PROFILE

Responsible and enthusiastic recent graduate who is willing to learn and apply the acquired knowledge and technical skills in the organization.

EXPERIENCE

1. S10 HEALTH - AI DEVELOPING AND LEARNING INTERNSHIP

- **Data Analysis and Visualization** - Proficient in data analysis using Power BI, Excel, and Python, with expertise in data modeling, cleaning, and visualization. Skilled in SQL-Python integration for seamless data handling.
- **Machine Learning and AI** - Experienced in building machine learning models, fine-tuning LLMs, and developing generative AI solutions. Skilled in prompt engineering, text generation, voice-to-text transcription, and GPT-based chatbot development.

2. FIFTH GENERATION TECHNOLOGIES - SOFTWARE DEVELOPER

- **Software Developer** - TAFE (Tractors and Farm Equipment Limited) to streamline tractor manufacturing. I developed RESTful APIs and backend logic using Python and Django, created and managed database tables with Django ORM, and built responsive, user-friendly frontend interfaces using Ionic Angular. I played a key role in automating various stages of the manufacturing process, improving operational efficiency while collaborating closely with cross-functional teams to deliver scalable, high-quality software solutions.

EDUCATION

Masters in Computer Science - 75 % (2021 - 2023)

A.V.C. Autonomous College, Mannampandal, Mayiladuthurai.

Batchelor in Computer Science - 70 % (2018 - 2021)

A.V.C. Autonomous College, Mannampandal, Mayiladuthurai.

HSC - 60 % (2017 - 2018)

GGSM HR Secondary School, Mayiladuthurai.

SSLC - 84 % (2015 - 2016)

GGSM HR Secondary School, Mayiladuthurai.

SKILLS

- Programming Languages: **Python**
- Data Science: **Machine Learning, Deep Learning, Artificial Intelligence, Natural Language Processing (NLP), Computer Vision, Data Processing**
- Python and Machine Learning Frameworks: **DJANGO, Flask, Streamlit, Gradio, TensorFlow, PyTorch, scikit-learn**
- NLP and Computer Vision Libraries : **NLTK, spaCy, OpenCV, Pillow, Yolo**
- Data Engineering and Data Visualization: **Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel, Canva**
- Web Development and Database: **HTML, CSS, IONIC, ANGULAR , MYSQL, NOSQL**
- AI Platforms: **OpenAI, Hugging Face, Vertex AI, LangChain, Ollama, Llama, GenAI, Groq AI, Vertex AI, AssemblyAI**
- Additional AI Skills: **Prompt Engineering, Content Generation, Speech Synthesis, Retrieval Augmented Generation, Multi-Agent Systems.**

PROJECTS

1. AUTOMATION SOFTWARE FOR TRACTOR MANUFACTURING CLIENT: TAFE

- Developing automation software for tractor manufacturing. Built RESTful APIs and managed backend logic using Django and Python, and created responsive frontend interfaces with Ionic Angular. Automated key manufacturing processes, enhancing efficiency and collaborating with teams to deliver scalable solutions. **(DJANGO, IONIC)**

2. AI-POWERED TECHNICAL SUPPORT CHATBOT WITH VOICE INTERACTION

- Developed a Technical Support Chatbot using Retrieval-Augmented Reality **(RAG)** for voice-to-text and text-to-voice interactions. The chatbot provides real-time, step-by-step troubleshooting instructions for users. It enhances user experience by offering hands-free, efficient support for application-related issues. **(STT, TTS)**

TECHNICAL SKILLS

- Advanced in prompt engineering, content generation, TTS, and GPT fine-tuning. Hands-on with OpenAI, Hugging Face, Vertex AI, LangChain, Ollama, LLaMA, and AssemblyAI.
- Proficient in Django for developing REST APIs, user authentication, and admin panels. Skilled in integrating Django backends with modern frontend frameworks.
- Experienced in building cross-platform apps using Ionic Angular and TypeScript. Proficient in designing responsive UIs with Angular components and Ionic UI elements.
- Advanced in Power BI for dashboards, data classification, and real-time analytics.

CERTIFICATION AND AWARDS

- Completed a **Internship** in AI at S10 Health
- Certificate in **Data Science Master Program** at Besant Technologies, Velachery.
