---

## **Objective :**

To leverage over 2 years of experience in manual testing, automation, performance testing, and security testing to drive software excellence. Focused on improving testing processes, optimizing CI/CD pipelines, and ensuring high-quality software delivery through efficient strategies and rigorous validation.

---

## **Work Experience - Junior Test Engineer**

- Analyzed the requirements and created a detailed test plan, including test scenarios for functional, integration, regression, smoke, sanity, exploratory, and over-testing across web, Android, and iOS platforms.
  - Executed test cases in parallel and tracked defects using JIRA, Azure DevOps, and Pivotal Tracker, reporting defects using defect leakage formula.
  - Performed automation testing with tools such as Katalon, TestComplete, Selenium, and Java, Python using vscode, Playwright and frameworks like Cucumber, TestNG, as well as keyword-driven and data-driven frameworks.
  - Integrated automation tests into CI/CD pipelines for continuous testing and automated report generation.
  - Performed cross-browser testing, parallel execution, and ensured application compatibility across different platforms using Katalon Test Cloud.
  - Used the Page Object Model (POM) in Selenium and Java for maintainable tests.
  - Led load, stress, and endurance tests, analyzing performance metrics and identifying bottlenecks.
  - Led security assessments and penetration tests, collaborating with developers to fix vulnerabilities.
  - Managed test data and executed parallel test execution for fast feedback during regression testing.
  - Performed API testing with Postman, verifying response status codes and API bodies, such as JSON, XML, and multi-part form data.
  - Conducted manual testing for the accuracy of ChatGPT and AI/ML models and attempted to automate the process to assess their accuracy.
- 

## **Organisation Details:**

- **Optisol Business Solution** *August 2023 - August 2024*
  - **IVY Mobility Solution Pvt Ltd** *September 2021 - November 2022*
-

***Skills:***

- **Automation Tools:** *Katalon, Test Complete, Selenium and Java, python, playwright*
- **Mobile Automation Testing:** *Appium (Locators)*
- **Desktop Automation Testing :** *WinApp Driver and Sikuli*
- **CI/CD:** *Jenkins, CI/CD Pipelines, Azure DevOps*
- **Testing Frameworks:** *BDD(Cucumber), TestNG, Hybrid and Robo frameworks*
- **Testing Approaches:** *Data-driven and Keyword-driven*
- **Performance Testing:** *JMeter, Blaze Meter*
- **Security Testing:** *OWASP and Burp Suites*
- **AI/ML Models:** *AI/ML Models, NLP, Computer Vision, Forecasting, Reinforcement Learning*
- **Technologies:** *GPT-4, BERT, T5, Scanflow AI*

---

***Domains:***

- Open AI
- Scanflow AI
- Import C Export (Good C Services)
- Job Portal
- Education
- Admin Pannel

---

***Educations:***

**Master of Computer Applications (MCA)**  
Meenakshi College for Women, 2017 - 2020

**Bachelor of Computer Applications (BCA)**  
SSS Jain College, 2014 - 2017

---
