

Bhuvaneswari M

9840091992 | mailbhuhems@gmail.com | Chennai, TN ,IN

Experienced QA professional with over 10 years of expertise in software testing, including manual and automated testing across the software development lifecycle. Skilled in reviewing and analyzing system specifications, executing comprehensive test scripts, and providing detailed defect reports to development teams. Proficient in creating and enhancing test cases and experienced in regression, and systems integration testing.

Core Competencies:

- **Test Automation:** Implementing and maintaining automation frameworks with Playwright -Java script runner , ensuring robust test coverage.
- **Quality Engineering:** Applying quality engineering principles throughout the lifecycle to identify defects, design flaws, and improve software quality.
- **Cross-Functional Collaboration:** Working closely with development teams to ensure thorough testing and alignment with functional specifications.
- **Continuous Improvement:** Driving test automation strategies and improving testing infrastructure to enhance delivery speed and product quality.

Experience

Kriyadocs

QA Lead | May-2024-April-2025

- Led QA initiatives for product analysis, regression suite design, and the implementation of scalable automation frameworks using Playwright with JavaScript, ensuring efficient test execution and maintainability.
- Designed framework and test data management for a prompt Engineering project with 90% accuracy in test coverage and prompt responses.
- Oversaw customer impact assessments, defined risk-based automation strategies, and conducted Root Cause Analysis (RCA) for production incidents to drive continuous quality improvements.
- Managed and mentored QA team members, streamlined testing processes, and implemented automation practices that reduced manual effort and improved overall test coverage to 80% and release confidence.

Kriyadocs

QA Lead Contractor | April-2024-May-2024

- Engaged in a one-month contract role focused on **analysing new product offerings** and identifying functional and technical gaps in alignment with business requirements.
- Assessed and refined the **incident management process** to support efficient product support during early adoption phases.
- Conducted **incident trend analysis** and coached the customer support team on best practices for handling and escalating product-related issues.

Accenture Solutions Private Limited

Associate manager quality Engineering | Nov-2014-Dec-2023

- Over 9 years of experience in QA and test automation, with a strong focus on delivering high-quality software through efficient test strategies, automation frameworks, and Agile practices.
- Led the preparation of release plans, project estimations, QA dashboards, and governance reports. Conducted detailed Root Cause Analysis (RCA) to identify recurring issues and drive continuous quality improvements.
- Extensive hands-on experience in test automation using **Selenium WebDriver** and **Karate framework**, ensuring robust regression coverage and efficient sprint-level test automation.
- Developed and maintained automation scripts using **Playwright with JavaScript** for lightweight web applications, aligning with modern web testing practices.
- Successfully managed multiple sprint releases, contributed to **Agile Release Trains (ART)**, and provided reliable sprint story estimations to optimize team velocity and Agile delivery timelines.
- Expertise in **automation strategy development**, **risk-based testing**, and QA metrics analysis, including **Agile QA burn down charts**, to ensure timely and high-quality sprint deliverables.
- Collaborated with cross-functional teams including developers, product owners, and DevOps to streamline CI/CD pipelines and integrate test automation, significantly improving deployment efficiency.
- Championed QA process improvements and automation adoption across teams, mentoring junior testers and driving standardization of testing practices across projects.

Polaris software labs

System Engineer | July-2007-Nov-2011.

- Administered and maintained 10+ Unix servers, ensuring consistent performance and availability across production environments.
- Conducted regular middleware health checks and supported WebSphere administration for 5+ high-impact enterprise projects.
- Configured data sources and deployed WebSphere clusters to support scalable and resilient application architectures.
- Created and managed IBM MQ queues based on project requirements and automation scripts, enhancing message flow reliability.
- Monitored and managed SLA compliance for service desk tickets, ensuring timely issue resolution and stakeholder satisfaction.

Technical Skills

Playwright JavaScript, Selenium, Postman API Testing, Project Management, Azure, Azure pipeline, Jenkins, Microservices.

Education

- Post Graduate Diploma in Cloud computing – Great Learning-Jan 2020 to Sept 2020
- MBA Marketing – Pondicherry University-June 2006 to May 2008

- BE EEE – Rajalakshmi Engineering College-August 2001 to May 2005
