

SUMMARY

- 8.11 years of experience in Manual testing of Web, Android application domain and Android devices testing like Smart TV, OTT, Tablet, Mobile testing.
- Experienced in creating complete Test plan for a feature with SRS and User Stories. Defining and execution of Test Cases (Functional, Integration, Regression) to ensure application functionality.
- Expertise in requirements understanding, estimation, strategy, design, execution and defect management.
- Strong Experience in Manual, Mobile Application, Web and Device Testing.
- Experienced in Scrum Agile Methodology.
- Quick learner with good communication and written skills.
- Experienced in Gap Analysis of a feature and Review & Optimization of test cases.

DOMAIN EXPERIENCE

- Experienced in Manual, Mobile Application, Web, Device Testing.
- Experienced in Health care domain.
- Actively working on Web Application project.

TECHNICAL SKILLS

Skill Category	Skill Name	Level Of Expertise
Project Management	Agile Methodology, Jira, Testmo, TestLodge, TestRail, DA Console, Zoho Bug tracker	Expert
Office Tools	Excel, Power Point, Word	Expert
Databases and Data Management	MySQL	Beginner
Team workspace and collaboration tool	Confluence	Intermediate

tr.dhivya19@gmail.com

Bahwan Cybertek Technologies – DropThought

Start Date: April, 2021

End Date: Present

- Proficient in test case writing and test data preparation.
- Experienced in developing comprehensive test plans for features understanding the requirements based on User Stories .
- Skilled in developing test scenarios and test cases based on Use case documents.
- Proficient in Regression Testing, Black Box testing, Exploratory Testing, Integration Testing, Smoke Testing, Functional Testing, Application Testing, Performance Testing and Cross Browser Testing.
- Delivery of Testing from QA end for multiple software releases with quality on time.
- Ability in handling Defect reporting and Defect tracking.
- Managed QA deployment lifecycle via Jenkins within CI/CD pipelines, performing pre-and post-deployment validations and manual deployments across QA environments, post-production testing (smoke, sanity, UX, exploratory), and driving continuous improvement through log analysis and user feedback.
- Performed Gap Analysis of features following every release to ensure preventing bug leakage.
- Performed exploratory testing in Production environment after every release to analyse the user experience and provide actionable suggestions for better user experience.
- Reviewing and Optimizing test cases every 6 months to improve the test scope and arrest the bug leakage.
- Supported in leading and coordinating testing effort, timely deliverables, and status reporting and escalating issues to immediate leads.
- Led daily stand-ups to synchronize progress, resolve blockers, and enhance Agile collaboration.
- Analysed post-release defects, integrated customer-reported issues into test scenarios to improve system performance and usability.
- Participated in post-refinement discussions to align requirements and optimize development.
- Collaborated with developers in story-pointing discussions to assess testing efforts and refine estimates.
- Presented demos during User Acceptance Testing (UAT) and team meetings to validate requirements and align stakeholders.
- Actively collaborated with the product team to provide suggestions and enhance user experience for improved product usability.
- Performed RCA on issues using logs and API calls.
- Applied foundational skills in API testing using Postman to validate endpoints.

Auxo Technology Labs - CASCADE System Organization

Start Date: October, 2016

End Date: April, 2019

Skills and Responsibilities:

- Performed Web Testing and Mobile Application Testing.
- Tested the software against specified requirements with quality.
- Performed Build Acceptance Testing (BAT) when each new build and branch, ensuring readiness for further validation and seamless integration into the testing process.
- Involved in generating the test data and reported weekly status reports to the leads.
- Executed functional and non-functional testing, proactively identifying and reporting all encountered issues to ensure comprehensive quality assurance and product reliability.
- Played a key role during the critical time for on time delivery of the project.
- Expertise in development of Test cases, Test Scenarios, Test plans, Execution and Defect Management.
- Utilized RTM to ensure comprehensive test coverage, aligning test cases with requirements for optimal validation and quality assurance.
- Performed cross browser testing on Functional and Regression test plans.
- Performed Test case and Test suit review for Test case optimization.
- Took ownership in presenting Internal and Client Demos.
- Handled deadlines effectively and have given excellent outcomes.
- Enrolled in the decision making of new scenarios and enhancing the project development.

Amazon Development Centre - Kindle Fire (Phone, Tablet and Fire TV), Kindle E-reader

Start Date: June, 2013

End Date: August, 2015

Skills and Responsibilities:

- Performed Build Acceptance Testing.
- Performed Smoke testing, Regression testing, Functional and Non-functional on products.
- Involved in Globalization testing for an application in different languages and different format specifications.
- Involved in daily status and testing reports to immediate leads for team.
- Performed competitor performance benchmark testing.
- Involved in bug bashes and exploratory testing.
- Triaging bugs raised on Jira.
- Reported bugs and tracked them to closure.
- Performed OTA Testing across different versions of devices.
- Involved in updating the Test Data in wiki pages.
- Actively participate in Bug Bashes and reported critical bugs.
