

ABOUT ME

- 14yrs experience as Test Automation Architect & Automation management by providing Technical Leadership and Strategic Direction to the Testing Organization
- Hands-on current experience authoring, building and adopting large scale, cross-functional automation frameworks with well-balanced coverage across **Frontend (Java, Swing, Flex, Angular etc), Back-end (MQ, ETL's, XML, JSON, database, CSV etc**
- Deep understanding of different test automation approaches (**keyword-driven, Data-driven, BDD, hybrid**) and technology stacks (**Java, Angular JavaScript, Python etc.**)
- Ability and extensive practical experience with designing customized frameworks for Web, Desktop, DB and Web-service testing.
- Ability to define test automation metrics on productivity, coverage and efficiency.
- Experience in managing **Agile scrum teams** to Integrate test automation into **CI/CD** pipeline.

TOOLS

UFT, VB script, Java Selenium, Jemmy, JIRA, Confluence, GIT stash, Teamcity, AML, Jenkins, Gherkin, Test Complete, Cucumber, Behave, Info-basic

ACHEIVEMENTS

- TCCP certified for rich application & business knowledge in Internet Banking, CRM and Application upgrading process
- 85% faster regression cycles through optimized designs
- 95%-98% test coverage across application
- 48% increase in release frequency
- Implementation of Browser Stack (Mobile solutions)

INITIATIVES

- SME on automation projects
- India Campus Recruitment team (Campus recruitment and Training on Campus Workflow)
- Governance, Mentoring and Managing the buddy program for Graduates
- Technical Mentor for Grads

QUALIFICATIONS

- Pursuing ACC Certification from ICF (International Coach Federation)
- Bachelor of Information and Technology (B.Tech-IT) from Anna University, Chennai – 2002-2006

WORK HISTORY

Automation & Performance Manager | Bank of New York Mellon Technologies **Aug 2010 - Present**

- Leading the Automation and Performance horizontal across Wealth Management Technologies by providing Strategic and Technical direction.
- Responsible for end to end delivery (business analysis, workflow designing, automation approach review & signoff, JIRA mgmt., environment mgmt., code review & demo's with BA, Dev and Design authority, execution tracking, defect mgmt., risk mgmt. etc.) resource management, vendor management
- Currently managing 8 automation scrum team teams across Wealth to manifest towards DevOps transformation.
- Formulated automation Test Strategy for Wealth aligning towards organization's transformational goals of 80% automation and getting agile.
- Designed Strategic automation frameworks and code designs using BDD with comprehensive understanding of business requirements, system architecture and platforms.
- Designed automation framework for complex Trading platform, IBD system, Trade history, Statements and confirms to ensure the automation goals setup is delivered with quality and with enhance innovation.
- Training development team on BDD, Gherkin language and automation framework adaption
- Streamlining Performance testing scope, process and methodologies and applying automation.
- Setting up the automation team to meet automation goals by proposing fixed contract with vendor partnership
- Experience in creating proposal, evaluation and analysis of RFP from vendor
- Achieved 97% automation across Wealth and pershing team comprising of 5 major projects with around of 35K+ test cases, right from building a framework to integrating to CI pipeline.
- Improved efficiency and reduced test cycle by increasing automating test script execution by 85%.
- Test Data generator tool developed which saved 100% of manual efforts in test data creation for automation and performance

Technical Consultant | Temenos India Pvt Ltd **Jan 2007 - Aug 2010**

- As a technical Consultant worked on System Engineering Automated Testing (SEAT) Based infrastructure is available for the testing both technical and functional aspects of T24. While T24 Technical Testing performs a trace analysis to record I/O calls made, path length, warnings etc. For every transaction (Online & COB)
- The Overall objective is to build an Automated Testing System, Which helps to manage the testing inputs (scripts), setting -up and managing a library of test cases (SEAT Scripts) which can be injected on every T24build (any shipment from system Engineering)
- Involved in benchmark on each module wise and reported performance & locking contentions.
- Collaborate with QA team members, development, business analysts & lead/management in test planning & execution via meetings/calls/emails throughout the entire project life cycle

PROFESSIONAL ORGANIZATIONS

- BNY Mellon Aug ‘10 - Present
- Temenos India Pvt Ltd Jan ‘07 – Aug ‘10

AWARDS

- Spot Excellence – All-rounder award
- Spot Excellence – Delivery award
- GEM Award
- Best Employee Award
- Pat on the back Award

- VBA code to calculate testing ROI for all the application within QA, the ROI generated for applications is using a template ROI sheet with formula and input parameters
- Designed QTP scripts for report verification and functional testing, the scripts reduced 120-hour execution to 40 hours with manual execution which had QTP limitations.
