EDUCATION

- 2017 - 2021
- Bachelor of Engineering
- Computer Science Engineering
- Panimalar Engineering college
- CGPA - 8.83/ 10

SKILLS

- Performance Engineering & Optimization
- Test Automation & Scripting
- CI/CD Pipeline Development
- Custom Plugin Development
- API Performance Testing
- Observability & Monitoring
- Version Control & Collaboration

CERTIFICATIONS

- Apache JMeter Certification – Blazemeter
- Business English Certification – Cambridge Assessment

LANGUAGES

- English (Fluent)
- Tamil (Fluent)

HARINI S

PERFORMANCE TEST ENGINEER

PROFILE

Performance Test Engineer with 3.8 years of experience at the intersection of performance testing, programming, and DevOps. Proficient in architecting automated workflows, scripting customized testing solutions, and engineering CI/CD pipelines using Jenkins to streamline delivery pipelines. Demonstrates expertise in utilizing advanced performance testing tools coupled with real-time monitoring platforms. Dedicated to developing solutions that are both technically sound and practical in real-world use.

WORK EXPERIENCE

- HCLTech** AUG 2021 - PRESENT
Performance test engineer
Chennai,TN
 - Designed and executed JMeter test scripts, simulating real-world user behavior through parameterization and correlation.
 - Conducted load, stress, and endurance testing, analyzing key metrics to improve system scalability and reliability.
 - Built Grafana dashboards integrated with Jenkins for real-time monitoring and automated test execution, reducing manual effort by almost 50%.
 - Automated performance testing with Jenkins CI/CD pipelines, cutting execution time by 25% and streamlining result storage.
 - Enhanced JMeter with a custom Java plugin, enabling dynamic element renaming via GUI, reducing script maintenance.
 - Resolved Grafana dashboard issues and added new features to improve usability and insights.
 - Maintained test scripts using Git (TortoiseGit) for version control and team collaboration.
 - Automated Jenkins workflows using Groovy scripts, reducing manual effort in CI/CD processes

TECHNICAL SKILLS

- Performance Testing:** JMeter, LoadRunner, Taurus
- Monitoring & Observability:** Grafana, Prometheus
- CI/CD & Automation:** Jenkins, Groovy, YAML,
- Development & Scripting:** Java, JavaScript
- Version Control:** Git, GitHub, TortoiseGit
