Professional Scrum Master™

Technical Lead (MCA), PSM™ with Carrier spanning 17 years', on Automation/Manual Testing | API | Web UI Testing | Performance Testing | Manual | AWS Cloud | DevOps | Agile Methodologies | Team handling | Mobile Testing | API testing|

Seeking to be Automation specialist/Automation architect/QA Manager/Senior automation engineer /Banking/ Insurance & Services Sector

PROFILE SUMMARY

- ✓ 17 years of experience in Testing(Manual and Automation)
- ✓ Team management skill, around 10 years of experience for team handling
- ✓ 7years of experience as scrum lead.
- ✓ Architected and built Automation framework from scratch using automaton tools **QTP** for desktop application(M5)
- ✓ Architected and built Automation framework from scratch using automaton tools **Test Complete/Test Execute** for desktop/Web application (Test Flow/OTDR native application)
- ✓ Architected and built Automation cucumber framework from scratch using automaton tools **NodeJS/Axios** for API testing
- ✓ Architected and built Automation cucumber framework from scratch using automaton tools **Selenium WebDriver**
- ✓ Architected and built Automation framework from scratch using performance tool **K6** for Exchange Application.
- ✓ Architected BDD Frameworks using cucumber and created **CI/CD Pipeline in Azure and Gitlab**.
- ✓ Extensive knowledge of automation tool for desktop application **UFT, Test Complete**
- ✓ Extensive knowledge of automation tool for web based application **Selenium web driver, WebdriverIO, Protractor, Cypress**
- ✓ Extensive knowledge of API automation tool **NodeJS/Axios, Postman**
- ✓ Extensive knowledge of Performance automation tool **JMeter,K6**
- ✓ Extensive knowledge of scripting language **Java script, VB script, Python, J ava, NodeJS**
- ✓ Experience in Data monitoring tools like **Zabbix and Grafana**
- ✓ Experience in ALM tools like **QC, JIRA, GitLab and Azure Boards**
- ✓ Experience in Waterfall, Agile, **Scrum methodologies**
- ✓ Experience in DevOps essential tools like Docker (Virtualized the servers), **GIT, Grafana**
- ✓ Expertise in requirement study and gap analysis for new or existing features/cross-functioning use cases and regression test (Manual, Automation). Reliable and Hardworking Team player

NOTEWORTHY CONTRIBUTIONS AND PROFESSIONAL EXPERIENCE

Technical Lead @EXFO: (NASDAQ: EXFO, INC): July 2015- Present

- ✓ Managing automation/manual team of 12 individuals.
- ✓ Architected and developed automation framework using NodeJS/Axios/postman and Cucumber framework for API tests.
- ✓ Architected and developed automation framework UI framework using Selenium Webdiver with NodeJS and TestComplete with Java Script.
- ✓ Created performance suit using K6 with cucumber framework and integrated in pipeline.
- ✓ Created Giytlab/Azure CI/CD pipeline.
- ✓ Involve in automation script development.
- ✓ Involve in automation script review.
- ✓ Coordinating with different teams to identify and resolve dependencies.
- ✓ Key responsibilities includes groom, train, mentor and lead them.
- ✓ Involved in root cause analysis for defects and perform automation feasibility for them.
- ✓ Involve script implementation.

Principal QA @EXFO: (NASDAQ: EXFO, INC.): June 2011-July 2015

- ✓ Architected and developed automation framework using Selenium WebDriver with Java Script.
- ✓ Architected and developed automation framework using QTP with VB Script.
- ✓ Managed team of 7 members.
- ✓ Created performance suit using Jmeter and integrated in pipeline (Run based schedule)
- ✓ Review scripts
- ✓ Guide team and help them when they needed.
- ✓ Review manual test cases
- ✓ Test case selection for automation.
- ✓ Release plan
- ✓ Manage manual testing
- ✓ Involve script implementation.

Sr QA Eng. @EXFO: (NASDAQ: EXFO, INC.): Sept. 2009-June 2011

- ✓ Created postman suits for API testing
- ✓ Created WebDriverIO Automation suite for Angular web page testing.
- ✓ Created Test strategy and Test plan documents
- ✓ Involved in design and development of hybrid automation framework using Test Complete for desktop based application M5
- ✓ Analysis of test requirement and automation feasibility. Automation Test.
- ✓ Involve script implementation.
- ✓ Involve manual testing.

QA Eng. @Netahwk : Nov. 2006- Sept. 2009

- ✓ Created the detailed test plan and test cases from the requirements documents and meetings
- ✓ Involve in manual testing Created Test strategy and Test plan documents
- ✓ Identified test scenarios, estimated effort, and created test plans and maintained regression test suite and other testing scenarios
- ✓ Conducted Unit Testing, Integration Testing and System Testing.
- ✓ Identifying feasible non-functional test cases for Performance testing
- ✓ Managed cross-functional teams and achieved performance objectives and Quality.

CAREER PROGRESSION:

Designation	Organization	Location	Period
Technical Lead	EXFO	Pune	July 2015-Till date
Principal QA	EXFO	Pune	June 2011-July 2015
Sr. QA	NetHawk	Bhubaneswar	Sept. 2009-June 2011
QA	NetHawk	Bhubaneswar	Nov. 2006- Sept. 2009

SCHOLASTICS

Course/Certification	Result
Professional Scrum Master (PSM™)	Pass
Master in computer application (MCA, Sambal Pur)	Pass (70%)

TECHNICAL SKILLS SET

- ✓ **Automation Tools:** Selenium WebDriver, UFT, Test Complete, Protractor, WebDriverIO, Cypress
- ✓ **API Automation tool:** Postman, NodeJS/Axios.
- ✓ **Performance Testing Tool:** JMeter, K6
- ✓ **Languages:** JavaScript, VB script, Java, python, NodeJS
- ✓ **Test Management:** JIRA, ALM
- ✓ **Frameworks:** BDD (Cucumber), TDD, Page Object Model (POM), Hybrid Frameworks
- ✓ **CI/CD:** GitLab, Azure
- ✓ **Cloud Platforms:** AWS
- ✓ **Databases:** MySQL, MongoDB
- ✓ **Performance Testing Tool:** JMeter, K6
- ✓ **Performance monitoring tool:** Grafana
- ✓ **Version Control:** Git, SVN
- ✓ **Agile Tool:** GDE & JIRA
- ✓ **Testing / Automation Tool:** EAST, Wireshark, M5

SIGNIFICANT ACHIEVEMENTS:

- **Achieved 90% test coverage** by implementing a hybrid automation framework, reducing the need for manual testing by 60% and improving the overall software quality
 - **Reduced regression testing time by 70%** through the introduction of an automated test suite using Selenium WebDriver and cucumber, UFT, Test Complete, NodeJS/Axiox enabling faster product releases.
 - Improved Continuous Integration/Continuous Deployment (CI/CD)
 - Integrated performance test suit in pipeline.
