

CAREER OBJECTIVE

With 4 years of industry experience, including 3 years specializing in Software Testing Life Cycle (STLC), I bring a proven track record as a Software Testing Specialist. Proficient in creating and executing robust test Scripts using TestNG, Selenium, and Cucumber, I am skilled in Behavior-Driven Development. Seeking an IT Tester role to leverage 2+ years of Automation testing expertise, I aim to contribute to a top-tier software testing team, undertake challenging projects, and drive quality assurance standards.

WORKING EXPERIENCE

Software Engineer (Testing and Implementation) at Cashlink Global Systems Pvt. Ltd. Aug 2021 - Present

Project: (Mobile Banking) - Azizi Bank

- Significantly contributed to the meticulous testing and seamless implementation of the MPay application, encompassing a wide range of functionalities including Customer Registration, Login/logout, QR Payment, User Profile Details, Wallet Transaction, Account Transaction, Bill Payments, Mobile Top-up, Favorite Transaction Add/Delete, User Referral Rewards, and Customer support.
- Employed proficiency in both Manual and Automation testing to meticulously craft, review, and execute test cases, ensuring a comprehensive evaluation of the software.
- Collaborated seamlessly with cross-functional teams to swiftly report defects and ensure their effective retesting, consistently upholding high-quality standards.
- Skillfully identified Regression Test Cases, playing a vital role in maintaining the continuous reliability of the software.

Project: Debit Card Management System at SIB, Atheyaman

- Played a pivotal role in the rigorous testing of the Debit Card Management System, which involved intricate functionalities such as User Management, Instant Card issuance, Personalized Card issuance, Card Management, and Reporting.
- Demonstrated meticulous attention to detail in preparing and scrutinizing both manual and automated test cases, methodically executing them to ensure an extensive testing coverage.
- Efficiently managed comprehensive test result records, utilizing Excel to maintain detailed tracking of testing outcomes.
- Exhibited expertise in promptly identifying and reporting defects, followed by thorough and systematic retesting to validate the resolution of the identified issues.

Past Experience

Technical support Engineer at Hifocus

Feb 2020 - June 2021

- I have conducted thorough testing on devices such as CCTV NVRs and IoT devices. Additionally, I have taken steps to ensure the latest firmware updates were applied to all relevant devices.
- Throughout this time, This also included configuring them with mobile devices running both Android and iOS, allowing for seamless live viewing and playback of videos..

EDUCATION

B.E in Electronics and Communication Engineering

2018

JEPPIAAR SRR Engineering College, Anna University | CGPA: 6.32

XII (HSC)

2014

Infant Jesus HSS | Percentage: 74%

SKILLS

- Software Testing Life Cycle (STLC)
- Defect Tracking and Reporting
- Comprehensive Test Case Development
- Debit Card Management
- ISO 8583 Message Format
- Automated Test Suite Creation
- Functional, Regression, and Smoke Testing
- TestNG Framework and Annotations
- XPath Expressions and Locators
- Behavior-Driven Development (BDD) with Cucumber
- Collaborative Teamwork
- Execute SQL Queries

Technical Skills:

- Programming Languages: Core Java
- Automation Tools: Selenium, WebDriver, Cucumber, TestNG, JUnit
- IDEs/Editors: Eclipse
- DataBase : SQL
- Operating Systems : Windows and Linux

ACCOLADES

- Recognized for meticulous defect tracking and reporting, ensuring streamlined collaboration among cross-functional teams.
- Commended for proficiently managing Debit Card Management and various Transaction types, showcasing deep understanding of ISO 8583 message format.
- Received praise for designing and executing comprehensive test cases, ensuring comprehensive coverage and thorough testing.
- Conduct thorough testing and debugging of EMV applications to ensure seamless performance and security..
- Applauded for skillful execution of Functional, Regression, and Integration testing using advanced automated scripts.
- Recognized for generating detailed automation reports through Extent Report, facilitating effective communication of test results.
- Highlighted for collaborative approach in executing Behavior-Driven Development (BDD) scenarios, fostering effective cross-functional teamwork.
- Noted for leveraging Selenium Grid to execute tests seamlessly across diverse browsers and operating systems.

DECLARATION

I solemnly declare that the information stated above is true, correct, and complete to the best of my knowledge and belief.
