- Coordinated project support activities to leverage the workload and reduce delivery timelines according to SLA.
- Utilized data analysis techniques to assess **SLA** metrics, identifying areas for optimization and improvement in functionality.
- Define requirements, evaluate and onboard vendor platforms.

### Junior System Engineer, Chennai

- Provided troubleshooting for internal and external users while working on help desk.
- Collaborated with Technical Support team members to properly manage customer inquiries and escalate when appropriate Managed customer expectations regarding estimated response times for issue resolution, met SLAs like response and resolution times by partnering with **L2**, and **L3** teams within the organization
- Provide senior level technical guidance and serve as an escalation point for engineering and Security teams.
- Specialized in data cleaning, modeling, and analysis to drive data-driven decision-making. Identified project requirements by meeting with IT managers; identified weaknesses in operations.

### Traning System Engineer, Chennai

- Installing and configuring: Installing and configuring operating systems, application software, and system management tools
- Troubleshooting: Troubleshooting and resolving technical issues when they arise
- Designing and implementing: Designing and implementing systems and tools
- Maintaining: Maintaining an existing system, upgrading hardware, and performing system upgrades
- Managing: Managing backup and recovery, and monitoring and capacity planning for servers
- Testing: Testing and repairing system faults
- Implementing: Implementing best practices for system security and data backups
- Automating: Automating tasks for production environments
- Assembled, cleaned and organized large datasets, improving data accuracy and reducing analysis time.
- Executed tasks effectively and efficiently,resulting in increase in departmental productivity.
- Specialized in data cleaning, modeling, and analysis to drive data-driven decision-making.

## Skills

Data Analysis |Data Mining |Predictive & Statistical Modelling| Data Visualization |Process Improvement | Exploratory Data Analysis(EDA) |Data Visualization | Business Analysis|Customer Service |Data Science | Forecasting | Documentation |Reporting & Compliance | Requirements Gathering | Problem-solving|Insighs Delivery | KPI Identification |Time Management| Communication Skills| Technical Support|Incident Management|Critical Thinking| Organizational skills

## Technical Skills

- **Tools/Languages:** Python(NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn)
- **Database:** MySQL, NoSQL (**MongoDB:** Querying,Aggregation,Text Search)
- **Web/Application Servers:** Power BI,Tableau, MS Excel(Adv),Power Query, MS Word, MS Power Point, Postman,Slack ,Jira
- **Support Tools:** Zoho SDP On Demand (Project Management, Risk Assessment ,ITSM)
- **Operating System:** Mac & Windows

## Key Projects

### Data Analysis And Data Visualization :

- Domain: Retail | Sales Analysis of Gani Time | Tech Stack: Excel, Data Visualization
- Steps involved: Data Cleaning, Data Processing and Data Visualization using pivot tables and pivot charts. Key Findings: Created a dashboard, found the target areas and created insights for the business owner.

## Training & Certifications

- Python Certification
- Data Analytics Using Pandas
- Chatgpt for Everyone
- Lean Six Sigma Yellow Belt
- Accenture Data Analytics and Visualization Virtual Internship
- PwC Switzerland Power BI Virtual Internship
