## PROFESSIONAL SUMMARY

---

I have 2 years experience in handling Performance testing and Performance engineering from offshore for multiple applications using HP LoadRunner and JMeter. Experience in Manual, Accessibility and Compatibility testing, SAP interfaces testing, Volume Testing. Responsibilities includes requirements gathering and scripting using VUGEN (HP LoadRunner/JMeter), Running Load, Regression, Smoke and Soak tests. Analysing results and sending final test reports.

## TECHNICAL SKILLS

---

**Performance Testing Tools** : LoadRunner, JMeter, Postman, SAP Basics, Fiddler, Dyntrace, New Relic, JIRA, Confluence, NVDA, CCA, Sauce Labs

**Protocol Used** : Web HTTP/HTML, SAP Web, SAP GUI, TruClient

**OS** : Windows, Linux, MACOS

## EXPERIENCE

---

### Performance Test Engineer

*Wipro Limited*

**Client:** LLOYDS BANKING GROUP

April 2022 – Present  
Chennai, Tamil Nadu

- Non-Functional Requirements Gathering and Identifying the scope scenarios for PT
  - Preparing test plan and estimates for performance testing
  - Developing performance test scripts using HP Load Runner Vugen using different protocols like Rest API calls, Web HTTP/HTML for web applications, SAP GUI for SAP Interface and SAP web for SAP Application.
  - Executed Different tests like Load and Soak Test using HP Performance center and HP Controller(LRE)
  - Capturing the timings to find how long it taking to process the files.
  - Analysing test results and comparing test results with baseline test metrics and generating the end reports.
  - Following standard processes in bug logging, bug fixing and bug-fix support in JIRA tool.
  - Handled Accessibility and Compatibility testing for one of the applications.
  - Supported in functional testing creating manual test cases and scenario Executed the Manual test cases and raised bugs.
  - Skilled in Agile methods like Scrum and Kanban, ensuring project delivery
- Roles and responsibilities:**
- Develop performance test plans and strategies based on the analysis of business requirements and application architecture.
  - Execute performance test cases and scenarios using appropriate testing tools, and simulate various user loads and conditions to identify system bottlenecks.
  - Monitor application performance during test execution, using monitoring tools to capture metrics such as response time, throughput, and resource utilization.
  - Identify, analyze, and document performance issues, including root cause analysis, and provide recommendations for improvement.
  - Work closely with development, QA, and operations teams to ensure performance requirements are met and to troubleshoot issues.
  - Prepare detailed performance test reports and dashboards, presenting findings and recommendations to stakeholders and management.

## CERTIFICATIONS

---

- Got Certification based on "Performance Test Engineering - L1"
- Got Certification based on "LoadRunner - L1"

## EDUCATION

---

### **Muthayammal Engineering College**

*B.Tech - Information Technology*

CGPA: 8.9

[2018 - 2022]

### **HSC**

*Bala Bharathi Matric Higher Secondary School*

Percentage: 85%

[2017 - 2018]

### **SSLC**

*SKV Matric Higher Secondary School*

Percentage: 89%

[2015 - 2016]
