

Hameetha Syed Ahamed Basha

+971552396304 | hameethaahamed@gmail.com | [hameetha-ahamed](#) | Dubai, United Arab Emirates

SKILLS Tools/Technology: Java Script, PHP, Python Basics, CodeCeption, Selenium, Playwright, Postman, Jenkins, GIT, Bitbucket, Source Tree, Jira, Testrails, MongoDB, Burp Suit, Accessibility , API , Volume Testing, Docker, OWASP Project Management: Experience managing large-scale projects, including assessment plans and quality improvement.	EDUCATION BITS Pilani 2014 – 2016 Master of Business Administration (Quality Management) Anna University 2004 – 2008 Bachelor of Engineering (Computer Science)
EXPERIENCE FileCloud Dubai 2025 - current Principal Quality Engineering Architect - Driving AI-driven quality engineering initiatives, focusing on self-healing test automation. - Advocate for Shift-Left testing by integrating quality practices early in the development lifecycle. - Define and ensure adherence to quality standards, metrics, and best practices across the Scrum team. - Collaborate with developers and architects to ensure the software design supports testability, scalability, and performance. - Provide guidance on the technical feasibility of test automation and quality engineering guidelines - Promote TDD , BDD and AI-driven test strategies, leveraging machine learning for intelligent test case generation practices to ensure test coverage and clarity of requirements. FileCloud Dubai 2014 - 2024 Quality Engineering Manager Building Scalable Test Automation Frameworks - Spearheaded the adoption of Playwright for UI automation, reducing manual testing effort by 60%. - Designed a scalable automation framework integrating Selenium and Cypress to support cross-browser testing. - Implemented API test automation using Postman and REST Assured, improving API reliability. Leadership & Process Improvement - Managed a remote team of QA engineers, fostering a culture of quality and continuous improvement. - Conducted regular knowledge-sharing sessions to enhance automation skills across the team. - Optimized test execution by integrating automated tests into CI/CD pipelines, reducing deployment cycles by 30%. Project Management & Cross-functional Collaboration - Led QA efforts for enterprise-level software projects, ensuring timely delivery with zero critical defects. - Worked closely with development, product, and operations teams to establish best practices for quality assurance. - Drove risk-based testing strategies to focus on high-impact areas, ensuring optimal test coverage. - Hiring and Organizing bug bashes.	ACHIEVEMENTS - Developed and implemented quality assurance processes that improved operational efficiency by 50% - Successfully mentored and developed quality assurance professionals, contributing to their professional growth and performance. CERTIFICATIONS AU TVS for Quality Management, Anna University 2013 Six Sigma Green Belt
Amazon India 2010 – 2014 Quality Engineer - Collaborated with the engineering team to define testing scope and ensure effective testing strategies for multiple software releases. - Executed automated test scripts to increase testing coverage and speed, leading to faster delivery times. Infosys 2010 – 2014 Software Engineer - Develop code as per the requirements given in the client's specification. Code reviews. Unit and Integration testing	INTERESTS Artificial Intelligence in Test Automation, AI-Driven Quality Engineering, Fitness, Up skilling, Travel
