Skills

- Java
- Selenium
- Cypress
- MS Azure Devops
- Cucumber
- TestNG
- JUnit
- Postman
- Rest API
- SQL
- JDBC
- Jenkins
- Agile/Scrum
- Git/Github
- Jira
- Javascript
- X-Ray

Professional Summary

- Highly motivated and result-oriented Software Test Automation Engineer/QA Engineer with 10+ years of IT experience through Manual and Automation Testing of web-based applications (4 years), System Administrator (2 years) and IT Department Manager (5 years).
- Solid experience with **Java, Selenium, Cypress, Cucumber, JUnit, TestNG, Maven, RestAssured, Postman, SQL, JDBC, Javascript, Jira, X-Ray, MS Azure Devops**
- Ability to design and develop Test Automation Framework from scratch based on Page Object Model (POM) design pattern using **Gherkin** and **Cucumber BDD** and also work with **Cypress** framework for both **UI** and **API** testing.
- Comprehensive experience in analyzing, designing and implementing of QA testing strategies for web-based applications.
- Proficiency in performing Software Testing such as **Functional Testing, Smoke Testing, Regression Testing, Front-end** and **Back-end Testing**.
- Extensive experience in preparing Test Strategies, Test Scenarios, Test Cases, and Test Scripts based on User and System Requirements Documentation.
- Proficient in using **Jira** as a task/bug tracking tool and for reports. Follow **Monday.com** for teams' daily/weekly test results, performance results, roadmaps and other activities. **X-Ray** as a test management tool.
- With solid knowledge and comprehension of **Agile/Scrum** Methodology, experience in all aspects of **SDLC** (Software Development Life Cycle) and **STLC** (Software Testing Life Cycle).
- Knowledge of **Microsoft Azure DevOps** and **Azure Services** for monitoring, logging, deployment, repos, SQL management etc. and managing the boards as a system administrator.
- Developed **Restful API** Web Services using **Postman** and **Rest Assured** Java Library with JUnit. Sending various JSON/XML requests and collected responses. Also automate **API** with **Cypress**
- Working knowledge of Database Testing using **JDBC** and **SQL** Queries in various Relational Database Management Systems (RDBMS) such as **PostgreSQL** and Oracle servers.
- Experienced in utilizing **Git** and **GitHub** for Version Control Systems.
- Great interaction with developers, managers and team members to coordinate job tasks and a strong commitment to work. Excellent communication and interpersonal skills.
- Quick learner, passionate about learning new skills, detail oriented and great team player.

Work Experience

Revenue.Ai (Netherlands) 10/22 - Present *QA Engineer*

- Executed the QA processes and maintained an exceptional level of quality, efficiency and effectiveness in the deliverables of each product and product update.
- Developed Test Cases and performed Manual Testing to learn more about both the technical and the user perspectives of the application in development to understand the whole problem.
- Proficient in using Cypress for end-to-end testing of web applications, including both UI and API testing.
- Skilled in manual API testing using Postman, including sending requests, inspecting responses, and troubleshooting issues.
- Coordinated teams with project owners to manage all releases and deployment processes. Performing all tests before and after deployment.
- Utilized Jira to document issues found during the test and development process, prioritized defects/tasks for resolution in coordination with the development team mapped the test cases with the uploaded requirements
- Created and shared daily status reports with the team and managers.
- Strong understanding of software testing principles and best practices, and able to apply them effectively
- Monitoring the logs in Azure services and database.
- Estimated and prioritized testing activities.
- Tested different artificial intelligent products in different channels(MS Teams, Whatsapp, Telegram and Platform)
- Manage all testing phases in UI, API and Database.

Custment (Nestbridge/McLean, VA,USA) 01/22 - 09/22 *SDET (Software Development Engineer in Test)*

- Developed Cucumber BDD test automation framework from scratch using Selenium WebDriver, JUnit, Maven, based on Page Object Model to improve the collaboration of all stakeholders and easily engaging in product development.
- Implemented Java, Selenium WebDriver to automate scenarios written in Gherkin syntax ensuring minimal manual intervention and code reusability.
- Created test scenarios, writing test cases Smoke, Functionality, Positive, Negative and Regression Testing.
- Conducted Agile Scrum ceremonies, implementing the roles & rules, and delivering their artifacts accordingly.
- Successfully generated HTML reports with detailed test steps and screenshots to improve test efficiency and maximize test coverage.
- Thorough experience in implementing Automation Tools Selenium WebDriver, JUnit, Git/GitHub, Jenkins, and RestAPI with Postman.
- Involved in implementing logging and tracking using Jira.
- Used Postman by sending CRUD request and verifying responses.
- Performed Rest API testing using REST Assured library and TestNG.
- Performed backend testing by writing complex SQL queries and using JDBC libraries ensuring the test coverage and finding defects effectively in the early stages of the product development.

Kuark Dijital

QA Tester

2020-2021

Great Master Auto

Manager - E-Commerce

2019-2020

Turkish Air Force

Lead Officer - Unix Administrator

2016-2018

Turkish Air Force

Officer - Information Technology

2011-2016

Turkish Air Force

Technician - Electronics Communication

2005-2011

Trainings & Certificates

ISTQB International Software Testing Qualification Board
