SUMMARY

Experienced professional with over 10 years of experience in IT, including 5 years as an ETL testing process specialist in Microsoft SQL, SSIS, JIRA, UNIX, ETL concepts and 7+ years of experience in knowledge on Authoring MS SQL queries. Known for designing, developing, and optimizing ETL workflows to enhance business intelligence and data warehousing solutions. Skilled at leveraging technical expertise and business acumen to deliver effective data integration solutions that align with organizational objectives. Proficient with determining storage requirements, assessing data situations, and collaborating with cross-functional teams to design datawarehousing systems to meet business needs.

PROFESSIONAL ACCOMPLISHMENTS

- Highly experienced IT professional with over 10 years in the industry and 5 years of focused expertise in ETL testing. Possesses a proven track record of performing ETL testing, manual testing, and database testing. Skilled in leveraging industry-standard tools and technologies including Oracle SQL, UNIX, SSIS, and possesses a deep understanding of ETL concepts.
- Senior Database Tester with 7.5 years of experience in MS SQL query development and manipulation. Proficient in joining tables and crafting comprehensive functional and integration test scripts. Possesses a strong understanding of functional and integration testing methodologies, and a proven ability to execute acceptance testing procedures.
- Provide in-person support to clients during User Acceptance Testing (UAT) phases. Actively participate in team meetings, delivering updates on work in progress (WIP), completed tasks, and identified issues/problems.
- Demonstrated expertise in designing ETL processes and constructing source-to-target data mappings. Proven proficiency in the entire ETL lifecycle, encompassing development, testing, and deployment of ETL solutions.
- Excellent Analysis, Problem solving and Communication skills.
- Conducting system integration and functional testing throughout the project in various Sprints.

TECHNICAL SKILLS

- | | | |
|--------------------|---|--|
| ▪ Reporting Tools | : | Power BI |
| ▪ Databases | : | Oracle, SQL SERVER, Snowflake |
| ▪ Tools | : | JIRA, Oracle SQL DEVELOPER 12c, SSIS, IICS (Informatica) |
| ▪ Languages | : | SQL, DAX, UNIX and Shell Scripting |
| ▪ Automation Tools | : | Re-Aim, Mule Soft |

WORK EXPERIENCE

- Senior Process Specialist Lead, RF Managed Services, Chennai | From January 2019 - September 2023
- Scheduling Analyst – Amdocs Development Center, Pune | From Dec'2016 - Sep'2018
- Senior System Operations Specialist, IBM India Pvt Ltd, Chennai | From Feb'2011 to Dec'2014.
- Mainframe Trainee, Arich InfoTech Pvt Ltd, Chennai | From Jan'2010 to Feb'2011.
- Senior Proof Reader, Horizon Technologies, Chennai | From Aug'2006 to Sep'2009

PROJECTS HANDLED

Project I

Domain : Investment Banking
Client : PGIM
Technologies : Oracle 10g/11g, UNIX
ETL Tools : SSIS, JIRA
Role : ETL Tester

Tasks Expertise:

- ⊕ Design and execute test cases to ensure accurate data extraction from various investment banking source systems. (trading platforms, market data feeds, customer relationship management systems).
- ⊕ Verify data transformations meet investment banking data quality standards (accuracy, completeness, consistency, timeliness). Test for specific data issues like incorrect pricing information or missing trade details.
- ⊕ Ensure data security and compliance with internal regulations related to financial data handling.
- ⊕ Validate the loading process to confirm clean and transformed data reaches the target data warehouse or data lake. Contributed to high-quality data in the data warehouse by writing SQL queries to extract data, developing testing procedures, and ensuring data integrity.
- ⊕ Analyze test results to identify data quality issues and errors in the ETL pipeline specific to investment banking data (e.g., duplicate transactions, incorrect pricing calculations).
- ⊕ Generate reports documenting test findings and recommendations for improvement, highlighting potential financial impacts of data quality issues.
- ⊕ Collaborate with investment banking analysts and business stakeholders to understand specific data needs and regulatory requirements
- ⊕ Participated in Scrum meeting and provided daily activity updates

Project II

Domain : Health care
Client : Coronis Health
Technologies : Oracle 10g/11g, UNIX
ETL Tools : SSIS, JIRA
Role : ETL Tester

Tasks Expertise:

- ⊕ Familiarity with core healthcare data entities like patients, diagnoses, medications, procedures, and claims.
- ⊕ Basic understanding of healthcare regulations like HIPAA (Health Insurance Portability and Accountability Act) that impact data privacy and security.
- ⊕ Design and execute test cases to ensure accurate data extraction from various healthcare source systems (electronic health records, claims systems, population health data).
- ⊕ Verify data transformations meet healthcare data quality standards (completeness, accuracy, consistency, timeliness).
- ⊕ Test for data security and privacy compliance with HIPAA regulations. Collaborate with healthcare data analysts and business stakeholders to understand data requirements.

- ☹ Collaborate with healthcare data analysts and business stakeholders to understand data requirements.
- ☹ Communicate test results effectively to developers and data engineers for troubleshooting.
- ☹ Participate in project meetings and discussions related to data quality and ETL processes.

ROLES AND RESPONSIBILITIES

- Develops comprehensive test cases by analyzing data mapping documents for source and target environments.
- Crafts ETL test scripts aligned with technical specifications and source-to-target data mappings.
- Performs SQL query testing to validate data integrity and database performance.
- Contributes to data quality assurance through activities like row count verification, sample data validation, and full data reconciliation.
- Possesses a strong grasp of Software Development Life Cycle (SDLC) methodologies.
- Firm understanding of data architecture and ETL workflows.
- Develops SQL queries to extract data from diverse databases and systems for comparison and analysis within the data warehouse.
- Develop and maintain test plan and test cases with associated test data based upon functional and non-functional requirements.
- Identify test automation opportunities to improve efficiency and effectiveness of test services.
- Contribute to test automation scripting standards and best practices.
- Designs and develops test cases for ETL mappings and supporting documentation to facilitate production support for built-in activities.
- Conducts thorough functional testing of complex ETL mappings, mapplets, and reusable transformations used in daily data loads. Possesses a strong understanding of Business Requirements Documents (BRDs) and Functional Specifications Documents (FSDs). Utilizes this knowledge to create comprehensive test plans and scenarios with relevant test data.

EDUCATION

- Anna University Bachelor's Degree in Information Technology (IT)

PERSONAL PARTICULARS

Name	:	B. Elavarasi
Sex	:	Female
Languages Known	:	English, Telugu and Tamil
Nationality	:	Indian
Marital Status	:	Married
Place	:	Chennai

DECLARATION: Hereby I declare that the above details are true to my knowledge and best of my belief.
