Krishna Patil

Performance Test Engineer

Performance tester with strong knowledge in performance testing concepts and responsible for ensuring the quality and efficiency of a software application. Able to function effectively as a team member and independently. I am adaptable and quick learner i can assure my personal and professional growth because i have what it takes to forge a successful path for the organization and my future.

Experience

2021 - 2023

ArisGlobal Software Pvt ltd - Mysuru

Associate Quality Engineer

Projects: Pharmaceutical Application PE

- Handled one complete pharma product performance testing from scratch till reporting.
- worked closely with product team people to gather the NFR's and other Non functional requirements.
- Handled the Truclient protocol scripting to identify the bottlenecks in advance for the releases.

Roles & Responsibilities

- Creating Test plan and Requirement Gathering.
- Review NFRs for every release based on the new functionalities and changes to existing functionalities.
- Estimation and strategy.
- Understanding the application, scenarios, transaction per second SLOs.
- Script development using Load Runner, NeoLoad and Jmeter.
- Test Execution.
- Monitoring and identifying Bottlenecks using Dynatrace, CloudWatch, Datadog.
- Recommended architectural changes based on load test and Dynatrace analysis.
- Help team members for technical related issues.
- creating user stories for PE activities in Jira.
- Coordinating with development people for performance tuning of bottlenecks.
- Server Resource utilization analysis.

Expertise

- Strong Knowledge in performance Scripting, Execution, Monitoring, Analysis and Load generating for web base applications.
- Proficient in - Application Performance Management tools like App Dynamics and Dynatrace and Load testing tools like Micro Focus Load Runner, Neoload and JMeter.
- Approaches - Load Generation, Performance Bottleneck Identification and RCA (Root Cause Analysis)
- Worked on Performance testing of on-premises, AWS, OpenShift and Azure.

Key Skills

- Expert in Performance engineering and Bottleneck Analysis.
- Proficient in Load Runner, JMeter and Neo Load. Hands on proficiency in Web http/html, Web Services, Ajax True Client, Real Browser (In Neo load).
- Proficiency in Dynatrace, AppDynamics, CloudWatch, DataDog.
- Recommendations around Capacity Planning an Architectural tweaks.
- CI/CD- based PT using Jenkins.
- Proficient in Heap memory analysis, Thread dump analysis.
- Worked on Agile and Waterfall methodologies.

Skill-Set

- Performance /Load testing Tools
 - Load Runner (2 years).
 - NeoLoad (2 years).
 - Jmeter (1 years).
- APM Tools
 - Dynatrace (2 Years).
 - CloudWatch (2 Years).
 - DataDog (2 Years).
- CI Tools
 - Jenkins (2 Years).
- Other Tools
 - JIRA (2 Years).

Certifications

- Udemy
 - JMETER- Master Performance & Load Testing (Basics + Advance) - FEB 2023.

Personal Details

Name : Krishna Patil
DOB : 04 November 1999
Gender : Male

Declaration

I hereby declared that all the information furnished above is true to the best of my knowledge.
