PROFILE

As a seasoned Project Delivery Manager with over 10 years of experience, I specialize in leading cross-functional teams to deliver complex projects on time and within budget. My expertise explores in managing the end-to-end delivery process, ensuring seamless execution from initial planning through to completion. With a strong background in SAAS implementation and development, I excel in optimizing project workflows, mitigating risks, and fostering a collaborative environment that drives success.

WORK EXPERIENCE

- Zappyworks (Zoho In-House Team)

2023 to present

Project Delivery Manager

Roles and Responsibilities

I. Product Management
 - Product Strategy: Define product vision and strategy aligned with business goals.
 - Market Research: Conduct market analysis to identify customer needs and market trends.
 - Roadmap Development: Create and manage product roadmaps, prioritizing features and releases.
 - Cross-functional Collaboration: Work with engineering, design, marketing, and sales teams to execute product plans.
 - User Experience: Focus on enhancing user experience through product design and usability improvements.
 - Requirements Gathering: Collect and document product requirements from stakeholders and users.
 - Product Launch: Plan and execute product launches, including go-to-market strategies.
 - Performance Monitoring: Track product performance metrics and gather user feedback for continuous improvement.
 - Budget Management: Oversee product budget, ensuring resources are allocated effectively.
 - Stakeholder Communication: Regularly update stakeholders on product progress and key decisions.

CORE COMPETENCIES

- Project documentations such as BRD, FRD, SRS, RFP, SOP, SOW, MSA and SLA.
- Scrum
- Agile Methodology
- Waterfall Methodology
- Solution Architect
- Stakeholder Engagement
- Business Requirements Analysis
- Project Scheduling
- Change Management
- Data Analysis and Reporting
- Software Integration Solution

TOOLS & TECHNOLOGIES

- SAAS
- Cloud Computing
- HTML / Bootstrap
- Microsoft
- BI
- Lucidchart
- Asana
- Jira
- Xenonstack

II. Project Planning and Initiation

- Define project scope, objectives, and deliverables in collaboration with senior management and stakeholders.
- Develop a comprehensive project plan, including timelines, resource allocation, and budgeting.
- Establish project governance structures, including steering committees and communication channels.

III. Project Execution and Monitoring

- Oversee the day-to-day execution of project tasks, ensuring they are completed on time and within budget.
- Monitor project progress using tools and methodologies such as Agile, Scrum, or Waterfall as appropriate.
- Identify, assess, and manage project risks, implementing mitigation strategies as necessary.

IV. Team Leadership and Coordination

- Assemble and lead cross-functional project teams, including developers, testers, business analysts, and other specialists.
- Assign roles and responsibilities within the team, ensuring clarity and alignment with project goals.
- Foster a collaborative environment, providing guidance and support to team members.

V. Stakeholder Management

- Act as the primary point of contact for all project stakeholders, including clients, vendors, and internal teams.
- Communicate project status, risks, and issues to stakeholders through regular updates and reports.
- Manage stakeholder expectations and ensure their needs are met throughout the project lifecycle.

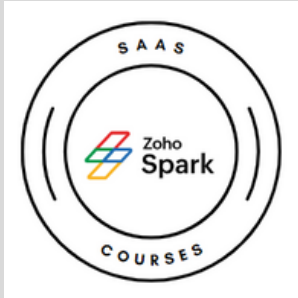

VI. Change Management

- Manage changes to the project scope, schedule, and costs using structured change control processes.
- Communicate and document changes, ensuring that all stakeholders are aware of and agree to them.
- Adapt project plans and strategies to accommodate changes in requirements or external conditions.

VII. Project Closure and Evaluation

- Ensure a smooth transition of project deliverables to operational teams or clients.
- Conduct post-project evaluations, including lessons learned sessions, to assess project performance and identify areas for improvement.
- Close out all project documentation and ensure all contractual obligations are met.

DIGITAL BADGES

VIII. Project Closure and Evaluation

- Ensure a smooth transition of project deliverables to operational teams or clients.
- Conduct post-project evaluations, including lessons learned sessions, to assess project performance and identify areas for improvement.
- Close out all project documentation and ensure all contractual obligations are met.

IX. Risk Management

- Risk Identification: Identified potential internal and external risks, understanding project scope and stakeholder concerns.
- Risk Assessment: Assessed and prioritized risks based on likelihood and impact using risk matrices and analysis tools.
- Risk Mitigation: Developed and implemented mitigation strategies, including avoidance, transfer, and acceptance of risks.
- Risk Monitoring: Continuously monitored and reported on risk status, updating mitigation plans as needed.
- Communication: Facilitated clear communication and collaboration with stakeholders to ensure proactive risk management.

eNoah iSolution

2015 - 2023

Project Lead

Roles & Responsibilities

- Led successful implementation of SaaS solutions, enhancing client operational efficiency by 100%.
- Managed cross-functional teams, including developers, QA, and support, ensuring seamless project delivery.
- Collaborated closely with clients to gather requirements, define project scope, and set realistic timelines.
- Oversaw system integration, data migration, and custom feature development to meet client-specific needs.
- Implemented best practices in agile project management, improving project completion rate by 100%.
- Maintained excellent client relationships, achieving a satisfaction rate in post-implementation surveys.
- Developed comprehensive project plans, including timelines, milestones, and resource allocation.
- Acted as the primary point of contact between stakeholders, clients, and development teams.

I have successfully managed projects across a wide range of industries (world wide such as US, UK, Australia, Canada, LATAM, APAC) from retail to enterprise, achieving a 100% success rate. My experience includes gathering both technical and non-technical requirements, architecting comprehensive solutions, and overseeing their successful implementation. I specialize in building software solutions from scratch, such as CRM and HRMS systems, tailored to meet dynamic use cases.

IMPLEMENTED SAAS PRODUCTS

- Zoho CRM
- Zoho Desk
- Zoho Books
- Zoho Inventory
- Zoho FSM
- Zoho Recruit
- Zoho People
- Zoho Projects
- Zoho Analytics
- Zoho Creator
- 65+ Zoho Products

TYPES OF SOFTWARE IMPLEMENTED

- Customer relationship management
- Inventory management software
- Field service management
- ERP
- Help desk software
- Applicant tracking system
- Accounting software
- Project management tools
- HRMS
- Event management software
- Learning management system
- Business intelligence tool
- Email marketing software
- Comprehensive e-commerce platform
- Live chat and visitor tracking software
- Route optimization software
- Affiliate Management
- Cloud telephony solution
- Identity and access management

Thank you for considering my application. I am enthusiastic about the opportunity to leverage my skills and experience in project delivery management to contribute to the organization's strategic goals. I look forward to discussing how my background aligns with the required objectives.

Warm Regards,
Gowtham. C
