

JAYASURYA

SOFTWARE TEST ENGINEER

Ph : 8807422927

Mail Id : tjayasurya132k@gmail.com

ABOUT ME

2+ Years of experience in IT Industry on Software Testing. Experience in Manual & Automated testing, including Bdd- Cucumber, Tdd-Testng, Pom, DataDriven, SQL, Jenkins, Github, API Rest Assured & Postman, Sanity testing, Functional testing, Integration testing and Regression testing.

EDUCATION

2017-2021

BE-EEE Erode sengunthar engineering college,perundurai with 70%

LANGUAGE

- English
- Tamil

KEY SKILLS

- Bdd- Cucumber
- Tdd- TestNg
- Jenkins
- Jira
- API(Postman & Rest Assured)
- SQL
- GitHub
- Software Development Life Cycle
- Software Testing Life Cycle, Agile
- Waterfall
- JIRA
- Smoke Testing
- Regression Testing
- Black Box Tester
- System Integration Testing

WORK EXPERIENCES

Infosys Limited April 2021 to Present (2.8Years)

SUMMARY

- Over 2.8 years of experience in Information Technology, with specializing in Software Quality Assurance Testing, proficient in testing on Client/Server and (**Selenium WebDriver**) Web based applications and good experience on **Core Java, OOPS concepts**.
- Hands on experience in **Test driven development DD**), **Behavior driven development (BDD)** and acceptance test driven development.
- Worked with **Jenkins tool** for achieving the **Continuous Integration**.
- Experience in designed Functional decomposition **TestNG framework**.
- Expertise in locating elements using **XPATH** and **CSS**.
- Excellent working experience of Software Development Life Cycle (**SDLC**), Software Testing Life Cycle (**STLC**) and testing methodologies like Waterfall & Agile/Scrum.
- Performed cross browser testing by using **Selenium Grid** on multiple browsers and on different platforms.
- Worked With selenium grid to achieve parallel execution.
- Experience in creating and executing scripts in parallel and sequential using **Web driver-TestNG** with Java.
- Collaborating with developers and other stakeholders to identify and resolve defects and issues
- Creating and executing test plans and test cases to ensure **API** functionality and performance
- Conducting **API** testing using tools such as **Postman** and **Rest Assured**.
- Experience on Writing **SQL** queries to extract data from various source tables to perform database testing
- Experienced in designing and implementation of Various Frameworks in Selenium.
- In Postman, assertions are used to validate response information and status codes.
- Using **POSTMAN**, handle and test cookies in requests to **APIs**.
- Utilizing the **Rest Assured API** to test and handle various API error types.

PROJECT I - NISBETS

Domain : Ecommerce

Testing Approach : Automation
(Hybrid Framework)

Tools Used : Java Selenium, BDD Cucumber, API (Postman), API(Rest Assured), Jenkins, Github, SQL, Jenkins.

Role : Automation Engineer

Duration : From May 2022 to Present

SKILLS

- Java Selenium
- BDD Cucumber
- Postman
- Rest Assured
- Jenkins
- API

PROJECT II - MAPFRE

Domain : Insurance

Testing Approach : Automation & Manual

Tools Used : Java Selenium, TDD TestNg, Manual, Jira, Software Development Life Cycle, Software Testing Life Cycle, Agile, Regression Testing.

Role : Automation Engineer

Duration : From April 2021 to April 2022

SKILLS

- Java Selenium
- BDD Cucumber
- Postman
- Rest Assured
- Jenkins
- API

DESCRIPTION

Nisbets is multinational distributor to the food-service sector. The company develops, retails and distributes commercial kitchen equipment, catering supplies and other hospitality products and services to hotels, restaurants, bars, cafes, schools and colleges.

ROLES AND RESPONSIBILITIES

- Reviewed all the Requirement documents, Functional Specification and Use Case documents.
- Analyzed the use cases provided by analysts and wrote test cases.
- Implemented automation using **Selenium WebDriver, JAVA, Selenium Grid, Cucumber, Maven**.
- Expertise in developing automation scripts in BDD format using cucumber and proficient in writing cucumber scenarios in
- **GHERKIN** format.
- Developed the features, scenarios, step definitions for BDD (Behavior Driven Development)
- Involved in analyzing and feasibility check of a newly added functionality for automation.
- Design and implement Hybrid Driven Framework approach using Selenium Web Driver.
- **Hooks in Cucumber** can be used to set up and tear down resources before and after scenarios.
- Performed **Back-End Testing** for data validation using **SQL Queries**.
- Executed automated tests on Continuous Integration environment (**CI**) using **Jenkins**.
- Strong experience in Black Box and Gray Box testing. used **JIRA** as Defect
- Used Java to develop Automation framework to Validate **RESTful Web Services**.
- Tested the application in highly dynamic environment with sprint team using agile methodology.
- Automated **Regression** Test cases using Selenium Web Driver, **Jenkins** and **Maven**. Used Firebug and Fire Path plug-ins to find the elements on the web page based on the element locator ID, Name, Xpath, Class Name, Path, Link Text, Partial link Text and **CSS Locator**.
- Using **POSTMAN**, handle and test cookies in requests to APIs.
- Utilizing the **Rest Assured API** to test and handle various API error types.
- **Jenkins** allows for the customization of regression test scenarios through the setting of parameters for builds.

DESCRIPTION

MAPFRE Insurance writes property and casualty insurance in 19 states across the United States through a network of more than 4,200 independent agents and brokers. MAPFRE Insurance provides a full range of insurance products, including coverage for automobiles, homes, motorcycles, watercraft, and businesses, as well as term life insurance.

ROLES AND RESPONSIBILITIES

- Verifies specific functionality after changes or fixes are made while perform **Manual Testing**.
- In Release Notes, we use headings and subheadings to structure the content.
- In Test Design, conditions that must be met before executing the test case.
- Test Plan specifies the goals of testing, including what you want to achieve and verify.
- In **TestNG**, a test method will only be executed if its dependencies are successful.
- Groups help in selectively running tests based on categories in **TestNG**.
- **Selenium WebDriver** can perform data-driven testing by integrating with external data sources.
- handling of cookies and managing session data can be done by **Selenium WebDriver**.
- Maven enforces best practices and conventions for project structure.
- Strong experience in **cross browser, cross platform web testing with Selenium Web Driver**.
- In Test Design, conditions that must be met before executing the test case.
- Experience with **Agile Scrum** and **Waterfall** and **TDD** (Test Driven Development) methodology.
- **Test Plan** specifies the goals of testing, including what you want to achieve and verify.
- In TestNG, a test method will only be executed if its dependencies are successful.
- Groups help in selectively running tests based on categories in **TestNG**.
- handling of **cookies** and managing session data can be done by **Selenium WebDriver**.
- **Maven** enforces best practices and conventions for project structure
- Executed automated tests on **Continues Integration environment** (CI) using **Jenkins**
- Selenium WebDriver can perform data-driven testing by integrating with external data sources.

DECLARATION

I hereby declare that all the information given above is true and correct to the best of my knowledge.

Your faithfully
(Jayasurya)
