Education

● Bachelor of Computer Science And engineering

Jayalakshmi Institute of Technology
Thoppur, Dharmapuri.

Skills

Functional Tool: Selenium WebDriver, Java

Framework: Cucumber, TestNG, Junit, POM, Data Driven

Test Management Tool: JIRA, API, Regression Testing, Sanity Testing, Smoke Testing, Postman, STLC, SDLC, RestAssured

Build Automation Tools: Maven, GIT, Jenkins

Programming Language: Core Java
Domain Knowledge: Ecommerce and Banking.

Testing Methodology: Agile

Professional Summary

- 4.6 years of experience in **Software Testing**.
- Experience in **Manual Testing and Automation Testing** using Selenium WebDriver.
- Good experience in the entire Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) and specialized in Validation.
- Extensively worked on Writing **Test Cases, Execute Test Cases, Logging Defects, Defect Tracking and Reporting**.
- Experience as a Software tester in **Web Based Applications** using Selenium Web Driver across multiple browsers.
- Having solid experience with automation frameworks like **Cucumber BDD, TestNG, Junit, POM, and Data Driven** framework and possessing
- Involved in various types of Testing like **Functional Testing, UI testing, DB testing, Sanity Testing, Retesting & Regression** testing according to Test Plan.
- I possess proficiency in navigating the **Agile-Scrum methodology**.
- Involved in all stages of the testing process, development of Test Procedures and **Test Cases** based upon requirements.
- Notable experience in tools like **Eclipse, Maven, GIT, JIRA, Jenkins**.
- Having good working knowledge in **SDLC and STLC** phases.
- Experience in creating **test automation frameworks**.
- Detail Orientated and Resourceful in the Completion of Projects.
- Ability to **Multi Task and Meet Strict Deadlines**.
- Executing **Selenium Test Cases** and Reporting defects
- Ability to learn new technologies very quickly.
- Expertise in handling TestNG and Junit framework.
- Involved in writing basic **SQL Queries**.

Work Experience:

- **Matrixcare India Pvt Ltd., Chennai** - Software Test Engineer-QA November 2019 - Till Date

Projects Handled:

Project 1:

Project Title : Net Health (Web based E-Commerce Application)
Testing Approach : Automation
Tools Used : Selenium-Java, Cucumber BDD, Junit, Maven, Git, Jenkins
Testing Frameworks : Cucumber Framework, POM
Role : Software Test Engineer

Client Description:

Net Health - E-Commerce domain is a software company that sells electronic health record products. These products include management tools, clinical workflow documentation, revenue cycle management software, analytics, and patient-reported outcomes.

Roles and Responsibilities

- Design and implemented different automation frameworks like **Cucumber, POM, Data Driven framework**.
- Execute and **debug test scripts**.
- Performed Defect Tracking and Management **JIRA**.
- Propose improvements to current practices ensuring that approved enhancement are fully implemented and the repeat errors are eliminated.
- Reviewed all the Requirement documents, Functional Specification and Use Case documents
- Implemented automation using **Selenium WebDriver, JAVA, Cucumber, Maven**.
- Expertise in developing automation scripts in BDD format using cucumber and proficient in writing cucumber scenarios in **GHERKIN** format.
- Developed the **features, scenarios, step definitions for BDD (Behavior Driven Development)**
- Involved in analyzing and feasibility check of a newly added functionality for automation. Design and implement **Hybrid Driven Framework** approach using Selenium Web driver.
- Performed **Back-End Testing** for data validation using **SQL Queries**.
- Executed automated tests on **Continuous Integration** environment (CI) using Jenkins.
- Strong experience in **Black Box testing** and used **JIRA** for Defect tracking.
- Tested the application in highly dynamic environment with sprint team using **agile methodology**.

Project 2:

Project Title : NBKC Bank (Web based Banking domain Application)
Tools Used : TestNG, JIRA
Testing Frameworks : Selenium-Java, TestNG, POM
Role : Manual and Automation Test Engineer

Client Description:

NBKC Bank (stylized nbkc bank) is a United states-based bank. NBKC Bank is a full-service bank. The Bank accepts deposits, makes loans and provides other services for the public. .the bank became active in financing

Roles and Responsibilities

- Analyzing & validating the completeness of **business requirements**.
- Generating the **Test scenarios and Test cases**.
- Generating Regression **Test scripts** by extracting the requirements that need to be tested from available documentation and/or liaising with the relevant people.
- Developed Automation Test Scripts.
- Retesting **defect** fixes on each release build.
- Involvement in creating of the test cases, Test Scenarios and Test Data.
- Used **Firebug tool** to identify the object properties in the Application.
- Performed **Smoke, System Integration, Retesting, Regression testing**.
- Conduct Internal Test Case **Peer Reviews**.
- Participated in weekly status meetings with the team, **developers** to discuss open issues and communicating with onsite team.
- Involved in writing automation script by using **Selenium WebDriver**.
- Enhanced Test cases using Java Programming features and **TestNG Annotations**.
- Setup the Automation framework using Selenium to run test cases in multiple browsers and platforms.
- Reviewing the Test Reports using **TestNG framework**.
