

EARAPU YOGESH

Performance Test Engineer | JMeter | LoadRunner | Dynatrace | Web Performance Testing

 yogeshherapu@gmail.com |  9003180530 |  linkedin.com/in/yogesh-earapu-175aa5157

Professional Summary

Performance Test Engineer with 3.4 years of hands-on experience in performance testing, engineering, and monitoring. Skilled in test planning, scripting, execution, analysis, and reporting using tools such as JMeter, LoadRunner, and Dynatrace. Experienced in identifying bottlenecks, validating non-functional requirements, and improving system performance in Agile environments.

Skills

- Performance Testing Tools: JMeter, LoadRunner, Performance Center
- Monitoring Tools: Dynatrace, Pandora FMS, OEM
- Protocols & Testing: HTTP/HTML, Web Services, UI Testing, Postman
- Testing Types: Load Testing, Stress Testing, Duration Testing, Capacity Testing
- Project Tools: ALM, LoadRunner Enterprise, JIRA, Agile
- Other Skills: Client Interaction, SLA Management, Test Strategy Documentation

Certifications

- Infosys Certified SPELL 100 Software Performance Engineering
- Infosys Certified JMeter Professional
- Infosys Certified Dynatrace Professional

Professional Experience

- Performance Test Engineer

Infosys | Client: Vanguard (April 2024 – Present)

- Collaborated with scrum and release teams to identify NFRs and define PT scope.
- Created performance test plans and business call flows.

- Developed and maintained scripts for critical user and API workflows.
- Designed workload models and executed tests using Performance Center.
- Analyzed results to detect bottlenecks, providing insights for optimization.
- Generated and shared Load Test Summary and Test Closure Reports.
- Used Dynatrace, Pandora FMS, and OEM for real-time resource monitoring.
- Validated application performance during peak load scenarios to ensure SLA compliance.
- Participated in daily stand-up meetings and sprint planning to align test activities.
- Conducted root cause analysis sessions post-test execution with dev and infra teams.
- Reviewed and optimized test scripts based on previous release learnings.

- Test Engineer

Infosys | Client: Northern Trust (Feb 2022– March 2024)

- Designed and executed performance test scripts using JMeter.
- Parameterized and correlated scripts; executed tests in Non-GUI mode.
- Analyzed DB performance using AWR reports and identified slow queries.
- Monitored app server performance via Dynatrace and created dashboards.
- Reported defects in JIRA; maintained test documentation in ALM.
- Prepared performance test strategy based on application architecture and business flows.
- Worked closely with developers to tune backend queries and improve response times.
- Supported system and UAT performance cycles by coordinating with QA leads.
- Conducted pre- and post-deployment performance comparisons.
- Documented known issues and lessons learned to improve future test cycles.

Education

Bachelor of Engineering – Mechanical Engineering (August 2016 -November 2020)

Panimalar Engineering College, Chennai

Achievements

- Received RISE INSTA Award for exceptional contributions and delivery excellence.
