

Strategic professional with strong business acumen & proven track record of stamping success across the entire gamut in **Software Testing/ Software Quality Assurance.**

Location Preference: Chennai

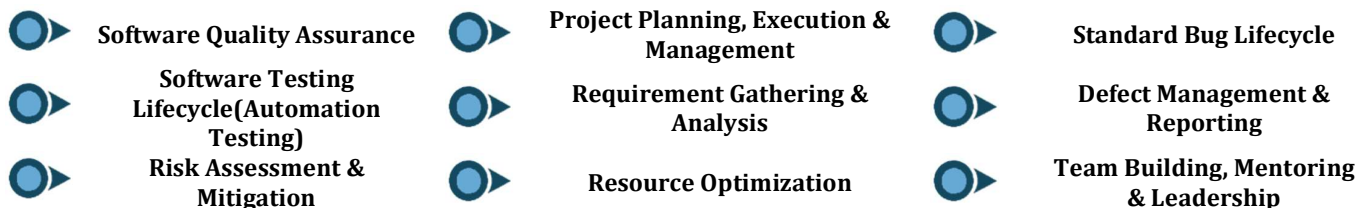

PROFILE SUMMARY

- **Offering expertise nearly 15 years with consistent track record of progression**, repeatedly achieving goals and producing immediate improvements
- Strong knowledge of **SDLC & Defect Lifecycle**; technical expertise in managing ATLC entailing scripting, analyzing & implementing test scripts, test cases, test plans, test processes, defect reporting, bug tracking and report generation of different applications / products
- Hands-on experience in setting automation framework using, UFT, Selenium, identifying test cases, design & implementation of Selenium WebDriver automation framework for smoke and regression test suites (TestNG & Maven), Core Java, browser compatibility for testing
- Drove the centralization of Quality Assurance (QA) services, tools and infrastructure; established specialist practices in test automation testing by instituting standard frameworks in line with industry best practices
- Spearheaded the **test requirement analysis**, test design, test execution and led the test strategy and test plan for all projects; **competitor analysis, non-functional test analysis and customer scenario analysis** was done effectively for all projects
- Expertise in Testing Artifacts -**Test Strategy, Test Plans, Test Scenarios, Test Case, Test Data, Defect Report and Test Metrics**
- Developed & maintained Test frameworks to provide maximum automation coverage of any complex feature by following shift left approach with excellence in **Web, Windows, Mainframe, Java, API Testing & many more with various open-source tools**
- Conducted testing activities to ensure quality & functionality of assigned systems; ensured timely and accurate test communication to Development Leads, Project Manager & Senior Management throughout the project lifecycle
- Provided insightful knowledge of business process analysis (As-Is, To-Be) and design; managed application based **process re-engineering, process optimization, cost control & revenue maximization from technical solutions**
- Achieved **QA operational objectives** by contributing information and analysis to strategic plans and reviews; proficient in **end-to-end software testing** from requirement analysis to system study, designing, coding testing and de-bugging
- Re-oriented **IT Service Management** methodologies to ensure improved focus on functional expertise and delivery of business critical services
- **Tactical & articulate** in managing STLC entailing scripting, analyzing & implementing test scripts, test cases, test processes, defect reporting, bug tracking and report generation of different applications / products
- **Proven Acumen** in implementing organizational test processes that improved interactions among external vendors, product development, release engineering, product support, product management & IT
- Established the quality assurance program including general criteria for system reviews, a software metrics and measurement program that included software quality, estimation, benchmarking, productivity & risk analysis for software delivery
- Gained exposure in developing, maintaining, testing & releasing solutions, possess capabilities in delivery management focusing on maximizing customer satisfaction, process compliance and software quality

CORE COMPETENCIES

SOFT SKILLS

EDUCATION

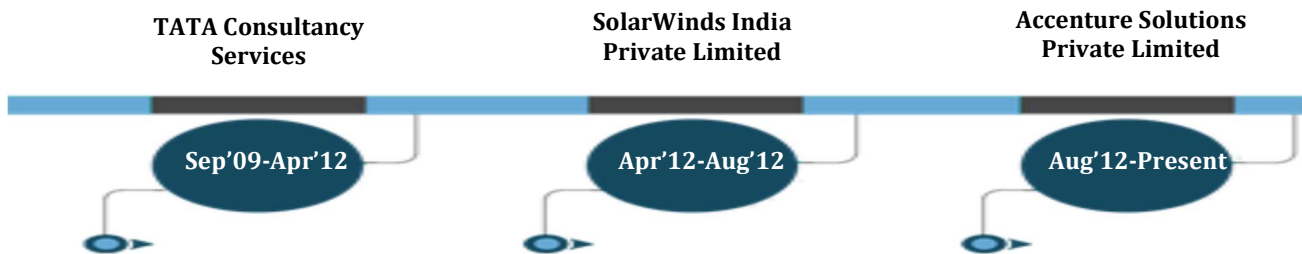

2009: M.E.(Computer Science & Engineering) from Thiagarajar College of Engineering, Anna University
2005: B.Tech.(IT) from Adhiparasakthi Engineering College, Anna University

CERTIFICATIONS

- HP Accredited Integration Specialist
 - AIS: HP Quality Centre 10.0 (March-2011)
 - AIS: HP Quick Test Professional 10.0 (November-2010)
- ISTQB Foundation-(CTFL, Aug-2017)

CAREER TIMELINE (recent 3)

WORK EXPERIENCE

Aug'12-Present: Accenture Solutions Private Limited as Quality Engineering Associate Manager

Apr'12-Aug'12: SolarWinds India Private Limited as Senior QA Engineer

Sep'09-Apr'12: TATA Consultancy Services as Test Automation Engineer

Roles:

- Engaging in Test Management (Test Strategy, Approach, Planning, Execution and Defect Management, Reporting) using tools ALM/Jira/RTC/Blueprint/Confluence/ SharePoint
- Conducting feasibility study, implemented test automation framework/solutions for regression, sanity and progression test cases based on ROI calculated; conducting defect review meeting to review the defects and ensuring that all required defects are addressed as per customer acceptance
- Implementing automation scripts for test data creations, support tools which helps the team to reduce the manual effort and improve the test effectiveness
- Defining and implementing the **Key Performance Indicators (KPIs)** of the Testing Team within the organization; supervising the assignments of off-site testing
- Leading demos/walkthroughs/retrospection for various test deliverable including automation
- Automating suitable test cases using UFT scripts; maintaining various **Automation Framework (UFT/Selenium)**; performing code optimization for the existing scripts
- Tracking defects & documenting defects review with risk assessment on deferred defects; establishing, implementing, and improving QA infrastructure, test procedures, process, and quality standards in accordance with overall development and product releases
- Managing a line of business consisted of 46 members; managing release level test design/execution/automation delivery for **12K volume** of test cases and maintaining the agreed SLAs/KPIs
- Acting as knowledge recipient for automation at onshore (US, China), creating many understanding documents; providing knowledge transfer to the offshore team across LOBs
- Administering requirements gathering, collation of project functional and technical requirements; following with clients throughout the project lifecycle to ensure full understanding of needs and concerns; attending the conference calls and participating in daily meetings
- Participating in design & code reviews with excellent debugging skills, measures and analyses code for quality v Designing, developing & maintaining list of risks, requirements, deliverables & budgets for projects
- Reviewing test scripts to ensure testing efficiency & code coverage including assisting programmers in resolution of any problems
- Identifying improvement areas and implementing adequate measures to maximize client satisfaction level; improving future test processes by adopting lessons learnt and best practices
- Supporting the process of preparing proposals, responding to **RFP / RFQ**, business presentations to clients, resource planning, architecture evaluation, technical direction, effort estimation, tracking, risk management, audit, status reporting and mentoring
- Leading the QA team, reviewing the SOW, preparing the project plan, test strategy, test plan and all other project documentation
- Performing sprint planning and tracking the sprint; helping team implement CI/CD practices; coordinating with Product Team to keep the product and backlog live and aligned as per organization targets
- Tracking the complete change requests delivery closely with the client's project teams on a regular basis to provide seamless support
- Analyzing training needs of the team members and delivering the required trainings within the team on different business functions and technologies, thereby enhancing the productivity
- Performing requirement analysis and close the gaps, if there are any; developing test cases and converting them into test automation scripts to verify the functionalities that are getting added in every sprint
- Revamping the testing methodology and process, achieving improved execution efficiency which improves scalability and contributed to customer satisfaction scores

Highlights:

- Successfully Implemented a PI (Process Improvement) project, "Reducing the data sheet preparation effort by implementing data build scripts" following the PDCA process; implemented the same in the project and it saved up to 1200 USD / Regression Release

- Played key role in implementing “Hybrid Automation” which increases volume of test automation and supports “in-line” automation which was highly appreciated by clients which saved approx. 5000 USD/Release
- Increased regression automation penetration upto 82% in last project
- Enhanced Automation framework to support un-attended multi scenario execution
- Hands-free automation scripts implementation in un-attended mode

PROJECTS MANAGED

Customer: Blue Yonder, United States

Project: Blue Yonder – Release Quality QA

Domain: Supply Chain Management (Transportation Planning & Management)

Sep’23-Present

Customer: Nationwide Building Society, UK

Project: Nationwide Building Society – QL to Pega Migration

Domain: Financial Services (Mortgage)

Nov’22-Aug’23

Customer: CITI Bank, SG

Project: Citi Banking – APAC/EMEA Quality Assurance

Domain: Financial Services (Banking)

Aug’18-Nov’22

Customer: Qualcomm Inc. United States

Project: Qualcomm – Key Provisioning Systems QA (México-Monterrey)

Domain: Telecom (Semiconductors)

Jun’16-May’18

Customer: Cigna Healthcare, United States

Project: Cigna SSG QA (India-Chennai and México-Monterrey)

Domain: Healthcare (Group Insurance, Dental Insurance, Pharmacy)

Jun’14-May’16

Customer: British Telecommunications plc, UK

Project: British Telecom – XLOB Core Automation Team (BT GS, Retail, Operate, Openreach)

Domain: Telecom (Switching, Operation Support & Readiness, Fulfillment, Service Assurance / Revenue Assurance, Billing & Payments)

Aug’12-May’14

Project: Solarwinds – SAM (Server and Application Monitor)

Domain: Networking

Apr’12-Aug’12

Customer: British Telecommunications plc, UK

Project: British Telecom - Global Services/ Core Automation Team

Domain: Telecom (Switching, Operation Support & Readiness, Fulfillment, Service Assurance / Revenue Assurance, Billing & Payments)

Dec’09-Apr’12

TEACHING EXPERIENCE

Jan’06-Aug’07: Adhiparasakthi Engineering College as Lecturer

JOURNALS

- Published a paper titled “Robust Token Circulation Scheme for Mobile Ad-Hoc Networks” in International Journal of Computational Intelligence Research and Applications (IJCIRA) Vol:3, No:1, January-June 2009, pp 51-54
- Submitted a paper titled “A Cluster Based Reliable Token Circulation Scheme for Group Communication in MANET” to the “Arabian Journal for Science and Engineering” which was published by Springer Publication

TRAININGS PROVIDED

- Test Automation Using HP Unified Functional Testing (UFT)
- Test Automation for Beginners Using Selenium Web Driver
- Test Automation framework and Automation Testing

PERSONAL DETAILS

Date of Birth: 09th March 1984 | **Languages Known:** English & Tamil | **Address:** Chennai-600073, Tamil Nadu, India
