PRODUCT ENGINEER- SOFTWARE TESTING

Ph: +91 9677017386

Email: divyadharshini.mohan25@gmail.com

PROFESSIONAL SUMMARY

Experienced Product Engineer specializing in Software Testing. With over 2 years in Agile and Waterfall methodologies, I have successfully delivered solutions in the weighing scale manufacturing and product management domains. My expertise covers SDLC, project management, and improving processes, complemented by my strong communication skills and ability to collaborate with diverse teams to drive project success.

TECHNICAL SKILLS

- **Methodologies:** Agile (Scrum and Kanban), Waterfall, SDLC
 - **Project management:** Azure DevOps, Click up
 - **Testing tools:** Azure DevOps, Katalon Studio, SOAP UI, Swagger, Jmeter, Basics of Selenium , Internet Browsers, Mobile Emulators such as MeMU.
 - **Documentation & Presentation:** Microsoft Office, Figma, Wiki
 - **Collaboration & Data Visualization Tools:** Microsoft Teams
 - **Prototyping Tools:** Figma
 - **Database:** SQL
 - **Operating Systems:** Windows
 - **Languages:** Java, Python
-

WORK EXPERIENCE

Product Engineer- Quality Analyst
Marlensoft Pvt Ltd, Chennai

Sep 2022 - Present

- Handled the projects from the Kick-off beginning with outlining the business vision, objective, product roadmap, and a project release plan to the delivery and ensuring the on-time delivery with the quality.
- Led requirements gathering, backlog refinement, and sprint planning using Agile/Scrum methodologies.
- Managed project tasks, schedules, and coordination using Azure DevOps; ensured alignment with business goals.
- Enhanced process efficiency through automation (Katalon Studio), an Automation testing tool for Functional testing and browser compatibility testing and workflow improvements.
- Conducted UAT and successfully utilized Agile/Scrum methodology for requirements gathering and facilitated user stories workshops. Documented the User Stories and led Story Point discussions to assess project specifications and level of effort.
- Managed team tasks, schedules, and project coordination using Azure DevOps, ensuring efficient project management. Actively participated in meetings, technical discussions, reviews, and release planning, contributing to project success.
- Conducted Joint Application Development (JAD) sessions and maintained strong working relationships with various business groups and owners to prepare user stories effectively.
- Interacted with the clients in understanding their business requirements and converting the same into the functional scope in adherence to the product after a detailed system study and its impact analysis. Presented the Demos of the product with the key features to the clients and the prospects.

- Worked with the QA team to Identify the test strategy and create the test plans and test cases. Generated periodic peer review reports for project managers, facilitating continuous improvement and quality control.
- Performed Gap Analysis for the system and identified the features that must be incorporated within the system.
- Performed various kinds of testing such as Integration, System, Pre-production, and Sanity testing.
- Performed various techniques of testing such as Exploratory, Boundary Analysis, and security testing for basic security validation.

Environment: Agile/Scrum Methodology, Azure DevOps, Microsoft Office, MS Access, Microsoft Word, Microsoft Excel, Microsoft Teams.

SUMMARY OF PRODUCTS

FU portal: FU Portal is a web application serving as the interface to the SAGE OL (ERP system) for creating and managing calibration orders, thereby facilitating partner and customer relationships. A specialized tool for managing calibration schedules, tracking equipment qualifications, and ensuring accuracy and consistency in weighing operations.

DSS: The KERN turntable software serves to consolidate feedback on products, processes, etc. Here, feedback from customers on products and also feedback on processes and procedures at KERN are systematically recorded.

PDB (Product Data Bank): PDB is the CRM application that handles the entire product life cycle of the KERN products, which serves as a platform for tracking and managing product information throughout its lifecycle, ensuring data consistency and accuracy.

KERN Account & SSO: Single Sign-On (SSO) allows a user to access multiple KERN applications or systems with a single set of login credentials.

EDUCATION

Bachelor of Engineering- Computer Science and Engineering
An aggregate of **8.42** C.G.P.A.

Graduated by June 2022,
SKR Engineering College, Chennai

High School (+2)
An aggregate of **75.7%**

Graduated by April 2018,
Jaigopal Garodia MHSS, Chennai
