- Developing BDD (Behavior Driven Development) test using Cucumber.

- Identify the test cases that need to be automated.
- Inspect the X-path of the Web element.
- Identify the bugs and report the defects to the development team through
- JIRA. Re-testing the resolved defects.
- Regression testing to check the existing functionality.
- Interacting directly with client manager, scrum master and product owner on a daily basis and provide progress/updates of the tasks assigned.
- Participating in all agile ceremonies such as PI planning, sprint planning, scrum meetings, demo meetings, sprint retro etc., and presenting our work to PO's and receiving sign off for implementation.
- Experience in API- Automation testing using Rest Assured and Manual testing with Postman tool.

Projects worked

Project 1:

- **Project:** Residential Services
- **Client:** Hitches & Glitches
- **Framework:** Cucumber
- **Defect Tracking Tool:** Jira
- **Automation Tools:** Selenium WebDriver UI

Description:

It is a web-based application and it delivers professional FM services on behalf of blue-chip organization's such as Dubai Airport, DU, Etihad Airways, and Emaar's Dubai Mall. We are also making significant inroads into the entertainment sector, with recent contract wins for IMG Worlds of Adventure and Dubai Parks & Resorts.

Project 2:

- **Project:** Hitek Services
- **Client:** Hitek
- **Framework:** TestNG
- **Defect Tracking Tool:** Jira
- **Automation Tool:** Selenium WebDriver UI

Description:

It is a web-based application and its broad range of intelligent applications is a result of people, processes, and technology empowering our customers with digital, business, and technological transformation.

EDUCATION

Bachelor of Engineering (CSE)

National College of Engineering, Tirunelveli, Tamilnadu Aug 2012 - May 2016
