Education

Jerusalem college of engineering, Anna University

Bachelor of engineering in Computer Science

Sep. 2019 – April 2023

Chennai, Tamilnadu

Relevant Coursework

- Automation Testing
- Software Testing
- Manual Testing
- Java
- Agile Methodology
- API Testing
- Performance Testing
- Excel

Experience

Piccosoft Software Labs India Private Limited

December 2023 – May 2025

Software Quality Assurance Tester

Chennai, Tamil Nadu

- Successfully developed and implemented comprehensive automation frameworks from scratch, enhancing testing efficiency and effectiveness using Selenium WebDriver, Java, and TestNG.
- Managed and executed test plans and strategies for e-commerce, SaaS applications, and CMS school management systems, ensuring high-quality software delivery within project timelines.
- Performed API testing using Postman and RestAssured, validating RESTful endpoints and integrating API tests into CI pipelines for faster defect detection.
- Conducted performance and load testing using JMeter and BlazeMeter, analyzing results to optimize application scalability and reliability.
- Collaborated closely with Agile teams for sprint planning, daily stand-ups, and retrospectives to ensure smooth development and testing cycles.
- Utilized Git and GitHub for version control, Jenkins for continuous integration, and Jira for defect tracking and sprint management.

Projects

E-commerce Automation Framework | *Selenium, Java, TestNG, Jenkins*

March 2024 – August 2024

- Designed and implemented a scalable automation framework from scratch to validate UI and API workflows for an e-commerce platform.
- Integrated test scripts with Jenkins to enable continuous integration and reporting of test results.
- Reduced manual regression testing time by 60% through automation of critical user journeys such as product search, cart management, and checkout.

API Testing for SaaS Application | *Postman, RestAssured, Java*

September 2024 – December 2024

- Developed comprehensive API test suites using Postman and RestAssured to validate RESTful endpoints for a SaaS application.
- Implemented data-driven testing to validate multiple scenarios and edge cases, ensuring API robustness and reliability.
- Automated API tests as part of the CI pipeline, leading to faster detection of backend issues during development cycles.

CMS School Management System Mobile Testing | *Manual Testing, Android/iOS*

January 2025 – April 2025

- Performed functional and usability testing on the school management system mobile app across Android and iOS platforms.
- Collaborated with developers and product owners in Agile sprints to ensure timely delivery and quality of new features.
- Documented and tracked bugs using JIRA and ensured resolution within sprint timelines.

Performance Testing Using JMeter and BlazeMeter | *JMeter, BlazeMeter*

May 2025

- Executed load and stress testing for e-commerce and SaaS applications to assess system scalability under peak loads.
- Analyzed performance metrics and collaborated with the dev team to optimize bottlenecks and improve response times.

Technical Skills

Languages: Java,

Testing Tools: Selenium WebDriver, Postman, RestAssured, JMeter, BlazeMeter

Frameworks: TestNG, Maven

Technologies: API Testing, Mobile Testing (Android/iOS), Agile Methodology

Version Control: Git, GitHub

Others: Excel, Jira, Windows, Linux
