## HARIHARAN K

### OBJECTIVE

Seeking a position to utilize my skills and ability in the industry that offers professional growth while being resourceful, innovative and flexible.

### SKILLS & ABILITIES

- Cloud Computing, Requirement Gathering
- AWS Setup & Architecture, User Authentication, Access
- Cloud management and Cloud Monitoring Troubleshooting
- Proficient with various development, Testing and Deployment Tools-Git,
- Jenkins, Docker, Splunk, Appdynamic, Ansible, Terraform.
- Good Understanding Of Devops Key Concepts Like Infrastructure As Code (IaC)
- Experience In Developing CI/CD .
- DATABASE: MYSQL.
- OPERATING SYSTEM: Windows, Linux, Ubuntu.

### CAREER

2Months of Amazon web service Training at Besant Technologies, 2 Months of Devops Training at Besant Technologies.

Seeking a challenging career where I could apply my technical experience and interpersonal skills which would explore myself and realize my potential to bring success and glory to the organization

### OBJECTIVE

#### AWS SERVICES

- Designing and implementation of AWS Architecture & Setup.
- Responsible for Creating AWS IAM Users, Policy, groups.
- Configured and managed various AWS Services including EC2, RDS, VPC, S3, IAM, Cloud Watch, SNS, Cloud Front, load balancer (ELB), Auto- scaling group and Route 53, Cloud Trail , Cloud Formation And Extra.
- Configuration of Continuous integration and Deployment (CI/CD) using the code commit and code on AWS cloud.
- Launch the AWS Elastic Beanstalk can quickly deploy and manage applications in the AWS cloud.
- Work with AWS cloud management and Ansible automation
- Design AWS cloud formation templates to create custom sized VPC, subnet to ensure successful deployment of web application and database templates
- Design, investigation and implementation of public facing websites on Amazon Web Service. Using Jenkins AWS code deploy plugin to deploy to AWS.
- Configured Elastic Load Balancer with EC2 Autoscaling groups.
- Migrated the current Linux environment to AWS/RHEL Linux environment and used auto scaling feature and involved in Remediation and patching of Linux server

## DEVOPS

- Installation, set-up, and management of build servers and management using Jenkins as continuous integration tool
- Implement Jenkins as continuous integration server for installation, configuration, design and administration, and integrating tools with other systems
- Develop a continuous deployment pipeline using Jenkins
- Monitoring Jenkins jobs and contact team if progress is not evident on fixing stability issue.
- Developed scripts for build, deployment, maintenance and related task using Jenkins, Docker.
- Orchestration Docker container cluster from Kubernetes/Docker Swarm
- Purposed branching strategy suitable for current application in Git
- Imported and managed multiple corporate application in Git
- Deploy Docker engines in virtualized platform for containerization of multiple application
- Worked on creating the Docker container, Docker container image, tagging and pushing the image and Docker console for managing the application life cycle
