Ennore Cargo Container Terminal Pvt Ltd., Chennai

Aug 2017- July 2020

QA Software Engineer

- Collaborated with the test manager and development teams to gain a thorough understanding of project goals and testing objectives.
- Utilized Quality Center to store testing results, metrics, create test cases, and generate reports, demonstrating active engagement in agile practices.
- Executed user stories, test cases, designs, scripts, and conducted result reviews in manual testing of web/mobile applications.
- Participated in UAT testing, regression testing, and functional testing activities.
- Orchestrated the Test plan during the initial project phase, preparing test scripts, creating release notes in Application Life Cycle Management (ALM), linking tests with release cycles, executing test cases, and recording results in the tool.
- Demonstrated extensive experience in various testing cycles, including SDLC/STLC.
- Collaborated with the database administrator to facilitate the migration and maintenance of applications.
- Played a pivotal role in defect reporting, tracking, and reproduction.
- Engaged in mobile and tablet device testing, collaborating with business users to ensure the application met their specific needs.
- Conducted cross-browser testing on various browsers to ensure seamless functionality.
- Leveraged ICON/CALCI software for monitoring and reporting on running test cases.

QUALITY ASSURANCE INITIATIVE

Title: Micro Community

Modules: Web App Testing, Mobile App Testing

- Jumbow - Jumbow's platform is designed with gamification elements like leader boards, badges and analytical reporting that help engagement.
- In addition to its features for creating communities, micro-communities, events, job boards, marketplaces, and more, Jumbow also provides white-label mobile apps for organizations to deploy in their brand name.
- The app shall be available in android and iOS mobile app stores for the end consumers and stakeholders to download and engage quickly.

Title: K7 Internet security & DIGIMOM

Modules: Web App Testing, Mobile App Testing

- Subscription Plans:
 - Verify that users can successfully subscribe to different purchase plans.
- Billing Cycles:
 - Test the system's ability to handle various billing cycles (monthly, annually, etc.).
- Payment Methods:
 - Check that different payment methods (credit cards, PayPal, etc.) are processed correctly.
- Subscription Modifications:
 - Ensure users can upgrade, downgrade, or cancel their subscription plans without errors.
- Backend Testing for Products:
 - Product Database: Validate that products are correctly stored in the database with accurate information.
 - Inventory Management: Test the system's ability to update product quantities and handle out-of-stock scenarios.
 - Product Details: Ensure that product details (descriptions, images, prices) are displayed correctly on the frontend.
 - Order Processing: Verify that backend processes correctly process orders, update inventory, and send order confirmation emails.
 - Coupon Testing with Tax: Coupon Application: Test the application of coupons during the checkout process.
 - Discount Calculation: Verify that the correct discounts are applied when coupons are used.
 - Coupon Restrictions: Test any restrictions on coupon usage, such as validity period, product-specific coupons, or minimum purchase requirements.
 - Tax Calculation: Ensure that taxes are correctly calculated based on the final discounted amount after applying coupons.
 - Coupon Expiry: Check if expired coupons are correctly rejected during the checkout process.
