Education

2012

M.Sc Computer Science

Loyola College

2010

B.Sc Computer Science

Loyola College

Technical skills

- Performance testing using JMeter
- Manual testing in Web and mobile application testing
- Agile Methodology (Scrum)
- SDLC and STLC Lifecycle
- Functional testing
- System and regression testing
- Performance testing
- App responsiveness testing
- OTT web and mobile testing
- BrowerStack - cloud web and mobile testing
- SQL
- Azure dev ops

Experience

Feb 2024 - Present Shellsquare Softwares

Test Lead

Projects: GMM, iETP, and RTS/PE Connector projects.

- Involved in the proposal writing for test-related activities, Providing estimation for the testing requirements and allocation of resources and providing walk-throughs on requirements to the testing team. Designing test plans, scenarios, and test cases.
- My expertise spans performance testing using **JMeter**, API testing using the **POSTMAN** tool, SOAP and REST API testing using the **iETP** tool, DB testing, functional, UAT, and regression testing.
- Reviewing test cases and assisting the development team in fixing defects in JIRA and following Agile methodologies.
- Provided support in the performance testing using JMeter tasks includes developing test plans, test scripts, and reports and monitoring the results and evaluating them.
- Presently working in an Azure devops and Agile development environment. Participate in weekly Scrum meetings for the applications development.
- Good experience in using **PerfMon** metrics, AppDynamics and Grafana Dashboard using InfluxDB in monitoring business transaction across all tiers (web/app/DB) of the applications.
- Create, schedule and run the scenarios using JMeter and generate necessary graphs.
- Extensively worked on JMeter to create Thread Groups and test Mobile and Web Application for various loads on key business scenarios
- Communicating status reports on a daily, weekly, and monthly basis.
- Defect summary reports are consolidated and circulated.
- Preparing the release documents for the client.

Feb 2022 - Feb 2024 Impiger Technologies Pvt. Ltd

QA Lead

Projects: TVS Digital mobile application, BECKMANN-NBS Project, BOS Acceptance, and SUN NXT-APP PROJECT.

- Involved in the proposal writing for test-related activities, providing estimation for the testing requirements and allocation of resources.
- Facilitating meetings with multiple stakeholders and clients.
- Providing walk-throughs on requirements to the testing team. Designing test plans, scenarios and test cases.
- My expertise spans performance testing using **JMeter**, API testing using the **POSTMAN** tool, web and mobile application testing, DB testing, functional, UAT, and regression testing.
- Experience in Browser stack for cross-browser testing in manual testing

Tools & Database

- JMeter
- JIRA
- API testing using POSTMAN
- AppDynamics
- Grafana using InfluxDB
- Jenkins
- CI/CD - Docker
- Mantis BT
- Microsoft SQL server, MySQL
- Azure Devops

Behavioral Skills

- Team management
- Communication
- Conflict handling
- Critical thinking
- Process and delivery oriented
- Time and resource management
- Training team members
- Team work
- Delivery handling.
- Distribution of task
- Negotiation

- Provided support in the performance testing using JMeter tasks includes developing test plans, test scripts, and reports and monitoring the results and evaluating them.
- Presently working in an Azure devops and Agile development environment. Participate in weekly Scrum meetings for the applications development.
- Good experience in using PerfMon metrics, AppDynamics and Grafana Dashboard using InfluxDB in monitoring business transaction across all tiers (web/app/DB) of the applications.
- Reviewing test cases and assisting the development team in defect fixing.
- Involving the daily scrum and weekly scrum, sprint meetings, retrospective meetings and defect review meetings.
- Perform App responsiveness and load Testing in the different networks (3G, 4G and 5G). Analyse the app responsiveness and performance reports.
- Testing the API request through the POSTMAN tool and SQL database testing.
- Sanity testing in UAT environment.
- Videos streaming(playback) testing all platforms(Android, IOS, TV). Audio and Subtitle Sync up testing all platforms. Playback testing different networks (Wi-Fi, 4G, 5G) and Functional testing.
- Involved in functional testing and benchmark testing in the OTT apps.
- Production support.
- Customer communication on testing deliverables and defect reports.

○ Jan 2016 - Feb 2022

Notion Press Media Pvt Ltd

Senior Quality Assurance Engineer

Project: Notion press web and mobile application, Dashboard and ARM internal toolBookpostr, Writing tool and Cover application, and Mobile application (Bynge app)

- Lead testing team and provided understanding on requirements.
- Designing test scenarios, and cases. Finalizing the P1, P2 and P3 scenarios in the project. Test case reviews and coordinate with the development team in defect fixing.
- Conducting daily and weekly QA status meetings for the project.
- Experience in testing E-commerce websites, and CRM internal applications such as ARM tool, Writing tool, Cover app, book store, customer dashboard, vendor support, and payment gateways.
- My expertise spans performance testing using **JMeter**, API testing using the **POSTMAN** tool, manual testing like functional testing, and experience in the browser stack for cross-browser testing in manual testing.
- Mobile application (Bygne app) and mobile compatibility testing, cross-browser testing, Device capability testing and Regression testing.
- Following the Agile Methodologies.

○ April 2015 - Dec 2015

The Research suite technologies.

Associate Programmer - Survey programming

- Prepare the test case and test data for the given survey.
- Testing the survey programming.
- Testing the web application and reporting defects.
- Report the defects by using the defect tracking system in maintaining an Excel sheet
- Prepared the defect summary.

○ Feb 2013 - Mar 2015

Core Mind Research Private Limited Company

Junior Programmer

- Tested the survey programming with problem-solving skills that allowed me to test the software, identify the bugs and solve errors.
- The test report will be shared with my respective lead.
