Objective Seeking a Quality Assurance role to utilize my experience in manual and automated testing methodologies. Having a broad understanding of SDLC and STLC to contribute to a team-oriented environment focused on delivering exceptional software products. Proven ability to identify and document software defects, ensuring high-quality releases.

Experience **Amazon** **7th March 2022 – Present**

Designed and executed test plans for various software projects, ensuring comprehensive coverage of functionalities and user stories. Performed different testing methodologies, including regression testing, smoke testing, usability testing, and compatibility testing. Identified and reported bugs using bug tracking systems Jira, providing clear descriptions, steps to reproduce, and expected behavior. Collaborated with developers to understand bugs, suggest fixes, and retest after implementation and Documented test cases and maintained test suites for future reference.

Projects – Fire OS and Amazon Astro

Skills	Java Selenium	Manual Testing IDE-Eclipse	Automation Testing API Testing
---------------	------------------	-------------------------------	-----------------------------------
