PROFILE SUMMARY

Lead Consultant/Technical Lead Testing/Senior Quality Assurance Engineer/Manual and Selenium Expert with 18.5 years of experience in Software Testing, encompassing Automation and Manual testing, API testing, Integration testing, Mobile Application testing, Team management, Project management, Test Plan, Test Strategy, Risk management, KPIs, SDLC, STLC, LEAN, Agile methodology

- Proficient in **Selenium WebDriver, TestNG, Extent Report, Java, Postman, SoapUI, API Testing, Test Complete, JMeter and Tandem Testing**
- Proficient in **developing Test Automation Harness/Automation Frameworks like Data Driven, Keyword Driven and Page Object Model (POM)**
- Worked in AWS Cloud resources **EC2 instances, S3 bucket, RDS databases and Cloud Watch**
- Experience in **(CI/CD) tools Jenkins, GitHub, Maven** etc... worked in configuration of Jenkins user management, Plugin management and build management, job configuration and reports
- 12+ years of experience in **Manual Testing** and 5 years in **Selenium WebDriver** and 1 year in **Test Complete** and 6 months in **Playwright & Cypress**
- Expert in developing **Product Quality KPIs, Test Plan, Test Strategy, Test Estimation, Streamline QA Process, Process development, Process documentation, Process improvement, Test Management, Understanding document, Test Scenario, Test Cases, Requirement Traceability Matrix**
- **Research and provide proof of concept for the new feature and environment**
- Experience in **Managing team around 15 members** to accomplish deliverable goals, Managing multiple projects and coordination with onshore and offshore teams
- Have handled testing engagement covering functional testing, smoke testing, system testing, regression testing, System Integration testing, compatibility testing, End to End test data management, test automation, performance testing, business process-based testing (UAT) and management
- Experienced across all phases of Manual & Automation Testing – Functional requirements gathering, Test Design, Test Script Development, Test Execution, Failed Test Case Analysis Report, Impact Analysis Report & System Test Report. Also involved in preparing WSR & MSR (Weekly-Monthly) status reports
- Managed & Owned Test Program Estimation, Quality Assurance project planning, Resourcing, Risk Management, Test Environment Management, Defect Management, Test Program end-end delivery & Due Diligence
- Experience in team building & manage, train resources on functional testing & domain concepts
- Team Leader with excellent People Management, Presentation, Problem Solving and Analytical skills
- Recognized project management skills, consistently deliver complex, large-scale projects on time and within budget

TECHNICAL SKILLS

Operating Systems:	Windows Family, Linux, HP Nonstop server (Tandem)
Testing Tools:	Selenium WebDriver, Test Complete, Soap UI, Postman, Auto IT, Playwright & Cypress
Testing Framework, CI/CD tools:	TestNG, Maven, Jenkins, GitHub
Programming languages:	Java
Database:	SQL Server, MySQL, Oracle, NoSQL
Test Management Tools:	HP ALM, Rally
Defect Tracking Tools:	Jira, Scarab, Bugzilla, Mantis
IDE:	Eclipse, Visual Studio Code
Other Tools:	FUP, PATHCOM, OUTSIDE VIEW 8.1C, JProfiler, JMeter, Extent Report
Domains Worked:	Airline, Manufacturing, Telecom, Insurance and Asset Management

EDUCATION

B.Tech. (Information Technology) from SRM Engineering College affiliated to Anna University 61% in 2005

PERSONAL DETAILS

Date of Birth: 15th June 1983
Permanent Address: 3, KAMARAJ NAGAR, 1st STREET, ZAMIN PALLAVARAM, CHENNAI-600043
Languages Known: Tamil, English
Passport Details: N0804554, Expiry 25-June-2025
Visa Details: Business visa for USA, Valid till 2025
Marital Status: Married
Nationality: Indian

PROJECTS MANAGED IN INFOSYS

Title: PLRE
Project Summary: PLRE are global experts in managing and evaluating mortality, critical illness, and disability, medical and associated risks. By leveraging this expertise, we generate a comparative advantage for our insurance partners by providing them tailored reinsurance solutions.

Roles & Responsibilities in PLRE:

- Discussion with stakeholders and get their inputs on testing process
- Making use of the stakeholder input, creating a Testing maturity score model
- Conducting gap analysis using Enterprise QA Transformation Model
- Finally suggesting the customer about their Gaps in Testing process and give some recommendations and Quick wins

PROJECTS MANAGED IN CIKLUM

Title: iFlight
Project Summary: iFlight's artificial intelligence and data-driven solutions drive smart OCC collaboration through a real-time view on all operational indicators, from planning to post-flight
Technology / Tools: Java, J2EE, Angular, NodeJS, Selenium WebDriver, TestNG, Extent Report, Jira

Title: JLL
Project Summary: Jones Lang LaSalle Incorporated (JLL) is a global real estate services company, founded in the United Kingdom with offices in 80 countries
Technology / Tools: Java, J2EE, Angular, NodeJS, Playwright, Jira

Roles & Responsibilities in Ciklum:

- Responsible for defining QA strategy, approach, and execution of all product lines across Software, Web and Mobile
- Serve as a QA lead and work with the leads of other disciplines to increase the QA impact on the end products
- Identifying appropriate tools, testing methodology, automation approach
- Mentor and coach junior QE resources. Provide them direction, training, and guidance on a continuous basis
- Manage the testing defects triage process and track defects to closure
- Automation framework design and implementation
- Created new test script and also updated the existing test script
- Assigning tasks to all Testing Team members and ensure that all of them have enough responsibilities in the project

PROJECTS MANAGED IN GE

Title: GFSK
Project Summary: GFSK is an information platform for Steam Turbine Equipment
Technology / Tools: Java, J2EE, SpringBoot, NodeJS, Oracle, Selenium Webdriver, TestNG, Extent Report, Rally

Title: SAS
Role: Sr. Quality Assurance Engineer
Project Summary: SAS is a Forecasting tool
Technology / Tools: Java, J2EE, Angular JS, Selenium Webdriver, TestNG, Extent Report, Rally

Title: Lesson Learnt
Role: Test Engineer
Project Summary: Lesson Learnt is a workflow tool, which aims to capture the learnings and improve our working documents
Technology / Tools: Java, J2EE, React JS, PostgreSQL, Selenium Webdriver, TestNG, Rally

Title: **Steam Vision**
Project Summary: Steam Vision is a reporting tool for Finance
Technology / Tools: Java, J2EE, React JS, Oracle, Selenium Webdriver, TestNG, Rally

Title: **STITS**
Project Summary: The STITS tools enables engineers to design the blade path for steam turbines for a wide range of applications
Technology / Tools: Java, J2EE, Angular JS, Eclipse RCP, TDM, Test Complete, Rally, Jira

Roles & Responsibilities in GE:

- Lead a team of 3 people to successfully deliver monthly releases in Agile model
- Identifying the areas/testcases for Automation
- Configuring Selenium Test Environment – Eclipse IDE, Java, Selenium WebDriver, TestNG and Extent Reports
- Automation framework design and implementation
- Developed Automation Test Scripts in Selenium WebDriver using Java based on the design pattern Page Object Model
- Finding solutions for Object Identification and error handling issues
- Collecting test data for Data Driven Testing
- Created html reports with Extent Reports
- Executed automation plan, worked in framework & co-ordinate with team in creating java scripts in Test Complete
- Installing and managing the configuration of performance testing tools, and designing test scenarios to meet documented test requirements
- Worked on the license part of the UI automation tool called Test Complete with Smart Bear
- Identifying and addressing bottlenecks is an important part of performance testing
- Preparing and reviewing the Test Plan, Test Case, Release Notes, Understanding documents and Test Result Documents
- Provided the Estimations for the Change Requests and new Features
- Test Execution: Functional testing, System Testing, User Acceptance testing & Regression Testing
- **Coordinated with AWS team to get the license, approvals, and worked with team for configuration of all environment for Dev, QA and PROD environment**
- **Tested the migrated product which was migrated from on premises to cloud environment needed**
- **Helping the dev team to deploy the new build by uploading a new build and restarting the instances in cloud environment**

PROJECTS MANAGED IN PRODAPT

Title: **GIS DIRECTOR**
Project Summary: GIS Director is used by PSAP and Coordinators to create CRs/DRs for MSAG, ALI and TN modules. These data are plotted in Maps with respective modules. MSAG data are mapped with Street ranges and ALI and TN data are mapped with markers in map.
Technology / Tools: Java, J2EE, Ember, PostgreSQL, Selenium Web driver, TestNG, HP ALM, Jira, Postman, JMeter, JProfiler

Title: **EAS**
Project Summary: EAS application is the Emergency Awareness System used by Admin and First Responders. Through sensor device or mobile call, an incident is plotted in the EAS application with data. EAS application displays nearest fire hydrants, hospital, police stations and emergency vehicles shortest distance to the incident.
Technology / Tools: Java, J2EE, Ember, MongoDB, Selenium Web driver, TestNG, Bugzilla, Postman

Title: **911 Information Manager**
Project Summary: 911IM application is used by PSAP, Muni and Xtelco users to maintain MSAG and TN database. All these 3 users have their respective login permissions to create Change Request or direct update.
Technology / Tools: Java, J2EE, Web Sphere Application server, Informix, Quality Center, SOAPUI, Scarab

Title: **TSS**
Project Summary: The objective of TSS is the maintenance of data and processes by Intrado to be used by any carriers or other 9-1-1 NET support people.
Technology / Tools: Non-Stop SQL/MP, TAL, HP Tandem Systems, Oustside View 8.1C, Quality Center, SOAPUI, Scarab

Title: **911 NET**
Project Summary: 911 NET is used by PSAP, Coordinator, Analyst and Telco users to maintain TSS database.
Technology / Tools: JAVA, J2EE & Oracle 10g, Quality Center, SoapUI, Scarab

Roles in Prodapt:

- Lead the project features from the requirement phase to testing phase
- Provided the Estimations for the Change Requests and new features
- Design test plan, test strategy, test case, release notes, understanding document and test result documents
- Tracking the progress of the test team through daily, weekly & monthly status reports
- Test Execution: Functional testing, System Testing, User Acceptance testing & Regression Testing
- Involved in creating automation framework, did coding for the Driver script to select the scenarios to be executed
- Creating Wrapper Methods with Screenshots and Exceptions Handling for TestEngine in Java programming
- Preparing the Execution Sheet with Action words, Properties and Test Data
- Test Reporting: Reporting defects, retesting the Defects and Maintaining Status report, and providing the information on production defects

PROJECT MANAGED IN JRD SYSTEMS

Title: High Point Insurance

Project Summary: High Point Insurance provides auto insurance to New Jersey drivers; it gets the information about the Policy owner and gives a valid Quote.

Technology / Tools: JAVA, J2EE & SQL Server 2005, Quality Center, Mantis

Responsibilities in JRD Systems

- Involved in Functional Testing, Smoke testing, Sanity Testing, Regression Testing and Compatibility Testing
- Reviewing Gap document and analysing log files
- Verifying data in database and tags in request and response xml
- Generated the detailed reports of the Bugs, Pass-Fail report and Assigned defects using Bugzilla

PROJECT MANAGED IN KNS INFORMAT

Title: Hylihter

Project Summary: HyLighter, the ground-breaking collaboration plug-in for documents that require review among several or more people. It is used for more efficient and productive approach to collaborative document review.

Technology / Tools: JAVA, J2EE & SQL Server 2000, Quality Center, Mantis

Roles in KNS Informat:

- Reviewed the Functional Requirements and System Specifications to create Test Plans
- Involved in Functional testing, Regression Testing, smoke testing and acceptance testing on incremental builds
- Generated the detailed reports of the Bugs, Pass-Fail report and Assigned defects using Bugzilla
- Participated in the team meetings to discuss the issues arising during the various stages of testing

PROJECTS HANDLED IN RCS TECHNOLOGY

Title: Traxx

Project Summary: TRAXX (Asset Management and Tracking System) is web based application, which supports a highly flexible multi-user Asset management system.

Technology / Tools: JAVA, J2EE & SQL Server 2000, Mantis

Title: Quality Assurance Portal

Project Summary: USL has a technical centre located in Bangalore where stringent quality tests are conducted on the products manufactured by USL and the raw materials that go in to production.

Technology / Tools: JAVA, J2EE & SQL Server 2000, Mantis

Title: Trade Marketing Portal

Project Summary: Trade Marketing Portal is a web-based application which supports USL to create and approve Monthly Circulars, Monthly Activity Briefs, MSPF and Upload Documents.

Technology / Tools: JAVA, J2EE & SQL Server 2000, Mantis

Title: Call Management Systems

Project Summary: RCS CARE is a comprehensive call and inventory management system that provides seamless co-ordination between all customer problems by integrating people, process and technology to maximize relationships with all customers.

Technology / Tools: JAVA, J2EE & MySQL, Mantis

Roles in RCS Technology:

- Writing, Updating and Executing the Test Cases
- Involved in Smoke Testing, Functional testing, Regression testing
- Coordinating with Team Lead & developers for defect analysis and their fixes
