- API Testing

LANGUAGES KNOWN

- Tamil and English

OBJECTIVE

With nearly more than 2 years of experience as a Test Engineer, I have honed my skills in both manual and automation testing. I have been involved in the analysis of business requirements, preparation and execution of test cases, and sanity, functional, and system testing. I have also gained experience in API testing and the development of automation scripts using Selenium WebDriver and Java. In addition, I have been responsible for updating issues in Bugzilla, verifying bug fixes, and interacting with developers for problem resolution. My work in the insurance domain, specifically with TATA AIG General Insurance, has given me a deep understanding of the industry's specific testing needs.
