Programming Language: **Core Java**

Database: Oracle 10g

Automation Testing Tool **Selenium WebDriver, TestNG& Skuli**

Test Management Tools: BugZilla

Exposure on Tools: Maven, Jenkins

Project Experience

1. Adactin Booking System

Description:

Using this system user can view and check for various rooms available and simultaneously book them by making online payment via credit card. The system calculates the total cost on booking the services. Once the user makes the payment, system will provide online receipt to the user. User can view the room booking in an effective graphical user interface. Since room bookings will be displayed in effective graphical user interface user will get to know which rooms are booked and how many rooms are available for booking. Using this application user can select the room according to his preference. The rooms which are already will be disabled and the rooms which are available user just have to select it and then proceed to payment option. Once user makes the payment system will generate receipt and it will be sent to respective users email id and it will be reported to the admin, when user visits the hotel, he must show the receipt for the accommodation.

Roles and Responsibilities:

- Understanding the Requirements and Functional Specifications of the Project.
- Identified Test Scenarios required for testing
- Prepared and Executed Test Cases as per System Requirements.
- Defect Reporting and Tracking using Bugzilla
- Test Management (Test Case Execution and Defect Reporting).
- Extensively performed Manual Testing process to ensure the quality of the software.
- Selenium was used to generate automated test scripts for functionality.
- Created automation scripts based on Hybrid Framework.

Environment:

Selenium WebDriver, Java, JSP, Servlets, Track+, BugZilla.

2. HRMS - Manual and Automation Testing

Client: Naresh i Technologies

Description:

HRMS comes as a comprehensive solution for the efficient management and development of your Human Resource. It will assist you in the complex and strategic process of managing this crucial resource of your enterprise. Based on modular architecture, it facilitates a vast range of HR activities, with features that reflect the main HR management activities.

Roles and Responsibilities:

- Understanding the Requirements and Functional Specifications of the Project.
- Identified Test Scenarios required for testing
- Prepared and Executed Test Cases as per System Requirements.

Environment:

WebDriver, TestNG, Java, JSP, Servlets, BugZilla.

Declaration

I hereby declare that the information furnished above is true to the best of my knowledge.
