CAREER SUMMARY

- Leveraged 4 years of experience to contribute significantly to the company's digital operations and product quality and executing automated test scripts.
- Specialized in annotating data accurately, ensuring high-quality input for machine learning.
- Conducted thorough audits to verify the correctness of annotations, maintaining stringent quality standards.
- Performed comprehensive test cases on the Astro device, ensuring functionality and identifying potential issues.
- Understanding in SDLC and STLC methodologies including agile and waterfall with a focus on integrating automated testing.
- Identified and implemented process improvements to increase efficiency and accuracy in annotation and auditing tasks.
- Good knowledge on creating and debugging test scripts and Automation Framework.
- Adapted to evolving technologies and methodologies, staying current with industry trends and innovations.
- Experience in Defect tracking tool (Jira) and providing efficient reports on defect status.
- Having experience in requirement gathering for new modules and enhancements.
- Identified and reported bugs, contributing to product improvement.
- Having experience in lead the team.

PROFESSIONAL SUMMARY

Name Of the Company	Designation	Address of the Employer	From	To	Duration (Years)
Amazon Development Centre	Digital Associate	TIDEL Park, 7th Floor Infinity tower, Tata, Ramanujan IT City, SEZ, Rajiv Gandhi Salai, near Taramani, Chennai, Tamil Nadu 600113	Aug 2020	Present	4

SOFTWARE EXPERTISE

OS	:	Windows, Linux
RDBMS	:	SQL
Languages	:	Java
Testing Tools	:	Selenium Web Driver, Git,
Frame Work	:	Cucumber

WORK EXPERIENCE

Project	:	1
Role	:	Device and Software Tester.
Responsibilities:		1. Tested the application using Black Box Testing Techniques 2. Collaborated closely with development teams to understand software requirements and report issues effectively. 3. Created, Updated and Revied of test cases and test scenarios 4. Executing test cases based on user stories in JIRA 5. Maintained meticulous documentation of test results, issues, and resolutions, ensuring transparency and traceability 6. Developed and maintained automated test scripts to enhance efficiency and effectiveness across operations team and testing team. 7. Worked closely with developers, project managers, and other stake holders to ensure a seamless integration of quality throughout the development lifecycle. 8. Developed and executed comprehensive test plans for new features and product releases and presented with dev team. 9. Collaborate with cross-functional teams to identify, document, and resolve software defects. 10. Support to end-user (application users).
Duration:		From February 2023 to Present
Description:		Amazon Astro is a home robot designed for home security monitoring, remote care of elderly relatives, and to act as a virtual assistant that can follow a person from room to room. The Astro has visual ID and should be able to recognize different family members and send an alert if the device sees someone in the home it does not recognize.

Project : 2
Title : **Leica Tags**
Platform : Linux
Role : Digital Associate

Responsibilities:

1. Ensure proper configuration of docker container for annotation.
2. Troubleshoot and resolve issues related to docker containers and their dependencies.
3. Set up and manage docker containers to create a reproducible and isolated annotation environment.
4. Collaborate with Quality assurance engineer to maintain accuracy and improve annotations tools and workflows.
5. Accurately Annotate images and video frames with April tags.
6. Collaborate with team members through JIRA and report on status, including identifying and addressing any blockers.
7. Performed human and segmentation annotation.

Duration: From August 2020 to January 2023

Description: Leica Tags is a tool in computer vision for robust and efficient localization and tracking. They are widely used in various applications, from robotics to augmented reality, and can significantly enhance the accuracy and efficiency of annotation tasks.

PROFESSIONAL QUALIFICATION

- **Bachelors in Mechanical Engineering (B.E)** from **Rajalakshmi Engineering College**, Chennai, Tamil Nadu, India, 2019

TECHNICAL TRAINING ATTENDED

- ♦ Automation testing using Selenium with java in BESANT Technologies

DECLARATION

I hereby declare that the above-mentioned is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
