

Mageshwaran Thanikachalam

 +91 9840630160 |  mageshwaran15@gmail.com |  Chennai, India

Professional Summary

Results-driven **Test Automation Leader** with **14+ years of experience** in **quality assurance (QA), test automation, and software testing** across **banking, financial services, telecom, and healthcare domains**. Expertise in leading teams, **migrating from manual to automation testing**, and implementing **high-efficiency test frameworks** to drive software quality and productivity.

- **Expert in Automation Testing, API Testing, CI/CD, and Agile methodologies.**
 - **Proficient in Python, Selenium, UFT, REST API, Jira, and Jenkins.**
 - **Led automation transformation projects**, reducing manual testing efforts by **70%** and improving execution efficiency by **27x**.
 - **Strong leadership in mentoring engineers and stakeholder communication.**
-

Work Experience

Team Lead / Associate Manager

Accenture, Chennai | June 2018 – Present

- Spearheaded the **transition from manual to automated testing**, reducing test cycle time by **40%** and increasing automation penetration.
- Built and led teams to **scale automation frameworks** using **Python, UFT, and Selenium**, improving software quality and reducing defects.
- Designed **server-side automation frameworks** using **JSON web services and Python**, optimizing regression testing.
- Implemented **CI/CD testing pipelines using Jenkins**, reducing deployment errors and increasing efficiency.
- Managed **stakeholder communication and team training**, cutting project slippages by **30%**.

Senior Software Engineer

Accenture, Chennai | Oct 2014 – June 2018

- Developed a **data-driven test automation framework** in Python, increasing test efficiency by **35%**.
- Automated regression test cases, ensuring **99% defect-free releases**.
- Designed and implemented **API testing** solutions using **Karate for SOAP web services**, reducing manual effort by **50%**.
- Conducted training sessions for teams on **UFT, Python, and Selenium automation**.

Systems Engineer

Tata Consultancy Services (TCS), Chennai | Mar 2010 – Oct 2014

- Built **hybrid automation frameworks** in **QTP/UFT**, increasing automation penetration across multiple projects.
- Integrated **Jenkins CI/CD pipeline**, reducing test execution time by **25%**.
- Automated **70% of regression test suites**, significantly reducing manual testing effort.
- Designed and implemented **Excel Macros** for automated report generation and analysis.

Industry Experience

- **Wellington Management Company (Accenture)** – Led test automation strategy, built an automation suite for reconciliation applications.
 - **PNC Financial Services (Accenture)** – Transitioned team to automation testing using **UFT and Selenium**; developed API test cases.
 - **Bank of America (Accenture)** – Developed a **server-side automation framework in Python**, achieving a **27x improvement** in execution speed.
 - **Cigna (TCS)** – Designed automation frameworks for **Active-X, Java, Web, WPF, and Visual Basic applications**.
 - **Century Link (TCS)** – Led test strategy; collaborated with business teams for test planning and execution.
-

Technical Skills

Skill Category	Technologies/Tools	Experience
Automation Tools	UFT, Selenium, QTP, Karate, REST API	10 years
Programming	Python, VBScript, Java	5 years
Test Frameworks	Data-Driven, Hybrid, Cucumber	5 years
CI/CD & DevOps	Jenkins, Git, Azure DevOps	2 years
Bug Tracking & Test Mgmt	Jira, HP ALM	10+ years
Cloud Platforms	AWS	3+ years
Domains	BFSI, Telecom, Healthcare	14+ years

Certifications

- ✓ AWS Certified Developer - Associate (*Expired*)
- ✓ HP Functional Testing v11 (QTP 11.x)
- ✓ Oracle Cloud Infrastructure (OCI) Foundations Associate
- ✓ OCI AI Foundations Associate

Education

🎓 **Bachelor of Engineering (Electronics & Communication)**

Velammal Engineering College, Chennai – **81% Aggregate**

Key Achievements

- 🏆 **Won Capital Markets Contest** during Industry Summit (**2021**)
 - 🏆 **Received Accenture ACE Award** (**2020**)
 - 🏆 **Outstanding Performance Team Award** (TCS, **2013**)
-

Key Strengths

- ✓ **Test Strategy & Leadership** – Led test teams, coached engineers, and optimized QA processes.
- ✓ **Automation Frameworks** – Designed **Python-based automation** solutions for large-scale systems.
- ✓ **Process Optimization** – Implemented **CI/CD pipelines** to enhance test efficiency.
- ✓ **Defect Management** – Managed defects using **Jira & HP ALM**, improving bug resolution time.
