

# JYOTHI ADITHYA K

17/9, Venkatesa bathan street, Vepery, Purasaiwalkam, Chennai-600007

☎ +91-8608149739 ✉ [adithyasivam@gmail.com](mailto:adithyasivam@gmail.com) [www.linkedin.com/in/adithya262001](https://www.linkedin.com/in/adithya262001)

## Education

**Jerusalem college of engineering, Anna University**

*Bachelor of engineering in Computer Science*

**Sep. 2019 – April 2023**

*Chennai, Tamilnadu*

## Relevant Coursework

- Manual Testing
- API Testing
- Performance Testing
- Mobile Testing
- Java
- Agile Methodology
- SQL
- Defect Tracking

## Experience

**Piccosoft Software Labs India Private Limited**

**December 2023 – May 2025**

*Performance Test Engineer*

*Chennai, Tamil Nadu*

- Designed and executed comprehensive performance and load testing strategies for e-commerce, SaaS, and CMS platforms to evaluate system scalability and reliability.
- Developed and maintained JMeter scripts simulating realistic user scenarios including login, product search, checkout, and data synchronization workflows.
- Executed distributed load and stress tests using BlazeMeter, collecting and analyzing key performance indicators such as response times, throughput, and error rates.
- Collaborated with developers, architects, and product managers to identify bottlenecks, optimize performance, and validate improvements across Agile sprints.
- Actively upskilling in LoadRunner scripting and Dynatrace monitoring to expand performance engineering capabilities in enterprise environments.

## Projects

**E-commerce Platform Performance Testing** | *JMeter, BlazeMeter, Jenkins*

**March 2024 – August 2024**

- Designed and implemented JMeter scripts simulating critical user workflows including product search, cart management, and checkout under peak load conditions.
- Executed distributed load and stress tests using BlazeMeter to assess system scalability and responsiveness.
- Integrated performance test execution with Jenkins pipelines to enable continuous performance validation.
- Analyzed KPIs such as response time, throughput, and error rate; prepared detailed reports and presented findings to stakeholders.

**SaaS Application Performance Assessment** | *JMeter, BlazeMeter*

**September 2024 – December 2024**

- Developed comprehensive performance test plans to evaluate API and end-to-end workflows of a subscription-based SaaS platform.
- Simulated concurrent user loads to identify performance bottlenecks and validate system reliability.
- Collaborated with development teams to prioritize performance improvements and re-test optimized scenarios.

**School Management System Performance Optimization** | *JMeter, BlazeMeter*

**January 2025 – April 2025**

- Created load testing scripts targeting key mobile app functionalities to measure performance under concurrent usage.
- Executed tests and analyzed results to recommend optimizations improving response times and resource utilization.
- Documented performance testing outcomes and ensured alignment with non-functional requirements.

**Continuous Performance Engineering Initiatives** | *JMeter, LoadRunner, Dynatrace*

**May 2025 – Present**

- Developing expertise in LoadRunner scripting to extend performance testing capabilities across enterprise-grade applications.
- Learning Dynatrace for advanced application performance monitoring and root cause analysis.
- Designing reusable performance test frameworks to support continuous performance validation pipelines.

## Technical Skills

**Performance Testing:** JMeter, BlazeMeter, LoadRunner, Dynatrace

**Languages:** Java

**API Testing:** Postman, RestAssured

**Technologies:** Manual Testing, API Testing, Performance Testing, Mobile Testing, Agile Methodology

**Version Control:** Git, GitHub

**Others:** Excel, Jira, Windows, Linux
