Professional Summary

- **2.5+** Years of Experience in Performance Testing using HP Load Runner, Jmeter.
- Worked with performance testing project activities including designing scripts, executing load tests, reporting observations, server analysis.
- Good knowledge in Software Performance Test Life Cycle
- Experience in Web (Http/Html) and Web Services protocols
- Experience in Script enhancements like Correlation, Parameterization, Page verification, Error Handling, Runtime settings.
- Expertise in manual correlation and fixing dynamic values from server response.
- Ability to understand the Performance requirements of the Application and business process to emulate real world scenarios.
- Involved in building Load, Stress and Endurance Performance testing types
- Experience in running load test in Controller and Performance Center.
- Expertise in Monitoring Window's Resources using AppDynamics.
- Involved in preparing various Performance Test Reports using Load Runner.
- Ability to drill down and identify Performance related bottleneck's.
- Experience in Creation of Performance reports based on the Executions.
- Active interaction with team member's and team lead in review meetings to evaluate the progress and performance.
- Highly motivated, quick learner, team player with good technical and analytical skills
- Ability to work independently and in a team based environment.

Academic Qualifications

- Graduated from JNTUA from MJR college of engineering and technology in 2022 with 72%.

Career Path

- Currently working in **Creative softech Pvt Ltd** as a **Performance Test Engineer** from January 2022 To Till Date.

Skill Set

Performance Tools	:	LoadRunner, Jmeter, Blaze meter, LRE
Performance Monitoring Tools	:	AppDynamics, Perfmon
Application/Web servers	:	Web sphere, Web Logic, Apache Tomcat
Languages	:	Java, HTML, CSS
Database	:	SQL, RDBMS
Operating Systems	:	Windows Family

#1 (CURRENT PROJECT)

Project	:	Commercial Account Management System (CAMS)
Client	:	Saint Paul Travelers, Hartford, USA
Testing Type	:	Performance Testing
Testing Tools	:	Load Runner, LRE, AppDynamics, JIRA, Confluence

Description:

CAMS are a surety account management, processing system which is a business unit within 'St. Paul Travelers' Bond. It consists of specializing in bonding non-construction and non-financial service accounts. There are four different enhancements going into CAMS Q2 Release that are classified as projects.

1. Surety Print Delivery
2. Moody's Risk Calc
3. Special Risk Bill Only
4. General Release.

Roles & Responsibilities:

- Understanding of the application functionality. Identifying the test scenario's to validate the performance of key business functions and certifying the NFR requirements. Identify the test environment, test data and access needs.
- Creation of the VuGen Scripts & enhancement of scripts like Parameterization, Correlation, Runtime settings
- Running the scenario on controller with specified number of Vusers.
- Preparation of the Performance Reports and forwarding the report to my onsite coordinator

- Created Performance Testing Scenarios and conducted Performance, Stress, Load and Endurance Tests
- Involved in developing monitoring scripts for all the servers participated in the testing
- Involved in monitoring all the servers at the time of test execution
- Identifying & reporting performance bottlenecks in the application.
- Preparation of consolidated performance summary reports.
- Updating weekly status report and communicating over the issues with the client.

#2 (PROJECT)

Project details:

Project	: Farmers Fast Quote
Client	: Farmers Insurance Group (www.farmers.com)
Testing Type	: Performance Testing
Testing Tools	: Jmeter, Blaze Meter, Postman, SOAP UI, New Relic.

Description:

The Farmers Insurance Group of Companies is a personal lines property and casualty insurance group providing homeowners insurance, auto insurance, life insurance, and financial services in the United States.

The goal of this easy-to-use service is to make the comparison shopping process simpler for our customers. Answer a few questions on-line and within moments, you'll have a free quote. After receiving a quote, you'll have the ability to choose if you would like to be referred to a Farmers agent in your neighborhood or provided information on how to contact an agent directly.

Responsibilities:

- Reviewing of the test cases.
- Record Performance Test Scripts for the Business Processes
- Involved in designing Work Load characteristics based on the number of Records
- Involved in Memory Leak Testing
- Designing the Load Pattern , Scenario's based on the requirements
- Involved in monitoring Server Side Resources
- Analyzing the Performance Test Results & Preparing Performance Reports by using Analyzer
