

Jamuna Velusamy

SDET | Test Manager

+91 8754715123 | vjamunacse@gmail.com | [Github](#) | [Linkedin](#) | [Crio Portfolio](#)

Skills

Programming languages	: Java
Functional Automation	: Selenium
API Testing	: Postman, REST Assured, SOAP UI
Performance Testing	: JMeter
Data Base	: MySQL
Cross Browser	: Browser Stack
Accessibility Testing	: Wave, Lighthouse
SEO Testing	: Google Analytics
Test/Defect Management	: HP Quality Center, Azure DevOps, MTM, TFS, JIRA

Experience

Tata Consultancy Services Limited

British American Tobacco

Oct 2022 - June 2023

Test Manager

- Orchestrated the **alignment with Business Team** on SIT, UAT, and RT scopes, leading to a **decrease in scope-related issues**.
- Coordinated cross-functional collaboration with 4 internal teams to **streamline data identification process**, leading to a reduction in data-related delays and **ensuring on-time completion of test phases**.
- **Engaged with internal and third-party teams** to ensure test environment readiness and resource availability, facilitating **smoother test executions**.
- **Triaged defects** efficiently to **ensure timely resolution** within defined timelines.
- Developed **Test Plans/Schedules** and **Test Closure documents**, along with Stakeholder approvals, **increased Stakeholder satisfaction** due to transparency and adherence to project timelines and deliverables.
- Provided timely daily status reports to support project monitoring and decision-making, ensuring stakeholders remained informed and empowered to make timely decisions.
- Effective management of multiple projects and teams concurrently by **efficiently allocating resources**, resulting in **reduced task completion time**.

Accenture Solutions Private Limited

Sitecore Managed Services (CMHC, BrightHouse & EISAI)

Aug 2017 - June 2022

Associate Manager

- **Spearheaded a 6-member** cross-functional team (Development & Testing) for Sitecore Migration and Enhancements, **ensuring timely project delivery**.
- Contributed to **Test Strategy** creation and created **Test Plan/Approach** and **Test Closure** documents.
- Active participation in **Requirement Analysis** significantly **minimized defects** encountered during the testing phases.
- Ensured thorough test coverage by **reviewing test scenarios/scripts**, resulting in a notable decrease in defects.
- Performed an extensive range of manual tests, including System Integration, Regression, End-to-End, SEO, Cross-browser/device, Mobile, API, and Accessibility Testing, enhancing overall product/software quality.
- Assisted the business team with UAT test cases and execution, boosting efficiency and accuracy.
- Ensured **zero defect delivery** by conducting thorough test result reviews, preventing defect slippage and minimizing defects escaping to the production environment.
- Actively participated in defect management processes, including **defect triaging**, leading to a **decrease in defect resolution time**.
- Efficiently allocated resources and managed task distribution, leading to a reduction in task completion time.
- Provided daily status reports to Project Managers and the team, promoting transparent communication and supporting informed decision-making.

APHP & Maersk

Feb 2012 - Nov 2015, Apr 2016 - Aug 2016

Team Lead

- **Led a 13-member team** as module lead/SME, **guaranteeing timely project delivery**.
- Conducted various STLC activities, including test estimation, requirement analysis, test data preparation, test script creation/execution, and defect management.
- Achieved extensive test coverage through careful **review of test scenarios/scripts**, leading to a significant **decrease in defects**.
- Executed a variety of manual tests, including System Integration, End-to-End, Regression, and Cross-browser testing to strengthen overall product quality.
- **Developed EDI files** to rigorously test the product's ability to efficiently process data from external sources.
- **Presented project deliverables to senior management and clients**, which enhances transparency and **customer satisfaction**.
- Managed timely delivery of DSR and WSR reports to facilitate project oversight and decision-making.

WellPoint ePortal (Employer & Member)

Oct 2009 - Jan 2012

Software Engineer

- Involved in various STLC activities, such as requirement analysis, test data preparation, test script creation/execution, and defect management.
- Carried out a variety of tests, including System Integration, End-to-End, and Regression Testing.

Crio – Masters in QA Automation

Projects

[OTrip API Testing Project](#), [OTrip](#), [QKart](#), [A Quiz application](#)

May 2023 - Jan 2023

Tools Used: Java, Selenium, OOPs, Unit Testing, Rest Assured, Page Object Model, Test NG, Postman, Apache POI, Extent Reports, Wrapper Methods, XPath, Selenium Waits, Window Handling, Screenshots, Dev Tools

- Analyzed application requirements thoroughly and built a command-line quiz application using **Object-Oriented Programming principles**.
- Conducted **unit tests** to ensure the functionality of the application.
- Resolved failing test cases, **addressed synchronization issues** with implicit and explicit waits, and enhanced test stability using XPath.
- Migrated tests to the **TestNG framework** and automated **Data-driven testing** with Apache POI.
- Designed and **automated over 10 test cases** following the **Page Object Model** pattern with Page Factory, Selenium, and TestNG, implementing the **Singleton** pattern for efficient WebDriver setup.
- Utilized **Apache POI for data-driven testing**.
- Generated **custom test reports using Extent Reports** for better project visibility.
- Executed manual End-to-End API testing with Postman and automated **API tests with Rest Assured Framework and Java**.
- Integrated API tests with UI tests and streamlined testing with a TestNG project.

Mini Projects

DSA Problems – 125 + problems solved

May 2023 - Dec 2023

CI/CD pipeline with Jenkins, CRUD with SQL, Test Automation with Apache POI, Waits, XPath & Keyboard Operations

Aug 2023 - Dec 2023

- Employed **Jenkins** to create test execution jobs and manage email notifications.
- Established **MySQL** tables, executed CRUD operations, and analyzed data using SQL queries for ordering, filtering, and aggregation.
- Automated user credential validation with TestNG, extracting credentials from an Excel file through **Apache POI**, and updating validation results within the same file.
- Designed and automated test cases utilizing **Selenium keyboard operations, chained XPath, implicit wait, explicit wait, and dynamic XPath**.

Achievements

- Awarded **Accenture Celebrates Excellence Award (Team)** for exceptional performance in CMHC project
- Earned **On the Spot award for zero defect delivery** in BrightHouse project
- Received **Sparkling Star Award** for **improving testing quality** from BrightHouse project

- **Proposed an idea** in Accenture's Technology Innovation Contest, advancing to **Stage-4 (Finals)** in the company-wide competition.
- Attained **On the Spot Award for exceptional contributions** in APHP project
- Recognized as **Star of the Month for outstanding achievements** in APHP project

Certifications

2011 Healthcare Management: An Introduction (AHM 250)	2018 Agile Professional Certification
2019 Avande Scrum Foundation	2019 Azure Fundamentals
2021 Selenium with C#	2023 Crio – Masters in QA Automation

Education

Computer Science and Engineering

M. Kumarasamy College of Engineering, Karur
