

Senior Automation Leader with 14+ years of experience architecting innovative, scalable automation solutions for Web UI, API, and Performance testing. Driving accelerated delivery with exceptional product quality through automation across diverse sectors (Travel, Telecom, Fintech, Banking). Expertise in building and managing SDET teams. Proven track record of elevating software quality with measurable improvements: 20% reduced defect leakage, 20% faster testing cycle time, and 25% improved test coverage.

Technical Skills

- Web Automation : Selenium, Playwright, Cucumber, JUnit, TestNG, Extent Reports, Allure Report
- API Automation : REST Assured, Postman, JMeter, Ready API, Swagger, Json Path, Lombok, Wire Mock
- Test Management : JIRA, Confluence, Rally, Mantis, Test Link, Test Rail
- Language : Java, Java Script, NodeJS
- Build Tools : GitHub, Bitbucket, Maven, Gradle, Jenkins, CI/CD Pipeline
- Databases : NoSQL » DynamoDB, MongoDB ••••• RDBMS » Oracle 11g, SQL Server 2008, MySql
- Cloud : Amazon Web Services (AWS), Microsoft Azure
- Servers : Apache Tomcat, Nginx, IBM WebSphere
- Infra Monitoring : Grafana, PagerDuty, Splunk, Kibana, Elastic

Experience History

J P Morgan Chase Service India Pvt Ltd. | Vice President - Technology | Nov 2022 – Till Now

- Owned and enhanced the test automation framework, implementing new features, resolving codebase issues, and maintaining a robust test infrastructure to enable seamless test execution and accelerate team delivery.
- Provided technical leadership within the squad team, oversaw the creation and execution of test scenarios, test cases, through test automation scripts using Typescript and Playwright.
- Ensured successful and seamless deployments by adhering to rigorous release control and quality gate processes, leveraging CI/CD pipelines for continuous integration and delivery.
- Cultivated a culture of innovation and continuous learning within the team by championing new ideas, evaluating emerging tools, to optimize and increase efficiency of the team.

Blue Yonder Inc. (a Panasonic Company, formerly JDA Software Pvt Ltd.) | Test Architect | Mar 2020 – Nov 2022

- Architected, designed, and implemented test automation frameworks tailored to client needs, increasing test coverage by 30% and reducing defect leakage by 15%.
- Ensured robustness and reliability of existing test scripts across diverse client environments resulting in a 20% improvement in code quality.
- Led Quality Team, guiding in developing test strategies for functional and non-functional requirements. Proactively escalated potential risks to management, ensuring timely project delivery.
- Championed the adoption of the latest open-source technologies and trends, creating an extensible ecosystem of testing infrastructure that improved overall team efficiency by 25%.
- Actively participated in design discussions and sprint planning to efficiently resolve blockers. Led defect triage meetings, troubleshooting customer issues and collaborating on effective resolutions.

Expedia Online Travel Services India Pvt. Ltd. | SDE II | Mar 2018 – Dec 2019

- Developed, maintained, and enhanced robust, scalable test automation solutions. Operated as a full-stack developer in an Agile environment, owning the design, development, testing, and deployment of end-to-end test automation solutions using Java, Selenium, and REST Assured.
- Led peer programming sessions, served as a lead engineer to debug, execute code, review, and optimize test automation scenarios.
- Partnered with development teams, product managers, and solution architects to solve complex problems through innovative automation solutions, reducing manual testing effort by 40%.

LendingKart Technologies Pvt. Ltd. | SDET II | Jul 2017 – Mar 2018

- Led 4 members team to undertake functional and automation testing of the in-house developed products.
- Contributed to developing automation framework, functional automation test cases to increase test coverage.
- Being on call QA, monitoring production servers, investigating production issues, creating, and merging Git branches, doing production and hotfix deployments, running automation test suites, maintaining wiki/confluence pages etc.
- Actively involved in Release Planning, Product Planning, Sprint Planning, Sprint Review, Retrospective, and other meetings.

Tech Mahindra Ltd. | Associate Tech Specialist | Oct 2016 – Jul 2017

- Led 3 test team members team to create functional automation test suites aiming Regression, Smoke and Sanity Tests.
- Created test plan, reviewed functional and design specifications to determine and prepare automated test cases.
- Thoroughly reviewing assigned PRDs, provide inputs for missing requirements, assigning tasks to team members.
- Reviewing test cases, high level manual test scenarios prepared by team members covering 100% test coverage.
- Getting all the tests cases executed from the team in given timeframe, doing defect management for all the raised bugs.

Harman Connected Services Corporation India Pvt. Ltd. | Senior Product Engineer | Mar 2015 – Oct 2016

- Built complete test environments independently, including VMs, simulators, open-source software, and hardware assembly, to replicate real-world scenarios and ensure accurate testing conditions.
- Defined testing scope, developed detailed test plans with QA guidelines, and aligned testing efforts with product requirements and business objectives.
- Executed tests on the Azure cloud platform, automated RESTful API tests with JMeter, performed manual testing with Postman, and generated reports to identify bottlenecks and accelerate issue resolution.
- Designed and implemented a test automation framework from scratch, translating business requirements into automated scripts, increasing test coverage by 40%, and streamlining execution with a data-driven Selenium WebDriver approach.

iYogi Technical Services Pvt. Ltd. | Senior QA Engineer | Apr 2011 – Mar 2015

- Progressed from entry-level QA to Senior QA Engineer, demonstrating rapid growth and expertise in QA methodologies and technologies.
- Designed and executed manual test cases, created traceability matrices, conducted end-to-end testing, and managed bug tracking across the lifecycle.
- Developed and maintained automated test scripts using Selenium WebDriver, TestNG, and Java, reducing manual effort and ensuring alignment with business needs.
- Prepared detailed test reports and provided daily updates, fostering clear communication with leadership and QA managers.

Education History

Academics	University/Board	Score	Year
MCA	Sikkim Manipal University	72.10%	2013
BSC.IT	Sikkim Manipal University	81.48%	2010
