/Selenium
- Steered Database and API testing with Postman and performed SQL scripting for precise data validation.
- Established comprehensive Test Approaches, Strategies, and Project Plans to guide testing efforts.
- Managed multiple concurrent projects, optimizing resource allocation and project coordination.
- Developed robust automation frameworks and test scripts using Robot Framework/Selenium and integrated with CI/CD pipelines.
- Gained domain knowledge on payments systems, investment risk management systems, learning management systems and insurance

iGATE GLOBAL SOLUTIONS PRIVATE LTD.

BANGALORE

Senior Software Test Engineer

Apr 2010 to Oct 2010

- Led a team of 7 software test engineers in designing and executing comprehensive test plans to ensure the successful deployment of critical insurance applications
- Collaborated with cross-functional teams to identify and resolve software defects, leading to a 15% decrease in post-release issues

SYNTEL INDIA PRIVATE LTD.

PUNE/CHENNAI

Analyst Programmer

Jul 2007 to Apr 2010

- Performed functional and regression testing. database testing and ETL testing using Excel Macros
- Acquired domain knowledge on investment custodian and securities market

EDUCATION

MBA – ANALYTICS AND DATA SCIENCE

ONLINE

Manipal University, Jaipur

Sep 2023 to Sep 2025 (Pursuing)

BE – COMPUTER SCIENCE AND ENGINEERING

MADURAI

KLN College of IT, Anna University

Jul 2003 to Apr 2007

CERTIFICATIONS

- Scrum Alliance Certified “Certified Scrum Master (CSM)” (Valid till: 25-Apr-2026)
- ISTQB Certified associate for ‘Foundation’ and ‘Advanced – Test Manager’ levels.
- HP Certified associate for ‘Quality Center 9.2’ and ‘Quick Test Professional 9.2’ software

ADDITIONAL INFORMATION

- Best Team Award (Q3 2023) for automating most of the validations and significantly reducing time and manual effort at Citicorp Services India Private Limited (CSIPL)
- QE&A Pride of the Quarter Award (Q2 2016) for remarkable quality deliverables for the applications CLU, FACE, and LU at Cognizant Technology Solutions

PROJECT DETAILS:

Name of the Company	Designation	Client/Customer	Application Type	Team Size	Number of projects worked	Duration
Citicorp Services India Private Limited (CSIPL)	Intermediate Risk Analyst	Citi Bank	Web Based Applications	7	1	Jul'22 to Jun'24

OVERVIEW OF THE PROJECT:

CCAR 14A is an internal Regulatory Risk reporting system that analyses the quarterly loss/loan loss reserve forecasting and stress testing processes (CCAR, QMMF, Recovery Plan). It is downstream system where data flows from multiple upstream systems like CECL, Ruby, Pearl for global portfolios. The data collected are processed, calculated using various formulas and final regulatory submission reports such as Balance Sheet, Income Statement and Profit and Loss statement are generated.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Assisted the Program manager and worked with business users to gather business requirements, coordinate approval for Business Requirement Documents (BRD)
- Assisted Business Analysts to create the correct requirements in Jira and coordinated to track the releases.
- Provided risk management support for delivery of regulatory solutions
- Developed and maintained project plans, test approach, identified resource needs, and managed project schedule
- Identified areas of improvement in BAU and increased process efficiency through process simplification and automation using excel VBA Macros.
- Ensured the project discussion with DevOps on a timely basis and communication with Business on daily basis
- Ensured completion of “User acceptance testing” (UAT) on assigned risk solutions and proactively mitigated and managed testing and project issues
- Performed data analysis to monitor and track data quality and ensured completeness of data using Tableau reports
- Preparation of status reports by gathering, analyzing, and summarizing relevant information
- Ensure end-to-end completion of project and hand-over to business within specified budget and timeline
- Responsible for Requirements analysis, Test Estimation, Test Plan and UAT scripts preparation.
- Have automated repetitive validations in Excel using excel macros thereby reducing the validation effort to 2 hours from 3 days.
- Maintained existing UI Automation scripts in Selenium Java
- Trained the global users on using the CCAR14 A application.
- All release-based projects were completed on time without any major post-production bugs.
- Responsible for execution and tracking of regression suite test cases for each release.
- Conducted knowledge sharing sessions across the project teams for each release and maintained the lessons learnt log

Name of the Company	Designation	Client/Customer	Application Type	Team Size	Number of projects worked	Duration
---------------------	-------------	-----------------	------------------	-----------	---------------------------	----------

Cognizant Technology Solutions	Project Manager	Royal Bank of Canada	Desktop and Web Based Applications	25	5	Feb' 15 to Jun'22
--------------------------------	-----------------	----------------------	------------------------------------	----	---	-------------------

OVERVIEW OF THE PROJECTS:

- RBCQTS 'ATS' is an Absence Tracking System of all employees of RBC including the various contract workers. ATS is a robust GUI where the vacation, mandatory, working from home and similar absence types are recorded. ATS UI can be accessed by employees, managers and admin for respective functionalities.
- RBCQTS 'DOA' is a delegation system where authorities/financial constraints are delegated to the direct reports by Manager.
- RBCCM RefData 'BDR (Book Data Repository)' provides a central management of books across all Capital Markets businesses as an authoritative source. BDR's robust control processes around book life cycle management benefits all relevant Capital Markets stakeholders. BDR is the master repository for book data for RBCCM.
- RBCCM RefData Fenergo-CM is a KYC (Know Your Customer) application where every client's KYC is validated before submitting the client into the Client Data Repository or CDR.
- RBCCM trading credit risk has multiple applications to manage its trading operations. The applications 'FACE', 'CLU' and 'Limit Updater' are used to set the limit for different type of counterparties and countries. 'FACE' is the upstream application of the entire Trading suite and 'CLU or Credit Limit Updater' & 'Limit Updater' are the automated applications to process the limit details from the 3rd party upstream system called CCMS into FACE. CLU is a web-based GUI that process the Primary client details into FACE and Limit Updater is a windows-based GUI that process the Secondary client details into FACE.

ROLES AND RESPONSIBILITIES IN THE PROJECTS:

- *Developed Automation framework, designed automation test scripts for ATS and DOA applications using Robot Framework/Selenium*
- *Maintained existing regression Automation scripts using Robot Framework/Selenium for CLU application*
- As a Test Lead, responsible for handling multiple projects simultaneously and managing different resources handling different applications under same portfolio and assisting the project manager on management activities.
- Responsible for Requirements analysis, Test Estimation, Test Plan and RTM (Requirements Traceability Matrix) preparation.
- Manual **Functional testing, Database testing and Automation testing** of multiple applications
- Performs SQL scripting to validate data updates from GUI. Also verify the UI reports reconciliation with DB data.
- Execute **Unix** .sh jobs to start/stop server and analyze the log files on UI failures. Have experience in validating the files in Unix server and compare them after uploaded to DB.
- Performing **API Testing** using **Postman** for testing request/response between different applications
- Ability to handle multiple application releases simultaneously
- The scripts are stored in **SVN/GIT** and build is triggered from **Jenkins** for every sprint release
- All release-based projects were completed on time without any major post-production bugs.
- Responsible for execution and tracking of regression suite test cases for each release.
- Directly interacted with client reported daily status of project(s).
- Conducted knowledge sharing sessions across the project teams for each release
- Involved in interviewing and selecting the right candidates who will be part of team as per client's expectations and requirements.
- Involved in preparing project status deck on Monthly basis to show case the different project status, highlights, innovations and automation ROI to the client.

Name of the Company	Designation	Client/Customer	Application Type	Team Size	Number of projects worked	Duration
Cognizant Technology Solutions	Associate	Western Union Business Solutions	Desktop and Web Based Applications	60	5	Sep' 11 to Feb'15

OVERVIEW OF THE PROJECTS:

- **Legal Entity Name Change (LENC)** – Verified the legal entity name changes from Ruesch in all the client applications.
- **Rebranding** – Verified the changes in the Logo, domain and email addresses in all the modules and screens of the client applications.
- **WUIB-France Changes** – Verified the changes implement for the France processing center in all the client applications.
- **New EMEA Processing Centers** – Verified all the client applications after implementation of 3 new processing centers 'Norway', 'Sweden' and 'Poland' and 2 new offices 'Austria' and 'Germany'.
- **New Currency Code (CNH)** – Verified the interfacing applications and client applications after implementation of new currency Chinese Renminbi (CNH)
- **Malaysian Processing Center** - Verified all the client applications after implementation of Malaysia processing center.
- **Two Factor Authentication (Phase 1 and Phase 2)** – Verified the front-end client facing application after implementing Two-Factor Authentication for user logins.
- **CWB Settlement Report** - Verified the CWB report data on daily basis by placing different order types with different status according to the action performed on the order.
- **Western Union R2** – Verified WU websites in various mobile screens and iPad screens using mobile test lab.
- **NAFI Fixes Phase 3** – Verified the application changes implemented to address migration gaps and enhance key system areas that added significant value to the products/services offered by client.
- **Fenics Rate File** - Verified if the data in the file is same as the data available in the database table. Using SQL queries, the data from the tables are pulled as a single result in an excel sheet and using Excel formulas the comparison was performed with the generated file data.
- **GP UI Refresh (Browser Compatibility Testing- Phase 1 and Phase 2)** - The changes implemented in the front-end applications were verified across 7 browsers and 3 OS combinations for usability, accessibility and GUI.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Responsible for Requirements analysis and Test Scenario preparation.
- Responsible for Test Estimation, Test Plan and RTM (Requirements Traceability Matrix) preparation.
- Responsible for Test cases design and Test execution using the test management tool 'Quality Center 9.2'
- Defect analysis and tracking using WUBS Jira (internal tool of client).
- Preparation of Test Summary Report and Project dashboard at end of each release.
- All release-based projects were completed on time without any major post-production bugs.

- Responsible for execution and tracking of regression suite test cases for each release.
- Performed multiple browser testing, functional testing, database testing and mobile testing.
- Acted as Testing Lead handling multiple projects simultaneously.
- Directly interacted with client reported daily status of project(s).
- Conducted knowledge sharing sessions across the project teams for each release
- Creating and tracking of the sub-project in C2.0 from project creation till closure.

Name of the Company	Designation	Client/Customer	Application Type	Team Size	Number of projects worked	Duration
Cognizant Technology Solutions	Programmer Analyst	Travelers Insurance	Desktop Applications	25	1	Oct' 10 to Jun'11

OVERVIEW OF THE PROJECT:

Bond Polaris - The project is to test the various enhancements that are to be implemented quarterly or half-yearly basis. The SRs or Support Requirements document is provided by the client for each and every enhancement where in one release have 10 to 18 such SRs. The tester's responsibility is to design and test the Polaris application for these enhancements.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Responsible for Requirements analysis and Test Scenario preparation.
- Responsible for Test cases design and Test execution of each SRs.
- Defect analysis and tracking.
- Daily status reporting to onsite POC.

Name of the Company	Designation	Client/Customer	Application Type	Team Size	Number of projects worked	Duration
iGATE Global Solutions	Senior Software Test Engineer	Royal Bank of Canada	Desktop Applications	12	1	Apr' 10 to Oct'10

OVERVIEW OF THE PROJECT:

- **Annual Statements Ingenium** - The project is to test the generation of the 'Universal Life' (UL) policy statements. A policy statement is generated either automatically through a batch job or manually. Verified each of the policy statements for each and every field values and formats.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Responsible for requirements analysis and Test Decision Tree preparation
- Responsible for Test Data and Test Scenario preparation
- Test design, Test execution and Defect tracking using the test management tool 'Quality Center 9.2'
- Daily Status reporting to Onsite SPOC
- Responsible for preparing daily metrics for the entire project team members
- Acted as test lead managing 2 resources
- Performed Functional and Integration Testing types.

Name of the Company	Designation	Client/Customer	Application Type	Team Size	Number of projects worked	Duration
Syntel India Limited	Analyst Programmer	State Street Corporation	Desktop and Web Based Applications	14	6	Feb' 08 to Apr'10

OVERVIEW OF THE PROJECTS:

- **InTrader** – Verified the InTrader application for any functional changes and also verified the interfacing application performing regression testing.
- **Money Market Order Management System (MMOMS)** – Verified both the intranet and internet front end client applications by placing various money market orders and verification of the order flows from front end to back-end system.
- **Share Point Service Pack2 Installation** – The Share point server is customized according to the specifications of State Street and the functional testing is done to confirm whether the customization was as expected.
- **Funds Transfer Pricing (FTP)** – The project is to test the flow of data from the extracts received from various source systems to the database table and also between the tables and to test the various reports generated from these tables. The flow contains logics that have been implemented and the testing is done to make sure that these logics are implemented as expected.
- **E-Learning Management (ELM)** – Verified the E-Learning Management (ELM) PeopleSoft application of State Street Corporation for managers and employee self-services modules.
- **CSO Central Compliance Suite** - Verified the web-based client applications that provide accesses and privileges to employees in various departments by administrators.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Responsible for Requirements analysis and Test Scenario preparation.
- Responsible for Test Plan and RTM (Requirements Traceability Matrix) preparation.
- Responsible for Test cases design and Test execution using the test management tool 'Quality Center 9.2'
- Defect analysis and tracking in QC.
- Updating test cases suite for new changes/functionalities
- Performed Functional and regression testing of back-office system along with interfacing applications.
- Performed Database Testing in Oracle DB using TOAD
- Performed extract testing using Excel Macro and there by validating the data flow from one schema to other schemas in the database.
- Directly interacted with client reported daily status of project(s).
- Conducted knowledge sharing sessions for new team members.
- As a SAS70 coordinator, maintaining the various project documents adhering to SAS70
- Managing tasks of the team members using the tool 'EQUIP' and preparing Metrics QA analysis report on a monthly basis
- Preparing Weekly Status Report (WSR) that covers the number of defects identified plus the progress of testing

AWARDS & APPRECIATIONS:

- 'Best Performer in the offshore QA team' - Given by Sr.Vice Presidents Rajeev Agarwal and Leigh Weston, State Street on June 2009.

- 'Extra Mile Award' for Q1 2010 – Given by the Client 'State Street'.

Name of the Company	Designation	Client/Customer	Application Type	Team Size	Number of projects worked	Duration
Syntel India Limited	Analyst Programmer	American Express	Web Based Applications	25	1	Sep' 07 to Feb'08

OVERVIEW OF THE PROJECT:

Amex International Redesign – Verified the websites of Amex for EMEA and UK regions for usability, accessibility and GUI.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Performed UAT functional and regression testing.
- Responsible for Test execution and defects reporting using 'Quality Center 9.2'
