EDUCATION

2014 - 2018

B.TECH (ECE)

Ponnaiyah Ramajayam Institute of Science & Technology, Thanjavur.

SKILLS

- Selenium WebDriver with Java.
- Cucumber-BDD, TestNG-TDD.
- POM, Data Driven.
- JIRA, Git, Jenkins, SQL.
- Postman & Rest Assured.

CAREER OBJECTIVES

"Experienced Software Tester with a strong background in manual and automation testing, seeking to leverage expertise in test planning, defect tracking, and quality assurance methodologies to ensure the delivery of high-quality software solutions. Passionate about improving software reliability, optimizing testing processes, and contributing to the success of agile development teams."

PROFILE SUMMARY & WORK EXPERIENCE

Techasoft Pvt. Ltd., Bengaluru.

Sep 2020 to Present

Software Test Engineer

- **4.5 Years** of experience in **Manual & Automation** Testing across web applications.
- Proficient in **Selenium WebDriver** with **Java** for UI automation.
- Good in writing **Test Plans**, **Test Cases**, **Test Scripts**, and **Test Reports**.
- Strong understanding of **SDLC** (Software Development Life Cycle), **STLC** (Software Testing Life Cycle), and **Defect Life Cycle**.
- Hands-on experience in **Cucumber** (BDD), **TestNG** (TDD), **JUnit**, Page Object Model (**POM**), **Data-Driven** Framework.
- **Implemented** Behavior-Driven Development (**BDD**) using **Cucumber** with **Gherkin** syntax for better readability and collaboration.
- Developed **TestNG**-based automation framework for structured and efficient **Test Execution**.
- Experience with **Jenkins** for test automation execution in **CI/CD** pipelines.
- Configuring **Git & GitHub** for **version control** and repository management and to **Resolving the Conflicts**.
- **JIRA** expertise for defect logging, tracking, and test case management.
- Proficient in **Maven** for project build and dependency management.
- Experienced in **Agile Methodologies** including Scrum, participating in Sprint **Grooming** to **Retrospective** meetings.
- Strong knowledge of **SQL** for backend database validation.
- Hands-on experience in **Functional**, **Regression**, System, **Integration**, **Smoke**, **Sanity**, **Compatibility** testing.
- Good knowledge in **REST Assured** for **API** automation and **Postman** for manual API testing.

PROJECT EXPERIENCE

Project #2: Finish Line (USA)

Description: Finish Line, Inc. is an American retail chain that sells athletic shoes and related apparel and accessories owned by JD Sports. The company operates 288 stores in 40 states.

Duration: Jan 2023 to Present

Role: Automation & Manual Testing

Roles & Responsibilities:

- Understand of **Business Requirements**, **User Stories**, and **Acceptance Criteria**.
- Create and execute detailed **Test Cases** for different **Workflows** like product search, cart management, checkout, product filtering, user authentication, discount application, payment, order tracking, and returns.
- Identify, document, and report defects in **JIRA** with detailed reproduction steps, logs, and screenshots.
- Develop a robust automation framework using **Selenium WebDriver**, **Cucumber (BDD)**, **Page Object Model (POM)**, and **Data-Driven Testing**.
- Created **Feature Files** with **Scenarios**, **Scenario Outline**, **Given-When-Then** steps for structured test execution. Developed **Step Definitions** in **Java** to automate test steps using **Selenium WebDriver**.
- Execute automated tests using **Maven** and generate reports using **Cucumber JVM Report**.
- Worked on **Parallel Execution** and **Cross Browser** verification using **TestNG** & **Maven Surefire Plugin** to optimize execution time.
- Integrate **Data-Driven Testing** using **Apache POI** to fetch test data from Excel.
- Maintain test scripts in **Git/GitHub** and collaborate with the development team.
- Integrate **Jenkins** for automated test execution and reporting in the CI/CD pipeline.
- Hands-on with **SQL queries** to **Read**, **Write** the data's in Data Base.
- Active participation in daily **stand-ups**, sprint **planning**, sprint **reviews**, and **retrospectives**.
- Created automated tests for **RESTful APIs** using **REST Assured** with Java and **Postman** tool with different **HTTP** methods like **POST**, **GET**, **PUT**, **DELETE**,

Project #1: Boost (USA)

Description: Boost is a food ordering application that allows you to pre-order and pre-pay for your food purchases on campus, using your Dining plan or Trent Cash. Order ahead. Save time by pre-ordering your favorite meals, snacks, and drinks from your campus, on your browser.

Duration: Sep 2020 to Dec 2022

Role: Automation & Manual Testing

Roles & Responsibilities:

- Understand of **Business Requirements, User Stories, and Acceptance Criteria**.
- Identify functional and edge case scenarios for test coverage. Identify positive and negative test scenarios for various modules.
- Develop **Test Scenarios**, and **Test Cases** covering order placement, payment processing, restaurant management, user accounts, and delivery tracking.
- Design and develop a **Selenium WebDriver** automation framework using **TestNG**, **POM** (Page Object Model), and **Data-Driven** Testing.
- Maintain **Reusable Page Objects** and utility functions for different modules.
- **Automate Test Cases** for user login, restaurant selection, adding items to cart, applying coupons, placing orders, and payment validation.
- Use **Data-Driven** Testing (**Apache POI**) to fetch test data from Excel for order scenarios.
- Execute automated test scripts in **TestNG** and generate reports using **TestNG HTML Reports & Extent Reports**.
- Configure parallel execution in **TestNG XML** for optimizing test runs.
- Used **JIRA** as a defect tracking tool to **Raise, Track** and **Closure** the tickets.
- Use **Git & GitHub** for version control, maintaining test scripts and collaborating with the team.
- Worked with **Agile Testing** process and attended different meetings like **Daily Standup, Grooming, Planning, Review** and **Restrospective**.
