Career Objective: -

Dedicated Software Tester with 6 years of experience in ensuring the highest standards of quality in software development and product manufacturing. Adept at designing and executing comprehensive test plans, test cases, and test scripts to identify defects and improve processes. Proven track record of collaborating with cross-functional teams to drive quality initiatives, enhance product reliability, and streamline testing processes.

Professional Experience: -

- Worked in HCL Technologies Ltd.- Chennai as a Software Tester for 3 years from April 2019 to March 2022
- Working at Accenture Solution Pvt. Ltd. in Chennai as a Software tester-QA for 3 years, from March 2022 to March 2025.

Professional Qualification: -

- **BTech.IT** from S.A. Engineering college (2018).

Testing Skills: -

Manual testing: -

- Skilled in SDLC and STLC methodologies such as Agile and Waterfall.
- Proficient in creating test plans, test cases, Test Execution Process, Defect Life Cycle, and test scenarios based on project requirements and specifications.
- Detecting bugs & classifying them based on severity and priority and create bug report.
- Hands-on experience with testing tools such as Jira, Workfront, Sitecore and browser stack.
- Skilled in executing various types of testing including functional testing, regression testing, System testing, Usability testing, Acceptance testing, Globalization testing, smoke testing, accessibility testing, integration testing, regression testing, performance testing, Re-testing, and user acceptance testing across various platforms and browsers.
- Lead testing efforts for web and mobile applications.
- Effective communication and collaboration skills, with the ability to work well in cross-functional teams.
- Identify, document, and track software defects using defect tracking tools such as JIRA and Workfront.
- Experience in configuring setups for testing in Windows.
- Experience with Black Box Testing and Bug life cycle.
- End to End Requirement Traceability Mapping.
- Lead manual testing efforts for complex web and mobile applications, ensuring adherence to quality standards and project timelines.
- Identify, document, and track software defects using defect tracking tools such as JIRA and Workfront and follow up on issue resolution with development teams.
- Trainings provided for new joiners.

Automation testing:

- Well Versed in creating and maintaining test automation frameworks like Cucumber Framework, Maven, POM.
- Well Versed with Data driven Testing, Cross browser testing using Selenium WebDriver, TestNG.
- Skilled in developing test scripts using programming languages such as Java and oops.
- Execute automated test scripts using Selenium WebDriver, TestNG and analyze test results.
- Hands-on experience with testing tools like Selenium, JIRA, Workfront.
- Executed automated test suites, analyzed test results, and reported defects using defect tracking tools.
- Assisted in the design and implementation of automated test scripts using Selenium WebDriver.
- Analyzing and understanding the Business Requirements (User Stories) and Client Expectations.
- Analyzed client's change requests, make necessary amendments to client requirements and test cases.
- Re-factoring automation scripts and making them work according to new changes/features.
- Have knowledge in Selenium web driver tool, having experience in creating, executing, and maintaining the scripts via automation.
- Experienced in writing XPath to locate web elements.
- Good knowledge in experience with all levels of testing including Sanity, Usability, Functional, Integration, Regression, Re-testing, and User Acceptance Testing.

Technical Skills: -

- Languages : Core Java
- Operating System : Windows, Linux, macOS
- Databases : My SQL
- Testing Tools : JIRA, Workfront, Sitecore, Browse stack and Selenium
- Framework : BDD with cucumber, POM, Maven
- Web Browsers : Chrome, Firefox, Internet

Projects Undertaken: -

Project 1

Client : ExxonMobil

Project Title : Web pages management system

Tool Used : JIRA

03/2022 - 03/2025.

Project Description:

The project vision is web-based application for new intranet that is intuitive, responsive, and appealing for all our stakeholders. The new sites will be aligned with our culture and be a place where people can find and share information with one another as they build communities. ExxonMobil has initiated a project to procure and implement a platform that provides enhanced content management system and distributed publishing capability to enable efficient and effective information sharing etc.

Contribution:

- Prepared test cases and document test results, defects, and issues.
- Performing in requirement analysis, design reviews, and sprint planning meetings, providing inputs on testability and quality aspects of the software.
- Collaborate with developers, business analysts, and other stakeholders to resolve issues and ensure timely delivery of high-quality software products.
- Prepared test scenario based on the requirements.
- Performed Functional testing, Regression testing, Sanity testing, Smoke testing, Retesting, Accessibility testing and System testing.
- Discussed the Issues, Risks, and daily status during Scrum calls.
- Identified, documented, and reported software defects using bug tracking systems such as Jira, tracking defects from discovery through resolution.

Project 2

Client : Woolworths

Project Name : Supply chain

Tools Used : Selenium web driver, TestNG

2021 - 03/2022

Project Description:

The project vision is for a new intranet that is intuitive, responsive, and appealing for all our stakeholders. The new sites will be aligned with our culture and be a place where people can find and share information with one another as they build communities. Woolworths has initiated a project to procure and implement a platform that provides enhanced content management system and distributed publishing capability to enable efficient and effective information sharing etc.

Contribution:

- Analyzing and understanding the Business Requirements (User Stories) and Client Expectations.
- Performed Smoke, Sanity, Integration, Acceptance and Regression testing of the application.
- Designed the Automation scripts based on scenarios.
- Analyzed client's change requests, make necessary amendments to client requirements and test cases.
- Preparation and execution of Test Case, Test Plan, scenarios based on requirements, and capturing, reviewing, and analyzing test results to validate the functionality.
- Re-factoring automation scripts and making them work according to new changes/features.

Project 3:

Client : OD, USA
Project Name : Staples
Testing Approach : Selenium web driver, TestNG 2020-2021

Project Description:

Rewards refresh application has been used by the Customer Service Representative (CSR) team of Staples. The Rewards application helps the customer to become a member of the Staples rewards program. The application maintains the data of enrolled customers, the rewards. The CSR team monitors the application and also provides the complete information to the customer related to their purchases and rewards earned through Staples.

Contribution:

- Executed automated test suites, analyzed test results, and reported defects using defect tracking tools.
- Analyzing and understanding the Business Requirements (User Stories) and Client Expectations.
- Designed the Automation scripts based on scenarios.
- Performed Functional Testing, Re-testing, and Regression Testing.
- Prepared test scenario based on the requirements.
- Involve in Understanding the business requirements.

Project 4:

Client : Sputnik
Project Name : Post designation process
Testing Approach : Selenium web driver, TestNG 2019-2020

Project Description:

Divestiture project of Sputnik - TSA Support and Colleague movement externally

Contribution:

- Interacted with developers for status of the bugs and re-tested the fixed Bugs.
- Fixed the production issues in timely manner for the end user satisfaction.
- Prepared and developed the RTM for high rigor requirements.
- Identifying Test Scenarios for Preparing Test cases.
- Writing Test cases and Execution of the Test cases.

Project 5:

Client : Sputnik
Project Name : Key for Future Ready
Testing Approach : Manual Testing 2019-2020

Project Description: _

To perform colleague movement between Sputnik Companies as per Client's requirement.

Contribution:

- Analyzed the Business Requirements Document and prepared detailed Test Cases for new functionality.
- Business Analyst and Functional & Integration tester
- Coordinated with client for requirement understanding.
- Well Acquainted with Software Development Life Cycle (SDLC) & Software Testing Life Cycle (STLC).
- Develop testing plans for project to ensure timely and effective implementation.
- Performed UAT, Regression, Functional, Integration testing.
- Attended review meetings with Business Analysts, Developers to understand and test according to their requirements.
- Worked as a Primary tester in client-based projects.
