PROFESSIONAL SUMMARY

Results-driven Quality Assurance professional with **15+ years of progressive experience** across **SaaS products in telecom and container terminal domains**, delivering high-quality, defect-free releases. Skilled in **manual and automated testing** (Java, Selenium, Cypress, Groovy, REST API), **test strategy development, and QA process improvement**. Proven success in leading QA teams, managing UAT and SIT, and serving as client POC for global enterprises including **RWG, LBCT, Telkomsel and Acer**. Experienced in SaaS product delivery models and thriving in startup environments, driving innovation under tight timelines. Expertise in **defect triage, build certification, and performance/load testing** with CI/CD integration (Jenkins). Adept at collaborating with cross-functional teams, mentoring QA talent, and aligning testing with agile methodologies to ensure on-time, cost-efficient, and standards-compliant software delivery.

EXPERIENCE

STAFF SOFTWARE ENGINEER – QUALITY ENGINEERING, Bengaluru, Karnataka

Circles.life, October 2022–Present

- Led QA strategy and execution for **Onic** and **Telkomsel** product launches, ensuring **on-time, defect-free delivery**.
- Directed **System Integration Testing (SIT)** to validate end-to-end integration across multiple platform components.
- Led **User Acceptance Testing (UAT)** for the Telkomsel launch, ensuring smooth release and stakeholder sign-off.
- Owned defect triage process, prioritizing and resolving issues to maintain release timelines and quality standards.
- Acted as **Subject Matter Expert (SME)** to educate external teams on the **SaaS telecom product architecture** and functionality.
- Developed and automated **Java** and **REST API** test cases, increasing execution efficiency by **30%**.
- Performed **build certification** to ensure stability and functionality prior to UAT handover.
- Established **QA/testing standards, methodologies, and best practices** for agile development environments.
- Mentored QA team members, enhancing skills, productivity, and adherence to industry best practices.

SENIOR QUALITY ENGINEER, Bangkok

Opn Th Co., Ltd, April 2022–October 2022

- Led QA team in designing and executing **Web UI** and **API** test procedures using the **Cypress automation framework**.
- Defined and implemented **automation framework standards** for **REST API** and **Web UI** testing, improving test coverage and execution efficiency.
- Reviewed and validated QA documentation to ensure alignment with **business requirements** and **regulatory compliance**.
- Ensured successful deployment and high-quality delivery of **SaaS financial products** within the OpnTag NFC platform.
- Collaborated cross-functionally to validate integration of **NFC-based digital touchpoints** with online ordering, digital menus, and customer engagement solutions.

SENIOR QA ENGINEER, Chennai

Navis Software India Ltd, August 2016–April 2022

- Served as **Point of Contact (POC)** for two major clients – **Rotterdam World Gateway (RWG)** and **Long Beach Container Terminal (LBCT)** – overseeing QA activities, issue resolution, and release coordination.
- Owned **product patch release testing**, validation of new builds, and quality sign-off prior to deployment.
- Developed automation scripts in **Groovy (GDSL)** integrated with **Jenkins CI/CD pipelines**, improving test execution speed and consistency.
- Created and configured **SaaS cloud environments** for Navis N4 TOS deployment and operational emulation runs.
- Conducted extended operational emulation runs to validate **efficiency and stability** in automated container terminal operations.
- Provided QA and technical support during **software upgrade cycles**, ensuring smooth transition to newer versions.
- Collaborated with product management and customer teams to drive **continuous quality improvement** initiatives.

SENIOR QA CONSULTANT, Chennai

Infrasoft Technologies Ltd, September 2014–August 2016

- Automated functional test cases using **Selenium WebDriver** to improve regression efficiency.
- Performed **web services testing** for **SOAP** and **REST APIs** using **SOAP UI**, ensuring data accuracy and service reliability.
- Served as **offshore Single Point of Contact (SPOC)**, collaborating directly with US-based business analysts to clarify requirements and resolve issues.

QA CONSULTANT, Chennai

Interglobe Technologies Ltd, April 2014–September 2014

- Maximized **test coverage** by prioritizing test cases through **risk-based testing** techniques.
- Designed and implemented **comprehensive test plans** and **QA strategies** to enhance software quality and reduce defect leakage.
- Developed and executed **functional, integration, and regression test cases** to ensure end-to-end product validation.
- Collaborated with developers, business analysts, and product owners to clarify requirements and align testing scope.
- Tracked and reported test progress, defect status, and quality metrics to stakeholders for informed decision-making.

TEST AUTOMATION ENGINEER, Chennai

BizTech Software Services, January 2012–March 2014

- Participated in automation testing for Acer CSS application as part of a small QA team.
- Converted existing test scripts from a **licensed tool** to **Selenium**, helping reduce licensing costs.
- Developed and executed **functional test cases**, improving test coverage and accuracy.
- Assisted in creating and maintaining **automation frameworks** to reduce manual testing efforts.
- Performed **load and stress testing**, documented results, and shared findings with the Performance Engineering team for improvements.
- Helped maintain automation scripts for regression and integration testing to ensure stable releases.

TESTING ENGINEER, Coimbatore

CG VAK Softwares & Exports Ltd, November 2010–December 2011

- Analyzed **business requirements** and wrote detailed **test cases** to validate functionality and compliance.
- Executed manual test cases, logged defects in tracking systems, and retested fixes to ensure issue resolution.
- Constructed and maintained **test environments** for functional and regression testing.
- Prepared and delivered **test execution reports** to the QA Manager for status tracking and decision-making.
- Collaborated with cross-functional teams to design and test new production equipment for improved quality and performance.

EDUCATION

MASTER OF SCIENCE IN SOFTWARE ENGINEERING

Coimbatore Institute of Technology, April 2010

CERTIFICATIONS

- Oracle Certified Associate – Java SE8 Programmer
- ISTQB – Foundation Level Tester
