WORK EXPERIENCE

QA Lead

Kissflow, Orangescape Technologies

02/2022 - Present

Chennai, India

Roles & Responsibilities

- Standardized the QA activities from Test Case template, Test Plan and Executions through the best practices ideal for functional testing.
- Create and maintain Quality metrics dashboards, Execution Reports including the KPIs for executive reporting and team efficiency.
- Prepared defect metrics for each feature release and collaborated with stakeholders to identify underlying causes and opportunities for improvement.
- Streamlined the incoming Production Defects Process and implemented various strategies to overcome the areas for focussing during test execution.
- Designed Defect Metrics using Looker Studio to discover root causes that are spread across multiple teams, and improved the defect trend using various approaches.
- Planned and executed methods to test for Migration of application versions and PWA applications.
- Conducted weekly cross-team updates along with knowledge sharing to align within the squads.
- Design and implemented common regression week for testing across various teams in coordinating the changes which reduce the effort of repetitive testing through Functional and Automation testing.
- Conducted Internal Audits within the team prior to the External Audit Certification to validate all the supporting documentation.

Senior Automation Test Engineer

Wolters Kluwer, ELM Solutions

05/2015 - 02/2022

Chennai, India
