OBJECTIVE

A skilled and detail-oriented Software Quality Analyst with **5 years of hands-on experience** in ensuring the quality of software products and seeking to leverage expertise in testing methodologies, automation tools, and problem-solving skills to contribute to the success of a dynamic software development team.

PROFILE SUMMARY

- Experience in **Manual Testing & Automation Testing** using **Selenium** with **5 years** of experience in the field of **IT**
- Expertise in Designing and executing the automation scripts using **Selenium**.
- Strong Experience in OOP's Concepts and **Java Programming**.
- Expertise in **BDD, TestNG, Page Object Model, Selenium, and Eclipse IDE**.
- Expertise in Generating Test Reports, Status Reports, and testing responsive web pages in various web browsers (Chrome, Firefox, and Safari)
- Hands-on experience in multiple frameworks like **TestNG Framework, BDD, Data Driven Framework, POM**
- Identifying Web Elements using different locator strategies (Good knowledge of writing unique CSS selectors and XPath).
- Hands-on experience in executing sanity, handling the verification & validation of specifications, designing traceability matrix & test case, and reporting defects and issues.
- Proficient in various types of Testing like **Functionality Testing, Smoke Testing, API Testing, and Regression Testing**.
- In-depth understanding of application analysis, test case creation, test script development, test execution, defect tracking, and reporting.
- Skilled in understanding Software Requirement Specifications and identifying all the possible scenarios. Involvement in **Test Planning & Estimation**. Well-versed with X Path **CSS, Documents Object Model (DOM), and XML**.
- Having Experience in **Rest Assured** Framework, **GET/PUT/PATCH/DELETE** as part of automation testing.
- Experience in analyzing Business Requirements and creating Test Plans, Test Cases, Test Scripts, and **Requirements Traceability Matrix** under manual testing. Experience in all phases of the Software Testing Life Cycle (**STLC**). Proficient in writing **SQL queries**.

EXPERIENCE DETAILS

ORGANISATION: SHELLSQUARE SOFTWARES PVT LTD

DURATION: OCT- 2022, to OCT - 2024

ORGANISATION: ZF WIND POWER COIMBATORE PVT LTD

DURATION: December - 2019 to August – 2022

PROJECT DETAILS

Company: SHELLSQUARE SOFTWARES

Designation: Software Quality Analyst

Project Name: Halliburton

Description:

Halliburton is **one of the world's largest providers of products, services, and integrated solutions for oil and gas exploration, development, and production**. Halliburton is an **American oil-field service, engineering, and construction company that operates worldwide**. It is a global leader in the so-called “**upstream**” oil industry (petroleum exploration and production). Company headquarters offices are in Houston, Texas, and Dubai, United Arab Emirates.

Roles and Responsibilities:

- Understanding requirement documents.
- Proficient in writing scripts in **Selenium WebDriver** using Java for automating web-based applications.
- Working with the Team to get clarification on issues found during requirement understanding. Prepared test scenarios and test cases based on requirements.
- Good knowledge of **Object-Oriented Programming (OOP)** concepts. Extensively used Java for test case automation.
- Involved in the Implementation of **Cucumber-BDD**. Experience in testing using Rest based on the Web Services.
- Having Experience in developing, Modifying, and Executing scripts. Actively involved in preparing Test Data for Framework.
- Involved in Implementation of project-specific Functions in Libraries.
- Involved in pushing, Pulling, Merge the source code and handling the conflicts from **GIT**. Learned app business requirements, technical specifications, installation, and guidelines. Wrote and executed test cases for major program modules
- Involved in test case execution and **Bug** reporting.
- Regression testing and generating reports using **Jenkins**.

Company: ZF WIND POWER COIMBATORE PVT LTD

Designation: Junior Test Engineer

Project Name: ZF Driveline

Description:

ZF Industrial Technology is a global leader in driveline and transmission technology for industrial application domains like Wind Power Technology, Off-Highway Systems, and Test Systems for on- and off-road mobility. Find more information under ZF Industrial Technology. The ZF Wind Power Business Unit is part of ZF group which is known as one of the world's leading automotive suppliers. Within our unit, we develop, validate, and service gear units used in wind turbines producing sustainable energy.

Roles and Responsibilities:

- Coordinated with peers in the team for clarity on the requirements.
- Drafted Test Plan which included testing objectives, testing phases, scenarios, and test environment after a thorough analysis of the business rules.
- Raise the defect and follow up the defect.
- Prepared test scripts using **Selenium Web driver** (Automation tool) and Java for functional test cases.
- Writing test cases for scenarios wherever not able to automate.
- Developed test scripts using Eclipse, IDE, and **TestNG framework**. Executed test scripts analyzing the reports and fixing the issues.
- Generating reports and analyzing them using **TestNG**.
- Maintaining Reusable methods.
- Actively participated in team meetings.
- Analysed test requirements and automation feasibility with Selenium Java using **TestNG**.
- Worked on **Parallel execution, Priority, cross browser testing using TestNG Environment, Java, Selenium WebDriver, Git**, and Eclipse.

Technical Skills

Programming Languages	Core Java
Tools and Utilities	Selenium WebDriver, GIT, Jenkins, JIRA, SQL, Azure DevOps
Framework	Cucumber, TestNG, JUnit, Page Object Model
Industry Domain	Oil and Gas, ZF Driveline

Languages

- English
- Tamil
- Malayalam

Declaration

I hereby declare that all the details furnished above are true to the best of my knowledge and belief.
