Professional Summary

- Seasoned Test Manager with 20 years of experience in Quality Assurance, Test Management, and Project Delivery across domains.
- Strategic Test Management – Expertise in defining and implementing end-to-end test strategies, ensuring seamless execution of manual, automated and performance testing to meet business and technical requirements using Agile, Scrum methodologies.
- Cross-Functional Collaboration – Strong communicator, working closely with development, product, and business teams to align testing efforts with organizational goals and ensure smooth defect resolution.
- Leadership & Mentorship – Skilled in building, leading, and mentoring high-performing testing teams, driving continuous improvement, and ensuring adherence to best practices in Agile & DevOps environments.
- Quality Metrics & Risk Management – Expert in tracking key QA metrics (KPIs), identifying risks early, and driving process optimization to enhance overall software quality and customer satisfaction.
- Adopt in managing cross-functional global teams, handling resource allocation, capacity planning, performance appraisals, and team mentoring.
- Expertise in test automation frameworks (Selenium with Java/TestNG, BDD with Cucumber), and integrating them into CI/CD pipelines using Jenkins, Git.
- Skilled in using JIRA, Zephyr, TestRail, HP ALM, and Xray for test management, defect tracking, and reporting quality metrics.
- Strong in stakeholder management, business communication, and risk-based testing, ensuring timely and high-quality software deliveries.
- Proficient in test process optimization, governance, and driving QA transformation initiatives across complex portfolios
- Conducted comprehensive testing of Gen AI Agents designed for prompt generation to retrieve data from Large Language Models (LLMs).
- Validated the accuracy, relevance, and consistency of LLM responses based on various prompt scenarios.
- Verified the correct storage of retrieved data in databases and ensured accurate graphical representation for data visualization and reporting

Professional Experience

Quality Engineering Manager | [Accenture] [Chennai] | [Feb / 2019] – Present.

- **Leadership & Strategy:** Successfully led and managed multiple enterprise-level projects, handling large members **team** across functional, automation, and performance testing. Defined and executed **comprehensive test strategies** ensuring alignment with business objectives, regulatory compliance, and quality standards.
- **Test Governance & Quality Assurance:** Established and implemented **end-to-end testing processes**, driving efficiency and ensuring seamless software delivery within tight deadlines. Proactively mitigated risks through structured test planning and defect management.
- **Test Automation & Tooling:** Spearheaded the **design and deployment of automated testing frameworks**, reducing testing time by **80%** while enhancing test coverage and reliability. Expertise in Selenium, JIRA, QTest, and integration with CI/CD pipelines.
- **Cross-Functional Collaboration:** Partnered with **development, DevOps, and product teams** to drive early defect detection and resolution, resulting in a **95% improvement in product quality**. Ensured seamless requirement coverage and stakeholder alignment.
- **Process Optimization & Innovation:** Continuously improved **testing methodologies**, adopting **best practices** from Agile, DevOps, and shift-left testing to enhance efficiency. Evaluated emerging **test automation tools** and frameworks to future-proof testing processes.
- **Metrics & Reporting:** Designed and tracked **key test metrics (KPIs)** to measure test effectiveness and efficiency, providing **data-driven insights** to senior management for informed decision-making.
- **Agile & DevOps Transformation:** Championed the adoption of **Agile testing practices**, integrating testing into CI/CD pipelines and promoting **continuous testing, adaptive planning, and rapid feedback loops**.
- **Resource & Team Management:** Led test resource planning, skill gap analysis, and upskilling initiatives, ensuring the team is equipped with the latest testing methodologies and tools. Facilitated **mentorship programs and technical training** to build high-performing test teams.
- **Stakeholder Communication & Risk Management:** Ensured proactive risk identification and mitigation while effectively communicating test progress, risks, and recommendations to **C-level executives, project managers, and business stakeholders**.

Projects:

1. **EPC** (Zafin Pricing & Billing platform)
2. **UNILEVER** (E-Commerce Platform)
3. **USAA** (Insurance Domain)
4. **Dyson** (E-Commerce Platform)
5. **FEDEX** (E-Commerce Platform)
6. **NatWest** (Banking – Mainframe Modernization)

Vertical Lead | [VIRTUSA POLARIS] [Chennai] | [Dec / 2015] – [Jan / 2019]

- Led a team of QA engineers in planning, execution, and delivery of functional, regression, and integration testing across multiple application modules.
- Designed and reviewed comprehensive test cases, test scripts, and test data to ensure complete requirements coverage and traceability.
- Owned and managed the defect lifecycle using tools like JIRA, ensuring timely resolution, accurate root cause analysis, and trend reporting.
- Implemented test automation frameworks using tools such as Selenium, resulting in improved test efficiency, coverage, and cycle time reduction.
- Collaborated with cross-functional teams during requirement analysis to identify functional gaps, ambiguities, and ensure alignment with business expectations.
- Estimated and tracked effort and resource allocation using proven methods like Work Breakdown Structure (WBS) and Agile estimation techniques.
- Authored and maintained Test Plans, Test Strategy documents, and defined Entry/Exit Criteria for System Integration Testing (SIT).
- Prepared Test Completion Reports, obtained UAT Sign-offs, and ensured deliverables met defined quality standards and compliance metrics.
- Facilitated Casual Analysis Meetings (CAMs) to address defect leakage and implemented continuous improvement plans.
- Presented key quality metrics (defect density, test coverage, pass/fail rates) to stakeholders on a release-wise basis to support decision-making.
- Conducted retrospective meetings to capture lessons learned, document best practices, and improve future test execution strategies.
- Provided analytical and performance data to support pre-sales activities, bid proposals, and client engagements.

Project :

1. **Citi BANK (Corporate Banking - Payments)**

Test Lead | [VIRTUSA POLARIS] [Chennai] | [Apr / 2009] – [Nov / 2015]

- Led a team of test engineers in the planning and execution of **functional, regression, and integration testing** for web-based applications.
- Developed and reviewed **test cases, test scripts, and test data sets** ensuring complete coverage of **business and system requirements**.
- Managed the **defect lifecycle** using tools like **JIRA**, ensuring accurate logging, triage, and timely resolution of issues in collaboration with development teams.
- Implemented and maintained **test automation frameworks** using **Protractor**, improving test efficiency, execution speed, and consistency for **Angular-based applications**.
- Actively participated in **project planning, requirement walkthroughs, and review meetings**, providing insights on **test strategy, quality assurance best practices, and risk mitigation**.

Projects:

1. **ENBD Bank** (BPM ACCOUNTS MAINTENCE - Onsite)
2. **Emirates Islamic Bank** (Onsite)
3. **Cuscal Bank** (Switch Testing Services)
4. **Royal Bank of Scotland - ICM** (International Cash Management)

Education

Masters in business administration [M.B.A] - [Systems] – University of Madras | [2006]

Bachelor of Computer Application [B.C.A] – University of Madras (Vels College) | [2002]

Certifications

- SAFe® 5 Agilist
- CISM - Certified Information Security Manager
- EXIN - Agile Scrum Master (ASM)
